100 WOLVES, ONE SHEEP

DOES THE SHEEP SURVIVE?

THE CASE IN ONE LINE
A hundred perfect logicians circle one sheep — and every one of them is hungry.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

THUMBNAIL
the cover frame that earns the tap

POSTING COPY
titles, caption, pinned comment

EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

A sheep stands in a clearing. Around it, in a perfect ring, stand one hundred wolves.

The rules of the ring are strange. Any wolf may pounce and eat the sheep. But the instant a wolf eats, that wolf turns into a sheep itself — and the ring closes around the new sheep.

Every wolf wants the meal. But every wolf wants to live even more, and every wolf reasons perfectly — and knows the others reason perfectly too. Nobody is reckless. Nobody is kind. They are all simply, flawlessly logical.

THE QUESTION

Does the sheep get eaten — or does it walk away untouched?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

Does the sheep get eaten — or does it walk away untouched?

HINT 1

Start tiny. Forget the hundred — what happens with just one wolf? Then two?

HINT 2

Watch the pattern as the count climbs: three wolves behave differently from two, and four differently from three.

HINT 3

Work backwards from the end of the chain. The first wolf can predict every step that follows its bite — including its own fate.

YOUR MOVE

Does the sheep get eaten – or does it walk away untouched?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

The sheep survives. Not one wolf dares to move.

Work backwards. With 1 wolf, it eats safely — there is nobody left to eat it. With 2 wolves, if one eats, the other will eat it in turn, so neither eats: the sheep is safe.

With 3 wolves, a wolf that eats becomes a sheep facing 2 wolves — and the 2-wolf case is safe for the sheep, meaning safe for the eater. So with 3, a wolf does eat. The pattern alternates: odd counts eat, even counts hold.

100 is even. The first wolf knows that eating leaves 99 wolves facing it — an odd count, the eating case — and it would be eaten. Every wolf can run the same chain. Nobody moves.

WHY IT WORKS

This is backward induction: solve the smallest case, then let each bigger case inherit the answer from the one below it. The alternation — odd eats, even waits — is the whole machine.

Notice that no wolf needs courage or mercy. Pure self-interest, pushed through perfect logic, produces a standoff. That is why this riddle spreads: the answer feels impossible until the chain is shown, and then it feels inevitable.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
The brain wants to simulate a hundred wolves at once and drowns. The fix is to shrink the problem until it is trivial — then climb.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team EATEN: 'A hundred hungry wolves against one sheep? It gets eaten in seconds. Logic doesn't stop hunger.'

CAMP B SAYS
Team SAFE: 'Nobody moves. The first wolf to bite signs its own death warrant — and every wolf knows it.'

PIN THIS COMMENT
Comment BEFORE the reveal: EATEN or SAFE? Pick a side — the argument starts now.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
The wolves are identical slate-blue silhouettes with a single amber eye each — no individual markings, ever; they are one machine, not characters.

LOCK
The sheep is small, white and round with one green tuft of wool; it never looks afraid — its calm is the joke and the clue.

LOCK
The clearing never changes: same ring of pines, same moon position, same ground. Only the light changes, at the dawn of the final clip.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-RING: flat 2D storybook illustration, vertical 9:16, moonlit forest clearing at night, a perfect ring of identical slate-blue wolf silhouettes seen from a high three-quarter view, one small white sheep with a green tuft of wool standing in the exact centre, deep navy palette, soft moonlight, no text.

REF 2
REF-SHEEP: the same sheep alone on a plain deep-navy background, flat 2D storybook style, small white sheep, round body, green tuft on its head, calm expression, full body, centred, no text.

REF 3
REF-WOLF: one wolf from the ring alone on a plain deep-navy background, flat 2D storybook style, slate-blue wolf sitting upright in profile, amber eye, intelligent calm expression, full body, no text.

REF 4
REF-LADDER: four stacked mini-panels, flat 2D storybook style, deep navy: panel one shows 1 wolf and a sheep, panel two shows 2 wolves and a sheep, panel three shows 3, panel four shows 4 — same ring clearing, top corner of each panel left empty, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
Wide shot, moonlit clearing at night: a perfect ring of one hundred slate-blue wolf silhouettes around one small white sheep in the centre. Slow push-in. Nobody moves.

NARRATION — generated inside this clip
"One hundred wolves. One sheep. Every wolf is a perfect logician — and every wolf is starving."

Sound: Night crickets, distant wind.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
One wolf silhouette lunges a single step toward the sheep — then freezes, as a soft glow outlines it turning sheep-shaped. The ring tightens by one gap. Hold.

NARRATION — generated inside this clip
"The rule of the ring: any wolf can pounce and eat the sheep. But the moment it eats, it turns into a sheep — and the ring closes in."

Sound: One soft step, then silence.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
A row of wolf faces in profile, amber eyes narrowing one after another, each calculating. Slow pan across the faces. No other movement.

NARRATION — generated inside this clip
"Each wolf wants the meal. But each wolf wants to live even more. And every wolf knows exactly what every other wolf will do."

Sound: Low, tense string note.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze the wide ring shot. A large empty comment-shaped space is left in the lower third of the frame by the composition. Everything perfectly still for the pause.

NARRATION — generated inside this clip
"So — does the sheep get eaten? Lock your answer in the comments. Most people get this one wrong."

Sound: Silence — let the pause breathe.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
Four small panels appear one by one — 1 wolf, 2 wolves, 3 wolves, 4 wolves around a sheep — each stamped in the edit later (prompts must leave the top corner of each panel empty). The pattern flips panel to panel.

NARRATION — generated inside this clip
"Think small. One wolf eats safely. Two wolves — neither dares. Three — it eats. Four — nobody moves. The pattern flips every single time."

Sound: Four soft ticks, one per panel.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
Dawn light. The ring of wolves parts like a gate and the little sheep walks calmly out of the clearing and away. The wolves watch it go.

NARRATION — generated inside this clip
"One hundred is even — so nobody moves, and the sheep walks away untouched. Follow for a new riddle every day."

Sound: Morning birds, gentle release.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, '100 WOLVES, ONE SHEEP'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"One hundred wolves. One sheep. Every wolf is a perfect logician — and every wolf is starving."

LINE 2 · 0:10
"The rule of the ring: any wolf can pounce and eat the sheep. But the moment it eats, it turns into a sheep — and the ring closes in."

LINE 3 · 0:20
"Each wolf wants the meal. But each wolf wants to live even more. And every wolf knows exactly what every other wolf will do."

LINE 4 · 0:30
"So — does the sheep get eaten? Lock your answer in the comments. Most people get this one wrong."

LINE 5 · 0:40
"Think small. One wolf eats safely. Two wolves — neither dares. Three — it eats. Four — nobody moves. The pattern flips every single time."

LINE 6 · 0:50
"One hundred is even — so nobody moves, and the sheep walks away untouched. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The whole riddle in one frame: a ring of dark wolf silhouettes closing around one tiny lit sheep. Big edit-drawn text: '100 vs 1'.

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a tight ring of slate-blue wolf silhouettes photographed from directly above a moonlit clearing, one tiny white sheep glowing softly in the centre, deep navy palette, the top third of the frame left dark and empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
100 Wolves vs 1 Sheep — Nobody Expected This Ending

TITLE
Can One Sheep Survive 100 Perfect Logicians?

TITLE
The Riddle Where Nobody Dares Move (100 Wolves Puzzle)

CAPTION — first line is the question
100 wolves. 1 sheep. Every wolf reasons perfectly. Does it get eaten? Comment your answer BEFORE the reveal — then watch the chain decide. New riddle every day.

PINNED COMMENT
Comment BEFORE the reveal: EATEN or SAFE? Pick a side — the argument starts now.

Hashtags: #riddle #logicpuzzle #brainteaser #puzzle #riddlemethis #logic #mindbender #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Run the same machine with 99 wolves and ask again — the flipped answer shocks everyone who memorised the first video instead of learning the ladder.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

The sheep survives. Not one wolf dares to move.

A new riddle lands every day. Solve the next one before the reveal.

— END OF BOOK —
