EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

Twelve coins lie on the table, identical to the eye. Eleven are honest. One is fake — a little heavier or a little lighter than the rest, and you do not know which way it lies.

Beside the coins stands a balance scale: two pans, no numbers, just a verdict — left down, right down, or level.

You may use the scale exactly three times. Not four. Three. And by the end you must point at the fake and declare, correctly, whether it is heavy or light.

THE QUESTION

Can you guarantee to find the fake coin — and its direction — in only three weighings?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

Can you guarantee to find the fake coin — and its direction — in only three weighings?

HINT 1

Do not hunt the coin. Hunt information: every weighing has three possible outcomes, and three weighings give you enough outcomes to cover twelve coins.

HINT 2

Split the coins into three groups, not two. What sits off the scale knows things too.

HINT 3

After the first tip, label every coin honestly: maybe-heavy, maybe-light, or proven genuine. Never let the labels blur.

YOUR MOVE

Can you guarantee to find the fake coin – and its direction – in only three weighings?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

Yes — three groups of four, and ruthless bookkeeping, guarantee the fake and its direction.

Weigh 4 against 4 (weighing 1). If it balances, the fake is in the 4 set aside and the 8 weighed are genuine. Weigh 3 suspects against 3 genuine coins (weighing 2): if it balances, the last suspect is fake — weigh it against a genuine coin to learn heavy or light. If it tips, the fake is among those 3 suspects and the tip's direction tells you heavy-or-light; weighing two of them against each other (weighing 3) finds it.

If the first weighing tips — say the left pan drops — the fake is a heavy coin from the left pan or a light coin from the right, and the 4 unweighed coins are genuine. For weighing 2, load 2 maybe-heavy + 1 maybe-light against 1 maybe-heavy + 1 maybe-light + 1 genuine. Each outcome — left, right, or level — shrinks the field to at most 3 suspects whose direction is now known, and weighing 3 finishes the job. The mirror case (right pan drops first) works the same way.

WHY IT WORKS

Three weighings, three outcomes each: 3 × 3 × 3 = 27 possible result-strings. Twelve coins, each possibly heavy or light, make 24 cases to distinguish — 24 fits inside 27, so a solution must exist; the scheme above is one that works.

The real skill is not the scale — it is the labels. Every weighing is designed so that each outcome eliminates the same share of suspects. That balance is what makes three weighings enough.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Greedy weighing — piling coins on to 'test more at once' — wastes outcomes. Information, counted coldly, beats effort.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team IMPOSSIBLE: 'Twelve suspects, three tries — that's not skill, that's a lottery. It cannot be guaranteed.'

CAMP B SAYS
Team POSSIBLE: 'Three weighings carry more information than you think. The maths guarantees it.'

PIN THIS COMMENT
POSSIBLE or IMPOSSIBLE? Vote before the reveal — no fence-sitting.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
The coins are identical silver discs with a plain star stamp — the fake is never visually different. Any marking you see in the final video was drawn in editing.

LOCK
The scale is always the same brass balance, and the table is always the same dark wood, shot top-down or straight-on. No other props, ever.

LOCK
Labels (maybe-heavy, maybe-light, genuine) live on the little paper tags and are always edit-drawn — generated labels garble.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-COINS: flat 2D storybook illustration, vertical 9:16, top-down dark wooden table with twelve identical silver coins in a neat 3-by-4 grid, soft lamplight, no hands, no text.

REF 2
REF-SCALE: a brass balance scale alone on a plain deep-navy background, flat 2D storybook style, two round pans hanging level, centred, no coins, no text.

REF 3
REF-SPLIT: top-down flat 2D illustration: the same twelve coins now in three separated groups of four on the dark table, generous space between the groups, no text.

REF 4
REF-TAGS: flat 2D illustration, close view of six coins on the dark table, each with a small blank paper tag beside it (labels are drawn in editing), soft lamplight, no readable text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
Top-down shot of a dark wooden table: twelve identical silver coins in a neat grid, one brass balance scale standing beside them. Slow push-in.

NARRATION — generated inside this clip
"Twelve coins. One is fake — a little heavier, or a little lighter. Nobody knows which. You get three weighings. Total."

Sound: Coins clicking softly on wood.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
Close on the balance scale: empty pans swaying gently, then settling level. A hand hovers, choosing nothing yet.

NARRATION — generated inside this clip
"The scale has no numbers. It tips left, tips right, or stays level. Three uses — then you must point at the fake, and name its direction."

Sound: The scale's faint metallic creak.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
A pair of hands piles coins randomly onto both pans in a hurry — the scale crashes to one side, coins spill. The greedy method, failing.

NARRATION — generated inside this clip
"Most people start piling coins onto the pans to 'test more at once'. That is exactly how you lose."

Sound: A clatter — coins spilling.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze the top-down coin grid, perfectly still, the scale level at the frame's edge. The pause — composition leaves the lower third open.

NARRATION — generated inside this clip
"Can it even be done? Lock your answer in the comments: possible — or impossible?"

Sound: Silence, one ticking clock.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds

The coins divide into three groups of four, sliding apart on the table. Above them, three outcome branches open like a tree — left, level, right — drawn as clean graphic panels, corners left empty for edit labels.

NARRATION — generated inside this clip

"Count the information. Three outcomes per weighing, three weighings — twenty-seven possible result strings. Twelve coins, heavy or light — twenty-four cases. It fits."

Sound: Three soft tones for three branches.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
One coin alone under a ring of light on the dark table, the scale balanced calmly behind it. All other coins dimmed.

NARRATION — generated inside this clip
"Groups of four. Labels never blurred. The fake falls in three weighings, every single time. Follow for a new riddle every day."

Sound: A single coin set down — final.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'TWELVE COINS, ONE FAKE'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Twelve coins. One is fake — a little heavier, or a little lighter. Nobody knows which. You get three weighings. Total."

LINE 2 · 0:10
"The scale has no numbers. It tips left, tips right, or stays level. Three uses — then you must point at the fake, and name its direction."

LINE 3 · 0:20
"Most people start piling coins onto the pans to 'test more at once'. That is exactly how you lose."

LINE 4 · 0:30
"Can it even be done? Lock your answer in the comments: possible — or impossible?"

LINE 5 · 0:40
"Count the information. Three outcomes per weighing, three weighings — twenty-seven possible result strings. Twelve coins, heavy or light — twenty-four cases. It fits."

LINE 6 · 0:50
"Groups of four. Labels never blurred. The fake falls in three weighings, every single time. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The brass scale, pans loaded with coins, a huge edit-drawn '3 TRIES' over it. The limit is the hook.

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a brass balance scale on a dark wooden table loaded with silver coins, dramatic lamplight, coins scattered in the foreground, the top third of the frame left dark and empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
12 Coins, 1 Fake, Only 3 Weighings — Impossible?

TITLE
The Coin Puzzle That Defeats Everyone

TITLE
Find the Fake Coin in 3 Tries (Guaranteed Method)

CAPTION — first line is the question
Twelve coins, one fake, three weighings — and you must also say heavy or light. Possible or impossible? Vote BEFORE the reveal. New riddle every day.

PINNED COMMENT
POSSIBLE or IMPOSSIBLE? Vote before the reveal — no fence-sitting.

Hashtags: #riddle #logicpuzzle #brainteaser #coinpuzzle #mathspuzzle #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: The harder sibling: the same twelve coins, but the fake is known to be heavier — find it in two weighings, live, against a timer in the comments.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

Yes — three groups of four, and ruthless bookkeeping, guarantee the fake and its direction.

A new riddle lands every day. Solve the next one before the reveal.

— END OF BOOK —
