THE SUM EVERYONE GETS WRONG

1000 + 40 + 1000 + 30 + ...

THE CASE IN ONE LINE
Eight additions a child could do — and a room full of adults announcing the wrong total.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

THUMBNAIL
the cover frame that earns the tap

POSTING COPY
titles, caption, pinned comment

EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

No paper. No calculator. Just count in your head, the way the voice in the video counts:

Take 1,000. Add 40. Add another 1,000. Add 30. Add another 1,000. Add 20. Add another 1,000. Add 10.

Say your total out loud before you read another line of this book. If you said the number most people say, you have just met one of the most reliable traps in all of mental arithmetic.

THE QUESTION

What is 1000 + 40 + 1000 + 30 + 1000 + 20 + 1000 + 10?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

What is 1000 + 40 + 1000 + 30 + 1000 + 20 + 1000 + 10?

HINT 1

Slow down and say every running total out loud. The trap lives in the skipping.

HINT 2

The four small numbers are not thousands in disguise. Added together, they make only 100.

HINT 3

Watch the rhythm: thousand, thousand, thousand. Your brain starts hearing a pattern — and patterns are where errors hide.

YOUR MOVE

What is 1000 + 40 + 1000 + 30 + 1000 + 20 + 1000 + 10?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

4,100 — not 5,000, which is what most people announce.

Step by step, out loud: 1000 + 40 = 1040. + 1000 = 2040. + 30 = 2070. + 1000 = 3070. + 20 = 3090. + 1000 = 4090. + 10 = 4100.

Four thousands make 4000. The small additions — 40 + 30 + 20 + 10 — make exactly 100. Total: 4,100.

WHY IT WORKS

The sequence leans on rhythm. After several clean thousands, the brain starts treating every step as another thousand and rounds the small additions away — the running total 'feels' like it clicks up in thousands.

The total of the small numbers being a round 100 is the designer's final cruelty: the true answer ends in 100, the trap answer in 000, and both feel equally tidy. Only the spoken running totals protect you.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Pattern hunger. The brain would rather complete a rhythm than carry a number — so it quietly promotes 40, 30, 20 and 10 into thousands.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team 5000: 'Four thousands and the rest rounds up — it's 5000. Everyone who's quick at maths knows it.'

CAMP B SAYS
Team 4100: 'Slow down. The small numbers make exactly 100. It's 4100 — say every running total out loud.'

PIN THIS COMMENT
Your total — 5000 or 4100? Lock it in BEFORE the slow count. No editing.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
This video has exactly three props: the coin stack, the chalkboard, the two piles. Nothing else appears — the emptiness is what lets the rhythm hypnotise.

LOCK
EVERY figure in this video is drawn in editing, without exception: 1000, 40, 30, 20, 10, 4100 and 5000. A generated numeral anywhere in the frame fails the clip.

LOCK
The count's rhythm never changes speed between the fast pass and the slow pass — same voice tempo, so the viewer feels the only difference is their own attention.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-STACK: flat 2D storybook illustration, vertical 9:16, a single neat stack of plain gold coins on a dark surface against a deep-navy background, soft spotlight, no numbers, no text.

REF 2
REF-BOARD: flat 2D storybook illustration, vertical 9:16, a dark chalkboard completely blank, chalk resting on its ledge, a coin stack at its base, moody light, no text.

REF 3
REF-PILES: flat 2D storybook illustration, vertical 9:16, two piles of plain gold coins side by side on a dark surface — one very tall, one very small — deep navy background, no text.

REF 4
REF-HAND: flat 2D illustration, close view of a hand tapping the air as it counts, against a plain deep-navy background, calm, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A plain deep-navy void. A hand writes nothing — instead, a single stack of plain gold coins appears with a soft chime as the count begins (all figures are drawn in editing above the frame). Slow, steady rhythm.

NARRATION — generated inside this clip
"Add this in your head. No paper, no calculator. Take one thousand... add forty... add another thousand..."

Sound: A soft chime per addition.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
The coin stack grows in jumps to the narrator's rhythm — thousand, thousand, thousand — the pile swaying slightly, the pace hypnotic and even.

NARRATION — generated inside this clip
"Add thirty. Add another thousand. Add twenty. Add another thousand. Add ten. Now — say your total out loud."

Sound: Chimes quickening into a rhythm.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
The frame shakes gently and the stack blurs — the trap moment — as wrong totals flash past as plain unreadable smudges (the real wrong answer is edit-drawn).

NARRATION — generated inside this clip
"If you said five thousand — congratulations. You are exactly like almost everybody else on Earth. And you are wrong."

Sound: A record-scratch wobble.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze: the coin stack mid-frame, perfectly still. The pause. The frame begs the viewer to commit to a number.

NARRATION — generated inside this clip
"Before I prove it — what did YOU get? Lock your number in the comments. No editing it later."

Sound: Silence, one coin spinning down.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
The stack resets. Now chalk tally marks appear one group at a time on a dark board beside it — small numbers grouped separately from the thousands (figures edit-drawn, board left blank in the picture).

NARRATION — generated inside this clip
"Slowly, out loud. One thousand and forty. Two thousand forty. Two thousand seventy. Three thousand seventy. Three thousand ninety. Four thousand ninety..."

Sound: Chalk on a board, slow and clear.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
The two groups — one tall stack for the thousands, one tiny pile for the small numbers — sit side by side, honestly sized. The tiny pile is almost comic. Calm closing light.

NARRATION — generated inside this clip
"Four thousand one hundred. The small numbers only ever made a hundred. Follow for a new riddle every day."

Sound: One final chime — resolved.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'THE SUM EVERYONE GETS WRONG'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Add this in your head. No paper, no calculator. Take one thousand... add forty... add another thousand..."

LINE 2 · 0:10
"Add thirty. Add another thousand. Add twenty. Add another thousand. Add ten. Now — say your total out loud."

LINE 3 · 0:20
"If you said five thousand — congratulations. You are exactly like almost everybody else on Earth. And you are wrong."

LINE 4 · 0:30
"Before I prove it — what did YOU get? Lock your number in the comments. No editing it later."

LINE 5 · 0:40
"Slowly, out loud. One thousand and forty. Two thousand forty. Two thousand seventy. Three thousand seventy. Three thousand ninety. Four thousand ninety..."

LINE 6 · 0:50
"Four thousand one hundred. The small numbers only ever made a hundred. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

One tall coin stack and a giant question mark; the wrong answer is the bait. Edit-drawn text: '1000+40+1000+30... = ?'

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a tall stack of plain gold coins under a spotlight against a deep-navy background, a few coins scattered at its base, the top third of the frame left dark and empty for title text, no numbers or text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
1000 + 40 + 1000 + 30… What Do YOU Get?

TITLE
The Sum Everyone Gets Wrong (Try It)

TITLE
90% Say 5000. The Real Answer Is…

CAPTION — first line is the question
Take 1000, add 40, add 1000, add 30, add 1000, add 20, add 1000, add 10. What's your total?
Comment it BEFORE the slow count. New riddle every day.

PINNED COMMENT
Your total — 5000 or 4100? Lock it in BEFORE the slow count. No editing.

Hashtags: #riddle #mathspuzzle #brainteaser #mentalmaths #puzzle #4100 #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Round two, harder: the same rhythm with 2000s and a 500 in the small numbers — the comments will demand a rematch after this one humbles them.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

4,100 — not 5,000, which is what most people announce.

A new riddle lands every day. Solve the next one before the reveal.

— END OF BOOK —
