THE ICE-WATER DATE

WHY DID ONLY HE DIE?

THE CASE IN ONE LINE
Same jug. Same ice. Five glasses for her, one for him — and only one funeral.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

On the hottest day of the year, a man and a woman sit down for a first date. The waiter brings a jug of water and a bucket of ice, and keeps both their glasses filled from the same jug and the same bucket.

Thirsty, the woman gulps down five glasses of ice water, one after another, in a few minutes. The man nurses a single glass, sipping it slowly for nearly an hour in the heat.

That evening, the man is dead — poisoned. The woman is completely unharmed. The water in the jug, tested later, is clean. Same water, same ice, same table.

THE QUESTION

Where was the poison?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

Where was the poison?

HINT 1

The water is cleared by the test — believe it. Look at what else was in the glass.

HINT 2

One of them drank fast; the other drank slowly. In that heat, what changes inside a glass given time?

HINT 3

Something in the glass was not liquid when it went in. Think about what it becomes as it sits in the sun.

YOUR MOVE

Where was the poison?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

The poison was frozen inside the ice cubes.

The woman drank each glass so fast that her ice barely had time to melt — almost no poison ever entered her water. Glass after glass, the cubes left nearly whole.

The man sipped slowly for nearly an hour. His ice melted completely into his drink, releasing the full dose, cube by cube, into the one glass he finished. Same jug, same bucket — the difference was time, and how much ice each of them let melt.

WHY IT WORKS

Every shared element is a controlled variable: same jug, same bucket, same table. The story varies exactly one thing — drinking speed — and the mechanism (melting) converts that one difference into opposite outcomes.

That is why the case is watertight: any theory involving the water fails the woman's five glasses; any theory involving the ice must explain why hers spared her. Melting explains both with a single move.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
The five glasses. They make the woman look like the one in danger, so the mind searches for what protected her — instead of asking what time did to his one glass.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team JUG: 'The water was poisoned and she built up tolerance — or he was allergic. Five glasses should have hit HER, so the poison story is wrong.'

CAMP B SAYS
Team ICE: 'The poison was frozen in the ice. She drank too fast for it to melt in; his melted completely into the one glass.'

PIN THIS COMMENT
Before the reveal: THE WATER, THE ICE — or something else entirely? Commit to one.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
The ice is the murder weapon and must always look innocent: clear, ordinary cubes, identical in every frame except for how much they have melted. Melt state is a story fact — check it in every clip.

LOCK
Her side of the table always shows speed (empty glasses, whole cubes); his side always shows time (one glass, melted away). The contrast must be readable in a single glance.

LOCK
Nothing about the death is shown or dramatised — the story stays a logic case, told through the table, the glasses and the light changing from noon to dusk.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-TERRACE: flat 2D storybook illustration, vertical 9:16, a sunlit café terrace table with a water jug and an ice bucket in the centre, two chairs opposite each other, strong heat light, no people close-up, no text.

REF 2
REF-GLASSES: flat 2D storybook illustration, vertical 9:16, top-down view of a café table: five empty glasses with nearly whole ice cubes on one side, one empty glass with no ice on the other, jug in the middle, no text.

REF 3
REF-BUCKET: the ice bucket alone on a plain warm background, flat 2D storybook style, metal bucket full of clear ice cubes, one cube catching the light, no text.

REF 4
REF-MELT: flat 2D storybook illustration, vertical 9:16, a single glass of water in profile with one ice cube half-melted and a faint dark swirl threading from it into the water, warm backlight, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A sun-blasted café terrace. A couple at a small table: she lifts a glass and drinks eagerly; he holds his glass loosely, barely sipping. A jug and an ice bucket between them. Heat shimmer.

NARRATION — generated inside this clip
"A first date. The hottest day of the year. She drinks five glasses of ice water in minutes. He sips one glass for an hour. That evening — he is dead."

Sound: Heat cicadas, café murmur.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
Close on the jug being tested in a plain lab-style shot: a strip dipped in clear water, nothing changes (any labels drawn in editing). The bucket of ice sits beside it, ordinary and innocent-looking.

NARRATION — generated inside this clip
"Poisoned. She is completely unharmed. The jug is tested — the water is perfectly clean. Same jug. Same ice bucket. Same table."

Sound: A dip, a drip, laboratory quiet.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
Her side of the table: a row of five empty glasses, each still holding nearly whole ice cubes. His side: one glass, empty, no ice left at all — just a wet ring on the table.

NARRATION — generated inside this clip
"Five glasses for her. One for him. If the poison was shared, she took five times his dose. So why is she alive?"

Sound: Five glasses set down, one after another.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the ice bucket between them, perfectly still, cubes glistening. The pause — the frame holds on the one prop nobody has suspected.

NARRATION — generated inside this clip
"Where was the poison? Lock your theory in the comments — before the reveal."

Sound: Silence, ice shifting in the bucket.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
Time-lapse in a single glass: the ice cube shrinks slowly in the heat, and as it melts, a faint dark swirl threads into the water (the swirl is a soft colour effect, no text). The other glasses' cubes barely change.

NARRATION — generated inside this clip
"Think about what time does inside a glass. Her ice never had time to melt. His sat in the heat for an hour... and melted completely."

Sound: A slow drip, drip, drip.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
Evening. Her terrace chair sits empty and safe; his glass stands alone in the dusk light. Somber, quiet, respectful — no drama, just the answer's weight.

NARRATION — generated inside this clip
"The poison was inside the ice. His one glass got the full dose; hers never melted in. Follow for a new riddle every day."

Sound: Evening crickets, a chair scraping softly.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'THE ICE-WATER DATE'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"A first date. The hottest day of the year. She drinks five glasses of ice water in minutes. He sips one glass for an hour. That evening — he is dead."

LINE 2 · 0:10
"Poisoned. She is completely unharmed. The jug is tested — the water is perfectly clean. Same jug. Same ice bucket. Same table."

LINE 3 · 0:20
"Five glasses for her. One for him. If the poison was shared, she took five times his dose. So why is she alive?"

LINE 4 · 0:30
"Where was the poison? Lock your theory in the comments — before the reveal."

LINE 5 · 0:40
"Think about what time does inside a glass. Her ice never had time to melt. His sat in the heat for an hour... and melted completely."

LINE 6 · 0:50
"The poison was inside the ice. His one glass got the full dose; hers never melted in. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The ice bucket in hard sunlight, one cube melting dark. Edit-drawn text: '5 GLASSES SAVED HER'. The most suspicious prop, centre frame.

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a metal ice bucket full of clear ice cubes in harsh sunlight on a café table, one cube half-melted with a faint dark swirl in the meltwater, heat shimmer in the air, the top third of the frame left empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
She Drank 5 Glasses. He Drank 1. Only He Died.

TITLE
The Ice-Water Date (A Poison Mystery)

TITLE
Same Water, Same Ice — Why Did Only He Die?

CAPTION — first line is the question
She drank five glasses of ice water; he sipped one. That evening he was dead — poisoned — and the water tested clean. Where was the poison? Comment BEFORE the reveal. New riddle every day.

PINNED COMMENT
Before the reveal: THE WATER, THE ICE — or something else entirely? Commit to one.

Hashtags: #riddle #mystery #logicpuzzle #brainteaser #detective #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: The mirror case: two climbers share one flask at altitude — the one who drank MORE gets sick. Run the same controlled-variable frame with the mechanism inverted.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

The poison was frozen inside the ice cubes.

A new riddle lands every day. Solve the next one before the reveal.
