THE FIVE PIRATES

HOW MUCH CAN THE CAPTAIN KEEP — AND LIVE?

THE CASE IN ONE LINE
Five pirates, one hundred gold coins, one vote — and a captain who keeps too much gets thrown to the sharks.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT

the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

Five pirates — ranked from the most senior, Pirate 1, down to the youngest, Pirate 5 — have plundered exactly 100 gold coins.

Their law is strict. The most senior pirate proposes how to split the coins. All five vote. If at least half vote yes, the split stands. If it fails, the proposer is thrown overboard — and the next pirate proposes.

Every pirate is perfectly rational. Each wants first to survive, then to take as much gold as possible — and each will vote no on any split that gives him no more than he would get if the proposer went overboard.

THE QUESTION

Pirate 1 proposes first. How much can he keep — and who else must he pay?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

Pirate 1 proposes first. How much can he keep — and who else must he pay?

HINT 1

Don't start with five pirates. Start with two, where the end is easy to see, and build backwards.

HINT 2

A pirate's vote is for sale at a precise price: one coin more than he would get if this proposal fails.

HINT 3

Pirate 1 does not need everyone's vote — only half the crew, counting his own. Buy the cheapest votes.

YOUR MOVE

Pirate 1 proposes first. How much can he keep – and who else must he pay?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

Pirate 1 keeps 98 coins and gives 1 coin each to Pirate 3 and Pirate 5. The vote passes 3 to 2.

Work backwards. With two pirates left, Pirate 4 keeps everything and Pirate 5 gets 0. With three left, Pirate 3 must buy Pirate 5's vote: 99 for himself, 1 for Pirate 5. With four left, Pirate 2's cheapest ally is Pirate 4 — who gets 0 in the three-pirate ending — so 99, 0, 1, 0 passes.

Now the five-pirate vote. If Pirate 1 falls, Pirate 2 proposes — and in that future, Pirates 3 and 5 get nothing. So one coin each buys both of them: 98 for Pirate 1, 0 for Pirate 2, 1 for Pirate 3, 0 for Pirate 4, 1 for Pirate 5. Pirates 1, 3 and 5 vote yes — a majority — and the captain keeps 98 and his life.

WHY IT WORKS

The engine is backward induction: solve the smallest game first, then let each bigger game be priced by the smaller one's outcome. Every pirate's loyalty costs exactly his 'if this fails' value, plus one coin.

Notice who gets nothing: Pirates 2 and 4, the ones who would prosper if the vote failed. A rational captain pays only the pirates his death would leave poor.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Splitting evenly, or paying the strongest pirates. Fairness buys votes the captain doesn't need, and Pirate 2 can never be bought cheaply — he is the one who profits most from a no vote.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team FAIR SPLIT: 'Twenty each keeps everyone calm. Greed gets captains killed — share it out and live.'

CAMP B SAYS
Team BACKWARDS: 'Price every vote from the endgame. 98 for the captain, one coin each for Pirates 3 and 5 — a majority for two coins.'

PIN THIS COMMENT
Write Pirate 1's full split — all five numbers — BEFORE the reveal. Closest split wins the comments.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
The pirates are ranked by build and never change order on screen: tall bearded captain, broad second, lean third, young fourth, slight fifth. Rank is identity — never swap their positions.

LOCK
Coins never show numbers in a generated frame. Every figure — 100, 98, the single coins — is counted aloud and drawn in editing.

LOCK
The sea stays calm and the deck dry: the threat is the vote, never a storm. No pirate is ever shown actually thrown overboard.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-DECK: flat 2D storybook illustration, vertical 9:16, a pirate ship deck at dusk with an open chest of gold coins in the centre and five empty stools ranked around it, sea behind, no people, no text.

REF 2
REF-CREW: flat 2D storybook illustration, vertical 9:16, five pirates in a ranked line on a plain dark background — tallest bearded captain first, then progressively younger and smaller, the last a slight cabin-boy build — full bodies, no text.

REF 3
REF-COINS: flat 2D storybook illustration, vertical 9:16, top-down view of gold coins arranged as one huge heap, one medium heap and two single coins on dark wood, lantern light, no numbers, no text.

REF 4
REF-LADDER: flat 2D storybook illustration, vertical 9:16, four stacked mini-panels of a ship's table with five, four, three then two pirate silhouettes around shrinking coin piles, top corner of each panel left empty, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A pirate ship's deck at dusk: five pirates around a spilled chest of gold coins, ranked by their seating from a tall captain to a small youngest. Slow push-in.

NARRATION — generated inside this clip
"Five pirates. One hundred gold coins. And a law: propose a split, or be thrown to the sharks."

Sound: Sea wind, gulls, a creaking hull.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
The captain stands and sweeps a hand over the coin pile, dividing it into uneven heaps with his dagger's point. The crew watches, calculating.

NARRATION — generated inside this clip
"Pirate One — the most senior — names the split. At least half the crew must vote yes, or he goes overboard and the next pirate proposes."

Sound: Coins sliding under a dagger's point.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
Quick portraits down the line: each pirate's eyes flick from the coins to the captain to the sea rail behind him. Nobody blinks.

NARRATION — generated inside this clip
"Every pirate wants gold. But every pirate wants to live first. And every pirate can calculate exactly what your death is worth to him."

Sound: Low tense strings, held breath.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the deck, the coin heaps untouched, perfectly still. Leave the lower third open for the pause.

NARRATION — generated inside this clip
"How much can Pirate One keep? Lock your split in the comments — before the reveal."

Sound: Silence, waves against the hull.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
The coin pile shrinks step by step in a clean visual ladder: five pirates, four, three, two — each smaller group around a smaller table, drawn as tidy flat panels (numbers edit-drawn).

NARRATION — generated inside this clip
"Work backwards. Two pirates left: the senior keeps everything. Three left: the proposer must buy one vote with a single coin."

Sound: Four soft ticks down the ladder.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
The final split under a lantern: one huge heap before the captain, two single coins rolled across the deck to the third and fifth pirates. Three hands rise in a yes vote.

NARRATION — generated inside this clip
"Ninety-eight for himself. One coin each for Pirates Three and Five — the two his death would leave with nothing. Follow for daily riddles."

Sound: Coins rolling, a crew's rough cheer.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'THE FIVE PIRATES'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Five pirates. One hundred gold coins. And a law: propose a split, or be thrown to the sharks."

LINE 2 · 0:10
"Pirate One — the most senior — names the split. At least half the crew must vote yes, or he goes overboard and the next pirate proposes."

LINE 3 · 0:20
"Every pirate wants gold. But every pirate wants to live first. And every pirate can calculate exactly what your death is worth to him."

LINE 4 · 0:30
"How much can Pirate One keep? Lock your split in the comments — before the reveal."

LINE 5 · 0:40
"Work backwards. Two pirates left: the senior keeps everything. Three left: the proposer must buy one vote with a single coin."

LINE 6 · 0:50
"Ninety-eight for himself. One coin each for Pirates Three and Five — the two his death would leave with nothing. Follow for daily riddles."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The captain before a mountain of coins, two single coins rolling away to two crewmates. Edit-drawn text: 'KEEP 98. STAY ALIVE.'

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a pirate captain standing before a huge heap of gold coins on a ship's deck at dusk, four crewmates watching from the shadows, two single coins on the deck boards, the top third of the frame left dark and empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
5 Pirates, 100 Coins — How Much Can the Captain Keep and Live?

TITLE
The Pirate Split That Buys a Majority for 2 Coins

TITLE
Vote Yes, or He Feeds the Sharks (Logic Puzzle)

CAPTION — first line is the question
Five pirates split 100 gold coins by vote — fail, and the proposer goes overboard. What split should Pirate 1 offer? Post all five numbers BEFORE the reveal. New riddle every day.

PINNED COMMENT
Write Pirate 1's full split — all five numbers — BEFORE the reveal. Closest split wins the comments.

Hashtags: #riddle #logicpuzzle #brainteaser #pirates #gameTheory #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Change one law — a tie now FAILS the vote — and let the comments reprice every pirate. The captain's split gets visibly worse, and the backwards ladder is the only way to see it.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

Pirate 1 keeps 98 coins and gives 1 coin each to Pirate 3 and Pirate 5. The vote passes 3 to 2.

A new riddle lands every day. Solve the next one before the reveal.
