CHERYL'S BIRTHDAY

TWO CONVERSATIONS NARROW TEN DATES TO ONE

THE CASE IN ONE LINE
Ten possible dates, two friends, three sentences — and the whole world argues about a birthday.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

Cheryl gives two friends a list of ten possible birthdays: May 15, May 16, May 19; June 17, June 18; July 14, July 16; August 14, August 15, August 17.

She whispers the month to Albert, and the day to Bernard. Neither hears the other's half. Albert speaks first: “I don't know her birthday — and I know that Bernard doesn't know either.”

Bernard replies: “At first I didn't know, but now I do.” And Albert answers: “Then now I know too.” Every statement is true, and between them they pin the date exactly.

THE QUESTION

What is Cheryl's birthday?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

What is Cheryl's birthday?

HINT 1

Start with Albert's certainty about Bernard. Bernard could only know at once if his day appeared once in the whole list. Which days are those — and what months must Albert be ruling out?

HINT 2

After Albert speaks, whole months fall off the table. Bernard's day, inside what remains, must now be unique.

HINT 3

Finally Albert knows too — so in his month, only one of Bernard's surviving days is still possible.

YOUR MOVE

What is Cheryl's birthday?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

July 16.

Bernard could have known immediately only with the 18th or 19th — the two days that appear once. Albert knows Bernard can't know, so Albert's month contains neither: not May (has the 19th) and not June (has the 18th). The month is July or August.

Bernard now knows the date, so his day appears only once among the July and August dates: it must be the 15th, 16th or 17th — the 14th appears in both months and would leave him guessing. Albert then knows too: August still holds two live dates (15 and 17), but July holds only one — the 16th. Cheryl's birthday is July 16.

WHY IT WORKS

Each statement is a filter, and the filters only work in order. Albert's first line deletes two months; Bernard's reply deletes a day; Albert's last line deletes the other month. Public honesty does the narrowing — nobody learns anything privately.

It is the wolves-and-sheep machine wearing a calendar: common knowledge, applied one public statement at a time, until one candidate is left standing.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Guessing the date from Bernard's line alone, or treating Albert's 'I know that Bernard doesn't know' as small talk. That first sentence is the strongest move in the puzzle — it deletes half the board.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team AUGUST 17: 'It has to be a late, rare-feeling date — August 17 sounds like the one both could land on.'

CAMP B SAYS
Team JULY 16: 'Follow the deletions: May and June die first, the 14th dies second, August dies last. July 16 stands alone.'

PIN THIS COMMENT
Your date — month and day — locked in BEFORE the reveal. No editing after.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
Every date on every card is drawn in editing — generated dates garble, and this riddle is nothing but its dates. Generated frames carry blank cards only.

LOCK
The month families keep fixed colours across all clips so the deletions read visually: same grid, same positions, families only dim or vanish.

LOCK
Albert always sits left, Bernard right, Cheryl between or apart — never swap them; the dialogue order is the logic.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-BOARD: flat 2D storybook illustration, vertical 9:16, a dark board holding ten completely blank cards in a grid, grouped in four colour families (two red-brown, two amber, two teal, four blue-grey), soft spotlight, no dates or text.

REF 2
REF-FRIENDS: flat 2D storybook illustration, vertical 9:16, two young men sitting back to back at a small table, one thoughtful with a hand to his chin, one alert holding a blank card, plain warm background, no text.

REF 3
REF-CHERYL: a young woman alone on a plain warm background, flat 2D storybook style, holding a closed notebook, calm knowing smile, full body, no text.

REF 4
REF-CARD: flat 2D storybook illustration, vertical 9:16, one blank card glowing softly in a pool of lime light on a dark board, all surrounding cards dim and empty, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A classroom-style board with ten blank date cards in a neat grid, grouped by colour into four month families (all dates drawn in editing; the cards stay blank). Slow push-in.

NARRATION — generated inside this clip
"Ten possible birthdays on a list. Cheryl whispers the month to Albert — and the day to Bernard. Neither hears the other's half."

Sound: A classroom hush, chalk dust quiet.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
Two friends at a table, back to back: one cups a hand to his ear, the other studies a single card he alone can see. A girl smiles between them, saying nothing.

NARRATION — generated inside this clip
"Albert speaks first: 'I don't know her birthday. And I know that Bernard doesn't know either.'"

Sound: Two whispers, a page turning.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
The board again: two whole colour-groups of cards dim and slide away, leaving two families lit. The room's murmur dies down.

NARRATION — generated inside this clip
"Bernard: 'At first I didn't know. But now I do.' Albert: 'Then now I know too.' Three sentences — and the date is trapped."

Sound: Cards sliding, a murmur fading.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the remaining cards, perfectly still. Leave the lower third open for the pause.

NARRATION — generated inside this clip
"What is Cheryl's birthday? Lock your date in the comments before the reveal."

Sound: Silence, one clock ticking.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
One more family of cards dims until a single card glows alone in the grid, lime light pooling around it.

NARRATION — generated inside this clip
"Bernard could only have known at once with the 18th or 19th — the days that appear once. Albert's certainty deletes May and June entirely."

Sound: A single soft chime.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
The two friends turn to face each other and nod at the same moment. The girl closes her notebook, satisfied. Warm light.

NARRATION — generated inside this clip
"July 16. The only date left standing after three honest sentences. Follow for a new riddle every day."

Sound: A relieved laugh from both friends.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'CHERYL'S BIRTHDAY'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Ten possible birthdays on a list. Cheryl whispers the month to Albert — and the day to Bernard. Neither hears the other's half."

LINE 2 · 0:10
"Albert speaks first: 'I don't know her birthday. And I know that Bernard doesn't know either.'"

LINE 3 · 0:20
"Bernard: 'At first I didn't know. But now I do.' Albert: 'Then now I know too.' Three sentences — and the date is trapped."

LINE 4 · 0:30
"What is Cheryl's birthday? Lock your date in the comments before the reveal."

LINE 5 · 0:40
"Bernard could only have known at once with the 18th or 19th — the days that appear once. Albert's certainty deletes May and June entirely."

LINE 6 · 0:50
"July 16. The only date left standing after three honest sentences. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The ten-card grid with whole families dimmed and one card glowing. Edit-drawn text: '10 DATES. 3 SENTENCES. 1 ANSWER.'

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a dark board with ten blank cards in a grid, most dimmed, one card glowing lime at the centre, two silhouetted friends studying it from below, the top third of the frame left dark and empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
Cheryl's Birthday — The Logic Puzzle That Broke the Internet

TITLE
10 Dates, 3 Sentences, 1 Birthday

TITLE
Albert Knows That Bernard Doesn't Know (Birthday Puzzle)

CAPTION — first line is the question
Cheryl tells Albert the month and Bernard the day. Three honest sentences later, both know the birthday. What is it? Lock your date BEFORE the reveal. New riddle every day.

PINNED COMMENT
Your date — month and day — locked in BEFORE the reveal. No editing after.

Hashtags: #riddle #logicpuzzle #brainteaser #cherylsbirthday #mathspuzzle #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Run the same three sentences live: give the comments Albert's first line only, and let them delete months in public before Bernard's line drops in Part 2.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

July 16.

A new riddle lands every day. Solve the next one before the reveal.
