TWO EGGS, A HUNDRED FLOORS

14 DROPS GUARANTEE THE ANSWER

THE CASE IN ONE LINE
Two fragile eggs, one hundred floors, one hidden breaking point — and a worst-case bill of exactly fourteen drops.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

THUMBNAIL
the cover frame that earns the tap

POSTING COPY
titles, caption, pinned comment

EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

You have two identical eggs and a 100-storey building. There is a highest floor from which an egg can be dropped and survive; above it, eggs break, below it, they land unharmed. An unbroken egg can be dropped again.

You must find that exact floor — guaranteed, whatever it turns out to be. Broken eggs are gone: drop carelessly and you can lose both eggs with floors still untested.

The question is not whether it can be done, but the price: in the worst case, what is the smallest number of drops a good method needs?

THE QUESTION

What method guarantees the floor in the fewest worst-case drops?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

What method guarantees the floor in the fewest worst-case drops?

HINT 1

With one egg you would have to climb floor by floor. The first egg's job is different: buy information in big jumps, and let the second egg pay the fine detail.

HINT 2

Equal jumps are wasteful — every drop you spend should shrink the work that remains. Let the gaps between jumps shrink by one each time.

HINT 3

Balance the two bills: the jumps made plus the floors left to check must never exceed the same total. That balancing number is the answer.

YOUR MOVE

What method guarantees the floor in the fewest worst-case drops?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

14 drops. Jump the first egg up shrinking gaps — 14, 27, 39, 50… — then walk the gap with the second egg.

Drop the first egg from floors 14, 27, 39, 50, 60, 69, 77, 84, 90, 95 and 99 — each jump one floor shorter than the last. When it breaks, test the floors in the gap below, one by one, with the second egg.

Why it always fits in 14: if the first egg breaks at its k-th jump, you have spent k drops and the gap beneath holds at most 14 − k floors to check — because the gaps shrink exactly as fast as the drops accumulate. Worst case, every road totals 14. And no method can promise less: 13 drops can cover at most 13 + 12 + … + 1 = 91 floors of guarantee, short of 100.

WHY IT WORKS

The shrinking gaps are the whole idea: a fixed budget shared between two phases, arranged so the phases trade off perfectly. Early breaks cost few jumps and many checks; late breaks cost many jumps and few checks — the sum never moves.

It is the balance-scale lesson in a stairwell: design the test so every outcome leaves a problem your remaining budget can finish.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Jumping in tens — ten jumps of ten floors, then up to nine checks: worst case 19 drops. Or binary search, which is a one-egg coffin: the first break leaves up to 49 floors and one egg to check them with.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team TENS: 'Jump in tens — ten jumps, then walk the gap. Simple, round, done in at most 19. Good enough.'

CAMP B SAYS
Team SHRINKING GAPS: 'Balance the budget: gaps of 14, 13, 12… jumps plus checks never exceed 14. Nineteen is overpaying.'

PIN THIS COMMENT
Your worst-case number — lock it in BEFORE the reveal. Lowest correct number wins.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
Floor numbers are always drawn in editing. The generated tower's windows are blank and unnumbered in every frame — a readable floor number fails the clip.

LOCK
Exactly two eggs exist in this video. A broken egg is shown once, plainly, and never reappears whole.

LOCK
The tower, dusk light and window grid never change; only which windows glow changes, so the shrinking gaps read as pure pattern.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-TOWER: flat 2D storybook illustration, vertical 9:16, a very tall tower at dusk with a grid of many identical windows, deep navy sky, one small figure at the base, no floor numbers or text.

REF 2
REF-EGGS: flat 2D storybook illustration, vertical 9:16, two pale eggs resting in cupped hands against a plain dark background, soft spotlight, no text.

REF 3
REF-WINDOWS: flat 2D storybook illustration, vertical 9:16, a section of tower facade with a few windows glowing at uneven, widening intervals, all windows blank and unnumbered, dusk palette, no text.

REF 4
REF-LANDING: flat 2D storybook illustration, vertical 9:16, one whole egg resting safely on a small cushion on a windowsill high on a tower, its twin visible below, calm dusk light, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A tall tower at dusk, one hundred windows stacked into the sky. At its base, a small figure holds two pale eggs like jewels. Slow push up the facade.

NARRATION — generated inside this clip
"Two eggs. A hundred floors. Somewhere in that tower is a floor where eggs start to break — and you must find it exactly."

Sound: Evening wind around a high tower.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
Close on the two eggs in cupped hands as a window high above opens. One egg is lifted; the other waits. The drop is not shown yet.

NARRATION — generated inside this clip
"An unbroken egg can be dropped again. A broken egg is gone. Lose both with floors untested, and the search dies with them."

Sound: A held breath, fabric rustling.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
A hurried montage of equal jumps — an egg falling past evenly spaced lit windows, a crack, then a long uncertain stare up the tower. The wasteful method.

NARRATION — generated inside this clip
"Find the highest safe floor — guaranteed — and pay the smallest possible worst-case price in drops."

Sound: A fall, a crack, a wince.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the tower facade, windows dark, perfectly still. Leave the lower third open for the pause.

NARRATION — generated inside this clip
"What's your method? Equal jumps? Floor by floor? Lock it in the comments."

Sound: Silence, wind only.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
The facade lights in a shrinking rhythm: a window at 14 glows, then 27, then 39, then 50 — each gap visibly shorter (numbers edit-drawn).

NARRATION — generated inside this clip
"Jump the first egg in shrinking strides: fourteen, twenty-seven, thirty-nine, fifty… each gap one floor smaller than the last."

Sound: Four soft tones, gaps tightening.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
At one window the egg lands unbroken on a cushion of light while its twin waits below; the floors above and below sort into certainty. Calm closing frame.

NARRATION — generated inside this clip
"When it breaks, the second egg walks the gap. Jumps plus checks never pass fourteen. Follow for a new riddle every day."

Sound: One soft landing — relief.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'TWO EGGS, A HUNDRED FLOORS'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Two eggs. A hundred floors. Somewhere in that tower is a floor where eggs start to break — and you must find it exactly."

LINE 2 · 0:10
"An unbroken egg can be dropped again. A broken egg is gone. Lose both with floors untested, and the search dies with them."

LINE 3 · 0:20
"Find the highest safe floor — guaranteed — and pay the smallest possible worst-case price in drops."

LINE 4 · 0:30
"What's your method? Equal jumps? Floor by floor? Lock it in the comments."

LINE 5 · 0:40
"Jump the first egg in shrinking strides: fourteen, twenty-seven, thirty-nine, fifty… each gap one floor smaller than the last."

LINE 6 · 0:50
"When it breaks, the second egg walks the gap. Jumps plus checks never pass fourteen. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

The tower at dusk, one egg falling past glowing windows at shrinking gaps. Edit-drawn text: '2 EGGS. 100 FLOORS. 14 DROPS.'

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a very tall tower at dusk with rows of blank windows, one pale egg falling beside the facade, a few windows glowing at shrinking intervals, deep navy palette, the top third left dark and empty for title text, no numbers or text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
2 Eggs, 100 Floors — Find the Breaking Floor in 14 Drops

TITLE
The Egg Drop Puzzle (Worst Case Guaranteed)

TITLE
Why Equal Jumps Waste 5 Drops

CAPTION — first line is the question
Two eggs, 100 floors, one exact breaking point to find — guaranteed. What's your worst-case drop count? Comment BEFORE the reveal. New riddle every day.

PINNED COMMENT
Your worst-case number — lock it in BEFORE the reveal. Lowest correct number wins.

Hashtags: #riddle #logicpuzzle #brainteaser #eggdrop #mathspuzzle #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Raise the tower: 1,000 floors, still two eggs. The budget formula grows by roots, not hundreds — let the comments guess the new worst case before Part 2 derives it.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

14 drops. Jump the first egg up shrinking gaps – 14, 27, 39, 50… – then walk the gap with the second egg.

A new riddle lands every day. Solve the next one before the reveal.

– END OF BOOK –
