OTT TITANS · PRODUCTION PACK

100 WOLVES, ONE SHEEP

DOES THE SHEEP SURVIVE?

14 CLIPS · 10 SECONDS EACH	9 REFERENCE PROMPTS	NARRATION INSIDE EVERY PROMPT

WHAT YOU ARE GETTING

The complete production pack for this riddle: full analysis with the logic checked end to end, the unique [WOLVES-2D] character and style lock, every reference prompt in code order, Part 1 (riddle) and Part 2 (solution) scripts, standalone video prompts with the narration inside each one, the Agent master prompt, thumbnail, posting copy and the edit checklist — all in one file.

THE COMPLETE PRODUCTION PACK

Does the Sheep Survive? — Complete production pack: full riddle analysis, unique character + style lock, every reference prompt, Part 1 + Part 2 scripts, standalone 10-second video prompts with narration inside, Agent master prompt, thumbnail, posting copy, edit checklist

What this pack is: everything needed to produce this riddle as two vertical videos — Part 1 (the riddle, answer withheld) and Part 2 (the solution) — in one self-contained file. Every prompt is inline and standalone: a stranger with only this file can generate every image and every clip. No other file is needed.

Format: Part 1 = 8 clips × 10 seconds (about 80 seconds, the riddle). Part 2 = 6 clips × 10 seconds (about 60 seconds, the solution, posted the next day). Vertical 9:16 throughout. The answer is revealed ONLY in Part 2 — never in Part 1, never on the thumbnail, never in the caption.

The riddle (exact wording used in the videos): One hundred perfectly logical wolves surround a single sheep. Any wolf may eat the sheep — but the instant a wolf eats it, that wolf turns into a sheep itself, and can then be eaten by the others. Every wolf would like a meal, but every wolf values its own life more: no wolf will eat if doing so would get it eaten. All the wolves reason perfectly, and each knows the others reason perfectly too. Does the sheep get eaten?

The answer (creator only — Part 2 material, never before): No. The sheep survives, and no wolf dares to move. The full proof is in Section 1.

INSIDE THIS PACK

CONTENTS

1. THE RIDDLE, ANALYSED 3
2. THE STORY IN 30 SECONDS + THE JOB IN 10 SIMPLE STEPS 5
3. EVERY SMALL NOTE (the details viewers catch on a rewatch) 6
4. STYLE + CHARACTER + MOVEMENT LOCK — [WOLVES-2D] 7
5. ALL CODES IN THIS PACK (the master code index — every code an agent needs) 9
6. THE SCRIPTS (original narration — these exact words go inside the prompts in Sections 8 and 9) 11
7. PART A — REFERENCE IMAGE PROMPTS (generate these 9 first, in code order) 11
8. PART B — VIDEO PROMPTS, PART 1 (8 clips × 10 seconds, narration inside every prompt) 14
9. PART C — VIDEO PROMPTS, PART 2 (6 clips × 10 seconds, narration inside every prompt) 19
10. PART D — AGENT MASTER PROMPT (paste ONCE, the Agent builds all 14 clips) 23
11. THUMBNAIL (Part 1 — the riddle's question only, never the answer) 26
12. POSTING COPY 27
13. EDIT, CHECK, EXPORT (the checklist) 27
14. OWNERSHIP 28

SECTION 1

THE RIDDLE, ANALYSED

01

The beat map

Part 1 — the riddle video (about 80 seconds). A moonlit forest clearing at night. One small white sheep stands in the centre. Around it, in a perfect ring, stand one hundred slate-blue wolves, all facing inward, all perfectly still.

- **The ring (0:00–0:10).** Wide high shot: the full ring, the sheep tiny and calm in the middle, the moon above. Nobody moves. The scale of the trap is the hook — a hundred against one.
- **The deadly rule (0:10–0:20).** The rule is stated, and shown once inside a clearly framed WHAT-IF vignette (a rounded, lighter panel floating above the ring — a thought, not an event): a wolf eats a sheep, glows, and turns into a sheep. In the real ring, nothing has happened.
- **The stakes (0:20–0:30).** A slow pan across wolf faces in profile — amber eyes narrowing one after another. Every wolf wants the meal. Every wolf wants to live more.
- **The perfect logicians (0:30–0:40).** The eyes keep calculating down the row. Each wolf can predict the others exactly, because all of them reason identically and know it.
- **The freeze (0:40–0:50).** Back to the wide ring. Total stillness. The narration names what the viewer can see: a hundred hungry wolves, one calm sheep, and not one step taken.
- **Think like a wolf (0:50–1:00).** Close on WOLF PRIME, the wolf nearest the camera. The question turns personal: if YOU bite first, what happens to YOU next?
- **The calm sheep (1:00–1:10).** Close on the sheep — unbothered, blinking slowly. The narration promises the shape of the solution without giving it: there is a chain of logic, and it starts very, very small.
- **The question + the pause (1:10–1:20).** The frozen wide ring holds. Two seconds of silence, then the question is asked outright and the viewer is sent to the comments. Part 2 is promised for tomorrow — and one honest teaser: the first step is just one wolf.

Part 2 — the solution video (about 60 seconds).

- **Recap (0:00–0:10).** The ring again, the rule restated in one breath, and the promise: here is the answer.
- **One wolf (0:10–0:20).** LADDER PANEL 1: a single wolf and a sheep. It eats, turns into a sheep — and there is nobody left to eat it. One wolf = the sheep is EATEN.
- **Two wolves (0:20–0:30).** LADDER PANEL 2: if one eats, it becomes a sheep facing one wolf — and one wolf always eats. So with two, neither dares. Two wolves = SAFE.
- **Three and four (0:30–0:40).** LADDER PANELS 3 and 4, one after the other. Three: eat, and you face two wolves — the safe case — so three EATS. Four: eat, and you face three — the eating case — so four HOLDS. The pattern is named.
- **The climb to 100 (0:40–0:50).** The count flips up the chain — odd eats, even holds — editor-drawn numbers climbing 5, 6, 7 … 99, 100 over the wide ring. One hundred is even. A pause. The first wolf's own arithmetic is spoken: bite, and ninety-nine wolves are waiting — and ninety-nine is an eating number.
- **The walk-out (0:50–1:00).** Dawn. The ring parts like a gate and the sheep walks calmly out of the clearing and away. The wolves watch it go. Nobody moves.

The answer — and why it works

Work backwards from the smallest possible version of the problem. Call a count an EATING count if a wolf facing that many wolves (with a sheep in front of them) will eat, and a SAFE count if no wolf dares.

- **1 wolf — EATS.** A lone wolf eats the sheep and turns into a sheep. There is no wolf left to eat it. Eating is safe, so it eats.

- **2 wolves — SAFE.** If one wolf eats, it turns into a sheep facing exactly 1 wolf. The 1-wolf case is an eating case, so the eater will be eaten in turn. Every wolf can see this, so neither eats.
- **3 wolves — EATS.** If one wolf eats, it turns into a sheep facing exactly 2 wolves. The 2-wolf case is safe — neither of those wolves will touch it. So eating is safe, and a wolf eats.
- **4 wolves — SAFE.** If one eats, it faces 3 wolves — an eating case — and will be eaten. So nobody eats.
- **The pattern alternates, and it never breaks.** Each count inherits its answer from the count one below it: if n − 1 is an eating count, then n is safe (eat and you will be eaten); if n − 1 is safe, then n eats (eat and nobody will touch you). Odd counts eat. Even counts hold.
- **100 is even — SAFE.** The first wolf runs the whole chain: eat, and it becomes a sheep facing 99 wolves. 99 is odd — an eating count — so it would be eaten. It values its life more than the meal, so it does not bite. Every wolf in the ring can run the identical chain, and every wolf knows every other wolf can run it. Nobody moves. The sheep survives.

This method is backward induction: solve the trivial case, then let every bigger case inherit the answer from the one below it. The alternation — odd eats, even waits — is the entire machine.

The trap most people fall into

Three traps, in order of popularity:

1. **Simulating the hundred.** The brain tries to picture a hundred individual wolves deciding at once, and drowns in fur. The riddle is never solved at full size — it is solved at size one, then climbed.
2. **"Hunger beats logic."** Viewers assume a starving wolf just lunges. The riddle forbids this in its setup: every wolf is a perfect logician that values its life strictly more than the meal, and knows the others are the same. Change that one preference and the riddle collapses — which is exactly why the preference is stated out loud in Clip 3.
3. **"The chain would run forever."** Viewers sense a loop (a wolf eats, is eaten, that eater is eaten…) and assume nobody can reason about it. In fact the chain always terminates: each eating reduces the wolf count by exactly one, and the bottom of the chain — one wolf, nobody left — is known with certainty. The whole proof stands on that floor.

The logic, checked end to end (no gaps, no second hidden answer)

- **The sub-game is exact.** When a wolf eats, the old sheep is gone and the eater is the new sheep. What remains is a smaller, identical problem: n − 1 wolves around 1 sheep. Nothing else changes — same preferences, same perfect reasoning. So the n-wolf answer is fully determined by the (n − 1)-wolf answer. That is the induction step, and it holds for every n from 2 to 100.
- **The base case is certain.** With 1 wolf there is no risk at all: no other wolf exists. Eating strictly wins. There is no alternate reading — "maybe it stays hungry" contradicts the stated preference for a meal when life is not at risk.
- **No ties, no coin flips.** At every count the choice is strict: eat and certainly die, or hold and certainly live (safe counts) — or eat and certainly live (eating counts). Because life is valued strictly above the meal, no wolf is ever indifferent, so no wolf ever "gambles." A gamble would be a second hidden answer; the strict preference removes it.
- **Simultaneous lunges do not exist in this riddle.** Only one wolf can eat the sheep — the sheep can be eaten once. The decision every wolf faces is "be the first to bite, yes or no," evaluated in turn. If none bites, time simply passes. There is no rule that forces a bite, and no bonus for biting second — a second bite is only possible after a first one, and the first one never comes.
- **Coalitions cannot beat it.** Wolves cannot promise each other safety: after a wolf turns into a sheep, the remaining wolves' incentives are exactly the sub-game's incentives, and no promise changes them. A wolf asked to sacrifice itself refuses — life over meal, again.

- **The turned sheep is out of the game.** Once a wolf becomes a sheep it no longer reasons or chooses as a wolf — the only decision-makers left are the remaining wolves. Appeals to "the sheep used to be smart" change nothing.
- **Common knowledge does the heavy lifting — and it is given.** The chain to 100 only works because every wolf knows the count, knows the rule, knows every other wolf reasons perfectly, knows that they know, and so on. The riddle states all of this in its setup ("all the wolves reason perfectly and know the others do too"), and Clip 4 says it on screen. Remove common knowledge and longer chains get shaky — with it, the induction is airtight to any depth, including 100.
- **Parity is the whole answer.** Odd → eaten, even → safe, with no exceptions between 1 and 100, because the induction step has no exceptions. 100 is even. The sheep survives. There is no second consistent answer.

Camera — exactly how it moves

- No handheld movement, no 3D camera, no spins, no split screens. Hard cuts between three shot sizes only: (1) wide ring, (2) faces row, (3) single close-up (sheep, or WOLF PRIME).
- The only camera moves are a SLOW push-in on the wide ring and a SLOW pan across the faces row. Everything else is stillness — stillness is the subject of this riddle.
- The ladder panels in Part 2 are flat, framed plates that cut in full-screen, one at a time. They are never windows floating over the ring.
- Every graphic — all numbers, the EATEN / SAFE stamps, the chain arrows, the question and comment banners — is a FLAT EDITOR OVERLAY (see the OV codes in Section 5). None of it is generated inside a clip.

Sound — what the videos carry

- One narrator only (the voice lock in Section 4). Calm, steady, suspenseful storytelling pace; short natural pauses between lines; two deliberate silences: 2 seconds before the question in Clip 8, and about 1.5 seconds before "One hundred is even" lands inside Clip 13's beat in the edit (the line itself is unbroken — the pause is created by holding the preceding visual).
- NO dialogue, NO character voices, NO wolf speech. The wolves and the sheep never speak and never move their lips.
- Ambient sound is minimal and specified per clip: night crickets and wind in the clearing, a low tense string note under the faces, birds only in the final dawn clip. No named music track is used or credited; a very soft underscore sits under the voice throughout.

On-screen text — the complete list

- LADDER NUMBERS: "1", "2", "3", "4" (and climbing "5 … 99 … 100" in Clip 13) — bold white numerals, editor-drawn only (OV-NUM).
- LADDER STAMPS: "EATEN" in coral, "SAFE" in lime — stamped onto each ladder panel in the edit, never generated (OV-STAMP).
- QUESTION BANNER: torn-paper banner, "DOES THE SHEEP SURVIVE?" (OV-QUESTION) — the riddle's question only, used at the end of Clip 8 and on Part 2's recap card if needed.
- COMMENT BANNER: torn-paper banner, "EATEN OR SAFE? — TELL ME IN THE COMMENTS" (OV-COMMENT), low on frame in Clip 8.
- CHAIN ARROWS: a simple editor-drawn arrow chain "100 → 99" beside the ring in Clip 13 (OV-CHAIN).
- END CHIP (Part 2 only): "STILL STANDING." — small chip on the final dawn frame (OV-END). Part 2 has ended by then; the answer is already revealed, so the chip spoils nothing. It is never used in Part 1.
- NOT present: no subtitles burned over faces, no narrator name card, no generated text of any kind inside any frame.

SECTION 2

THE STORY IN 30 SECONDS + THE JOB IN 10 SIMPLE STEPS

02

The story in 30 seconds: A hundred perfect-logician wolves ring one sheep. Eat it, and you become a sheep the others can eat — and everyone wants to live more than they want to eat. Shrinking the problem cracks it: 1 wolf eats safely, 2 hold, 3 eats, 4 holds — odd eats, even holds. 100 is even, so the first wolf knows biting means facing 99, an eating number. Nobody moves. The sheep walks away.

The job in 10 simple steps:

1. Generate the 9 reference images from Section 7, in code order. Check each one against its CHECK line before moving on. REF-LADDER is the most important — count the wolves in every panel with your own eyes.
2. Save every image with its exact B01_ file name from the code index (Section 5).
3. Make Part 1: for each clip F01–F08 in Section 8, upload the references named at the top of the prompt, paste the whole prompt block, generate.
4. Listen to every clip once. The narration words must match Section 6 exactly, in the same voice. If one word is wrong or the voice changes, regenerate ONLY that clip.
5. Join F01 → F08. Add the editor overlays listed in Section 13 (numbers, banners). Export Part 1. Do not post Part 2's material anywhere near it.
6. Post Part 1 with the posting copy in Section 12. Pin the EATEN-or-SAFE comment.
7. The next day, make Part 2 the same way from Section 9 (F09–F14), using REF-LADDER as the first frame source for the ladder clips.
8. In the edit, stamp each ladder panel (OV-STAMP) only AFTER its narration beat lands — never before.
9. Join F09 → F14, add overlays, run every check in Section 13, export Part 2.
10. Post Part 2 as the reply to Part 1, and pin a comment linking it under Part 1.

One-file rule: everything above lives in this file. If a prompt seems to point somewhere else, the something else is in a section of this same file — the code index in Section 5 tells you where.

SECTION 3

EVERY SMALL NOTE (THE DETAILS VIEWERS CATCH ON A REWATCH)

03

1. **The sheep's calm IS the clue.** The sheep never trembles, never scans for an exit, never looks afraid. Its calm feels wrong in Part 1 and reads as knowledge in Part 2: the sheep is safe, and the picture knew it all along. Any frame of a frightened sheep contradicts the ending — regenerate it.
2. **The wolves are ONE machine, not a hundred characters.** Every wolf is identical — same slate-blue fur, same build, same amber eyes, no scars, no collars, no "leader." The moment one wolf looks special, viewers start inventing a leader-based answer and the logic answer feels cheated.
3. **WOLF PRIME is a camera label, not a character.** "Prime" is only the wolf at the front-centre of the ring, nearest the camera, used for the close-up in F06. He has no marking of any kind. If he can be told apart from the wolf beside him, the reference has failed.
4. **The ring is a ring, not a crowd.** In wide shots the wolves form one clean circle, one wolf deep, all facing the centre, evenly spaced. Two rings, a pile-up, or a gap in the circle (before the final clip) all read as mistakes. The only gap ever allowed is the gate the sheep walks through in F14.

5. **Nobody counts to a hundred.** The wide ring must read instantly as "about a hundred" — an impression, never a countable set. Generation will never produce exactly 100 wolves, and it does not need to: the number 100 lives in the narration and in editor overlays, never in a viewer's count of the frame. Never invite counting (no numbered wolves, no rows).

6. **The turned sheep keeps ONE amber eye.** When a wolf becomes a sheep (only inside the WHAT-IF vignette and the ladder panels), it becomes a plain white sheep with Pip's body shape but NO green tuft — and it keeps one amber wolf eye. That single eye is how the viewer tracks "this sheep used to be the eater." Pip herself has two black eyes and the green tuft. Never mix the two designs.

7. **Pip's tuft is leaf-green, always.** One small green tuft of wool on top of Pip's head, in every frame, wide shot or close-up. It is her identity marker at distance, where her face is too small to read.

8. **The transformation has three beats, always in this order:** a soft pale glow outlines the eating wolf → its shape settles into the sheep shape in the SAME spot (it never walks, swaps, or teleports) → the amber eye remains as the glow fades. Any other transformation style (flash, morphing mess, cutaway trick) breaks the rule's clarity.

9. **The moon never moves.** The moon sits top-left of the clearing in every night shot, same size, same pale colour. It is the series' clock: while the moon is up, nothing has happened yet. Dawn — light warming from the right edge — is allowed in F14 only.

10. **The clearing never changes.** Same ring of dark pine silhouettes around the clearing's edge, same flat ground, same centre stone-free patch where Pip stands. Only the light changes, once, at dawn in F14.

11. **Faces-row wolves are in profile, one eye each.** PL-4's row shows wolves in strict profile — pointed ear, long snout, ONE visible amber eye per wolf. A turned head or a second visible eye breaks the row's rhythm, which is timed to the narration ("each one can predict…").

12. **The ladder panels share one stage.** Panels 1–4 are the same clearing, the same angle, the same moon — only the wolf count changes (1, 2, 3, 4 wolves around 1 sheep, in a neat arc facing the sheep). If the stage drifts between panels, the viewer stops comparing counts and starts comparing backgrounds, and the pattern beat dies.

13. **Stamps land late, on purpose.** In F10–F12 the EATEN / SAFE stamp appears in the edit only after the panel's logic has been spoken. A stamp visible from the panel's first frame answers the panel before the narration can ask it.

14. **The pause is a real pause.** Clip 8 holds the frozen ring for a full 2 seconds of silence before the question. Do not fill it with music swells, zooms, or a premature banner. The stillness is the riddle's whole claim: nothing moves, and the viewer must sit in that.

15. **Part 2's teaser is honest.** Part 1 ends by saying "the first step is just one wolf." That is a method hint, not the answer — it tells the viewer HOW to think, never WHAT the chain concludes. Do not strengthen it ("and one wolf is safe" would be false anyway — one wolf eats).

SECTION 4

STYLE + CHARACTER + MOVEMENT LOCK — [WOLVES-2D]

04

Style (paste into every prompt): 2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. Moonlit deep-navy palette: deep navy night sky and ground, dark pine silhouettes, pale moonlight, slate-blue wolves, amber eyes, one small white sheep. Vertical 9:16. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing.

PIP THE SHEEP (the sheep — never redesign): a small, round-bodied white cartoon sheep, short legs, a round white head with two simple black dot eyes, a calm small smile, rosy-free plain cheeks, and ONE leaf-green tuft

of wool on the very top of her head. Her body is about one third the height of a standing wolf beside her. She is calm in every single frame — her expression never changes to fear, surprise, or triumph. She never speaks and never moves her lips.

THE HUNDRED (the ring — one character, played by a hundred bodies): one hundred identical cartoon wolves forming one perfect ring around Pip, all facing inward toward her. Each wolf: slate-blue flat fur, a lighter slate belly, pointed upright ears, a long snout, a bushy tail resting on the ground, amber eyes. Every wolf sits or stands in the same alert posture. No wolf has any individual feature — no scar, no collar, no size difference, no different fur tone. They blink rarely and together-ish, never in chorus.

WOLF PRIME (close-up stand-in — a position, not a person): the wolf at the front-centre of the ring, drawn closest to the camera in close-ups. Identical to every other wolf in the ring in every detail — slate-blue fur, pointed ears, long snout, amber eyes. His only distinction is where he stands. In close-up he is seen front three-quarter, both amber eyes visible, gaze fixed on Pip (off-screen centre). He never growls, bares teeth, or lunges.

THE TURNED SHEEP (what-if and ladder panels only — never in the real ring): a plain white cartoon sheep with exactly Pip's body shape and size, short legs, round head — but NO green tuft, and ONE amber wolf eye (its left eye); the right eye is a black dot. Its expression is mildly dazed, never frightened. It appears only inside the WHAT-IF vignette (F02) and the ladder panels (F10–F12, and the turned figure inside them).

THE MOON (set dressing + series clock): one pale round moon, top-left of the frame in every wide night shot, soft flat glow, no face, no crater detail. It never changes size or position during the night. It is absent only in the dawn shot (F14).

PLACES (full prompts in Section 7):

- **PL-1 CLEARING (empty):** the moonlit forest clearing alone — flat deep-navy ground, a ring of dark pine silhouettes at the edge, the pale moon top-left, a clear empty centre. No animals.
- **PL-2 RING WIDE (the master wide plate):** PL-1 with the full ring of identical slate-blue wolves facing inward and Pip small and calm in the exact centre. This plate is the first frame or ingredient for F01, F05, F07, F08, F09, F13.
- **PL-3 DAWN CLEARING (empty):** the same clearing at dawn — sky warming pink-orange from the right edge, the moon gone, the pines edged with warm light, the centre empty. Used only in F14.
- **PL-4 FACES ROW:** a tight horizontal row of wolf heads in strict profile against deep navy — pointed ears, long snouts, one amber eye each — evenly spaced, like a frieze. Used in F03 and F04.

MOVEMENT LOCK — how everything in this story moves (applies to every clip):

- **The ring does not move.** No wolf steps, paces, circles, or lunges in the real (present-day) ring — ever. Permitted motion in the ring: slow blinks, one ear twitch, eyes narrowing one wolf at a time down a row. Stillness is the visual thesis of the riddle.
- **Pip barely moves.** Slow breathing, slow blinks, one occasional ear flick. In F14 only, she walks — slowly, calmly, in a straight line out of the ring — the single walk in either video.
- **The hypothetical is always framed.** Any eating or transformation happens ONLY inside (a) the WHAT-IF vignette in F02 — a rounded-corner, slightly lighter panel floating above the ring — or (b) the full-screen ladder panels in Part 2. A lunge drawn in the real ring means the clip has failed; regenerate it.
- **The transformation is three beats** (glow outline → shape settles into sheep shape in the same spot → glow fades, amber eye remains), slow and readable, about 2 seconds. Never instant, never violent, no sound burst.
- **Camera:** hard cuts between the three shot sizes; a slow push-in on the wide ring; a slow pan across the faces row. No zoom punches, no shake, no spin, no handheld feel, no drone moves.
- **Faces:** nobody speaks on screen; no lip movement anywhere. Expression changes are single beats — a blink, eyes narrowing, a held gaze — never continuous acting.

THE THREE RULES THAT PROTECT THE RIDDLE

1. **STILLNESS RULE (above all rules):** in the real ring, in the present day of the story, NO wolf eats, lunges, or steps toward Pip — in any Part 1 clip, and in Part 2 outside the ladder panels. Eating and transformation exist only inside the WHAT-IF vignette (F02) and the ladder panels (F10–F12). One lunge in the real ring tells the viewer "the sheep gets eaten" before the logic can speak — regenerate any clip that breaks this.

2. **COUNT RULE:** generated frames never carry the logic's numbers. The crowd in the ring is an uncountable impression (never promise or check "exactly 100" in a frame), and every numeral — 100, 99, the ladder counts, the climbing chain — is drawn in the editor as an overlay (OV-NUM). The ONE exception is the ladder panels REF-LADDER / F10–F12, where the wolf count (1, 2, 3, 4) IS the lesson: generate them, then count the wolves in each panel with your own eyes before the panel is used. Wrong count = regenerate the panel. A mislabelled ladder panel teaches the wrong pattern and quietly breaks the whole proof.

3. **TRANSFORMATION RULE:** a wolf may turn into a sheep only by the three-beat transformation, only in the framed hypothetical places named in Rule 1, and the result is always THE TURNED SHEEP design — plain white, no tuft, one amber eye. Pip herself never transforms, is never eaten, and is never replaced; there is exactly one green tuft in every frame of both videos (Pip's), and exactly one turned sheep per hypothetical scene.

Voice (locked — the same voice as the benchmark packs): one warm, confident adult male narrator, American accent, age about 30–35, calm suspenseful storytelling tone, medium pace — the exact same voice, tone and speed in all 14 clips. The narration is generated INSIDE each clip (Section 8 and 9 prompts each carry their line). Listen-back rule: after generating each clip, check the spoken words against Section 6 word for word; if one word is wrong or the voice has changed, regenerate ONLY that clip. If a clip fails twice, mute it and lay that one line in the editor with a matched voice recording — never let a wrong word reach export.

File names: B01_REF00_Cast · B01_REF_Sheep · B01_REF_Wolf · B01_REF_Turned · B01_REF_Ladder · B01_PL1_Clearing · B01_PL2_Ring · B01_PL3_Dawn · B01_PL4_Faces · B01_F01–F14 · B01_THUMB · B01_Final_Part1 · B01_Final_Part2.

SECTION 5

ALL CODES IN THIS PACK (THE MASTER CODE INDEX — EVERY CODE AN AGENT NEEDS)

05

Reference image codes (generate FIRST, in this order)

Code	What it is	Save as	Used in clips	Check before moving on
REF-00	Cast sheet: Pip + one wolf + the Turned Sheep in a row	B01_REF00_Cast	All clips	Pip has the green tuft + black eyes; the wolf is plain slate-blue; the Turned Sheep has NO tuft and ONE amber eye
REF-SHEEP	Pip alone, full body	B01_REF_Sheep	F01, F02, F05, F07, F08, F09, F13, F14	Green tuft present, calm smile, round white body
REF-WOLF	One wolf alone, sitting in profile	B01_REF_Wolf	F03, F04, F06, all ladder work	Slate-blue, amber eye, NO individual markings of any kind
REF-TURNED	The Turned Sheep alone	B01_REF_Turned	F02, F10, F11, F12	No tuft; ONE amber eye (left), one black dot eye (right)

Code	What it is	Save as	Used in clips	Check before moving on
REF-LADDER	Four stacked panels: 1, 2, 3, 4 wolves around a sheep	B01_REF_Ladder	F09, F10, F11, F12	COUNT the wolves in every panel by eye: 1 / 2 / 3 / 4, top corners left empty for stamps
PL-1	Clearing, empty, moonlit	B01_PL1_Clearing	F01, F02, F06, F07	Moon top-left; no animals; centre empty
PL-2	Ring wide: full wolf ring + Pip centre	B01_PL2_Ring	F01, F05, F07, F08, F09, F13	One clean ring, one wolf deep, no gaps, Pip centred with tuft
PL-3	Clearing at dawn, empty	B01_PL3_Dawn	F14	Warm light from the right; no moon; same pines as PL-1
PL-4	Faces row: wolf heads in profile	B01_PL4_Faces	F03, F04	Strict profile, ONE amber eye per wolf, even spacing

Overlay codes (ALL made in the EDITOR — never generated inside a clip)

Code	What it is	Used in	Notes
OV-NUM	Bold white numerals with black outline: "100", "99", ladder "1" "2" "3" "4", climbing "5…99…100"	F01, F10–F13	Every number in both videos comes from this one editor style; never let a generated numeral stand
OV-STAMP	Verdict stamps: "EATEN" (coral) / "SAFE" (lime), bold block letters, slight tilt	F10, F11, F12	Stamped only AFTER the panel's narration beat lands; one stamp per panel
OV-QUESTION	Torn-paper banner: "DOES THE SHEEP SURVIVE?" — dark-navy block letters on cream torn paper	F08	The question only; never an answer word
OV-COMMENT	Torn-paper banner: "EATEN OR SAFE? — TELL ME IN THE COMMENTS"	F08	Same torn-paper system as OV-QUESTION; sits low on frame
OV-CHAIN	Arrow chain "100 → 99" beside the ring, editor-drawn	F13	Points from the ring (100) to the imagined next state (99); keep it small and clean
OV-END	End chip: "STILL STANDING." — small lime chip	F14	Part 2 only, final frame only, after the reveal
OV-VIGNETTE	The rounded WHAT-IF frame itself (soft pale border, slightly lighter inside)	F02	The frame is editor furniture; the scene inside it is generated
CAPTIONS	Burned-in series captions, low on frame	All clips	Never over a face, the sheep, or a ladder count

Clip codes

Part 1 — the riddle: F01 The Ring · F02 The Deadly Rule (what-if vignette) · F03 The Stakes (faces row) · F04 Perfect Logicians · F05 The Freeze · F06 Think Like a Wolf (Prime close-up) · F07 The Calm Sheep · F08 The Question + The Pause.

Part 2 — the solution: F09 Recap · F10 Ladder 1 — One Wolf Eats · F11 Ladder 2 — Two Wolves Hold · F12 Ladder 3 + 4 — The Pattern · F13 The Climb to 100 · F14 Dawn — The Walk-Out.

SECTION 6

THE SCRIPTS (ORIGINAL NARRATION — THESE EXACT WORDS GO INSIDE THE PROMPTS IN SECTIONS 8 AND 9)

06

Part 1 — the riddle video (answer withheld)

1. F01 — "One sheep stands alone in a moonlit clearing. Around it, in a perfect ring, stand one hundred wolves."
2. F02 — "Any wolf can pounce and eat the sheep. But here is the catch. The moment a wolf eats… it turns into a sheep itself."
3. F03 — "And that new sheep can be eaten by the wolves that remain. Every wolf wants the meal. But every wolf wants to live even more."
4. F04 — "And every wolf is a perfect logician. Each one can predict exactly what the others will do — because they all reason in exactly the same way."
5. F05 — "So the ring stands frozen. A hundred hungry wolves. One calm sheep. And not one of them has moved."
6. F06 — "Now think like a wolf in that ring. If you bite first… what happens to you next?"
7. F07 — "Look at the sheep. Perfectly calm. There is a chain of logic that decides its fate — and that chain starts very, very small."
8. F08 — (2 seconds of silence first) "So — does the sheep get eaten? Or does it walk away untouched? Lock your answer in the comments: eaten, or safe? The solution drops tomorrow, in Part Two — and its first step is just one wolf."

Part 2 — the solution video

9. F09 — "Yesterday's riddle. One hundred perfect wolves. One sheep. And one deadly rule: eat, and you become the sheep. Here is the answer."
10. F10 — "Start with just one wolf. It eats the sheep and turns into a sheep — and there is nobody left to eat it. With one wolf, the sheep is eaten."
11. F11 — "Now try two wolves. If one eats, it becomes a sheep facing one hungry wolf — and we just saw what one wolf does. So with two, neither dares. The sheep is safe."
12. F12 — "Three wolves change everything. Eat, and you face two wolves — and two wolves never strike. So three eats. Four? Eat, and you face three. So four holds. See the pattern?" (Hold about 1 second of quiet after "See the pattern?" before Part 2 continues — the hold is made in the edit by extending this clip's final frame.)
13. F13 — "It flips at every step. Odd numbers eat. Even numbers hold. One hundred is even. So the first wolf knows: bite… and ninety-nine wolves are waiting. And ninety-nine is an eating number."
14. F14 — "So nobody moves. The ring opens… and the sheep walks away untouched. One hundred wolves, out-thought by their own perfect logic. Follow for tomorrow's riddle."

Timing notes: each line is written for one 10-second clip at the locked voice's medium pace. If a generated line runs short, hold the visual — never stretch the voice, never add words. F08's line starts only after 2 full seconds of silence; that silence is written into its prompt and must survive the edit. No Part 1 line states or implies the verdict — check any regenerated Part 1 clip against that rule before accepting it.

SECTION 7

PART A — REFERENCE IMAGE PROMPTS (GENERATE THESE 9 FIRST, IN CODE ORDER)

07

How to use every prompt in this pack: paste the WHOLE block, exactly as written. Every block opens with the style order and closes with its own negative block — that repetition is deliberate; it is what stops the generator drifting into photos or 3D. Generate REF-00 first and check it; upload it as a reference together with every later prompt that names it.

REF-00 · THE CAST SHEET (generate and check FIRST) → save as B01_REF00_Cast

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Character reference sheet on a plain deep-navy background, vertical 9:16, three figures standing in a row, full body, all facing the camera:
1) PIP THE SHEEP (left, the smallest figure): a small round-bodied white cartoon sheep, short legs, round white head, two simple black dot eyes, a calm small smile, and ONE leaf-green tuft of wool on the very top of her head. Her body is about one third the height of the wolf beside her.
2) ONE WOLF (middle, tall): a slate-blue cartoon wolf standing alert on all fours, lighter slate belly, pointed upright ears, long snout, bushy tail resting on the ground, amber eyes. Completely plain — no markings, no collar, no scar, nothing individual.
3) THE TURNED SHEEP (right, same size as Pip): a plain white cartoon sheep with Pip's exact body shape, short legs, round head — but NO green tuft, and ONE amber wolf eye on its left side; its right eye is a simple black dot. Mildly dazed expression.
The height difference between the sheep figures and the wolf must be impossible to miss.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture, fur texture detail, extra animals, extra people, tuft on the wrong sheep, amber eyes on Pip, black eyes on the wolf, collar, scar, text, letters, numbers, watermark.
CHECK: Pip = tuft + black eyes. Turned Sheep = no tuft + one amber eye. Wolf = plain slate-blue. If any feature has crossed over, regenerate this sheet — every later image copies it.
```

REF-SHEEP · PIP ALONE (single-character reference) → save as B01_REF_Sheep

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon face. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Single character reference, full body, standing, facing the camera, on a plain deep-navy background, vertical 9:16: PIP THE SHEEP — a small, round-bodied white cartoon sheep, short legs, a round white head with two simple black dot eyes, a calm small smile, plain cheeks, a tiny tail, and ONE leaf-green tuft of wool on the very top of her head. Her expression is perfectly calm and unafraid. She is the only figure in the image.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, fur or wool texture detail, frightened expression, open mouth, amber eyes, missing green tuft, extra tufts, extra animals, text, letters, numbers, watermark.
CHECK: the green tuft is present and single; the eyes are black dots; she looks calm, not cute-frightened.
```

REF-WOLF · ONE WOLF ALONE (single-character reference) → save as B01_REF_Wolf

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Single character reference, full body, SITTING in strict side profile facing LEFT, on a plain deep-navy background, vertical 9:16: ONE WOLF — a slate-blue cartoon wolf with a lighter slate belly, pointed upright ears, a long snout closed and calm, a bushy tail curled resting on the ground, and ONE visible amber eye, intelligent and still. This wolf is deliberately identical to every other wolf in the story: completely plain, with NO individual marking of any kind.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, fur texture detail, scar, collar, torn ear, different fur colour, bared teeth, growling, open mouth, second visible eye, extra animals, text, letters, numbers, watermark.
CHECK: profile is strict, exactly one amber eye shows, and there is nothing on this wolf that could tell it apart from another wolf.
```

REF-TURNED · THE TURNED SHEEP ALONE (single-character reference) → save as B01_REF_Turned

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon face. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Single character reference, full body, standing, facing the camera, on a plain deep-navy background, vertical 9:16: THE TURNED SHEEP — a plain white cartoon sheep with the exact same round body shape, size, short legs and round head as a normal sheep character in this series — but with NO tuft of wool on its head, and with ONE amber wolf eye on its LEFT side and one simple black dot eye on its right side. Mildly dazed expression, mouth a small flat line. It is the only figure in the image.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, wool texture detail, green tuft (there must be NO tuft), two amber eyes, two black eyes, frightened expression, extra animals, text, letters, numbers, watermark.
CHECK: no tuft, one amber eye (left), one black eye (right). This figure appears only in hypothetical scenes — never use it as Pip.
```

REF-LADDER · THE LADDER PLATE (the proof plate — the most checked reference in the pack) → save as B01_REF_Ladder

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. One vertical image 9:16 holding FOUR stacked horizontal mini-panels of the same moonlit clearing scene, separated by thin pale lines, deep-navy palette, the same camera angle in every panel, the TOP CORNER of each panel left empty and dark (a stamp is added in editing):
PANEL 1 (top): a moonlit clearing with EXACTLY ONE slate-blue cartoon wolf (pointed ears, long snout, amber eyes, completely plain) standing facing EXACTLY ONE small white cartoon sheep with a green tuft on her head (Pip).
PANEL 2: the same clearing with EXACTLY TWO identical slate-blue wolves standing side by side in an arc, both facing the same one small white sheep with a green tuft.
PANEL 3: the same clearing with EXACTLY THREE identical slate-blue wolves in an arc, all facing the same one small white sheep with a green tuft.
PANEL 4 (bottom): the same clearing with EXACTLY FOUR identical slate-blue wolves in an arc, all facing the same one small white sheep with a green tuft.
In every panel: exactly ONE sheep, the wolves calm and still, nobody touching the sheep, the pale moon top-left.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, wrong wolf count in any panel, extra sheep, missing sheep, a wolf eating or touching the sheep, numbers, letters, text, words, stamps, watermark, different background between panels.
CHECK — DO NOT SKIP: count the wolves in each panel out loud: 1, 2, 3, 4. Count the sheep: one per panel. One wrong count = regenerate the whole plate. This plate teaches the pattern; a wrong panel teaches a wrong proof.
```

PL-1 · CLEARING, EMPTY (background only) → save as B01_PL1_Clearing

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon background, flat solid colours, thick bold black outlines, simple shapes. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Vertical image 9:16. SCENE: an EMPTY moonlit forest clearing at night, no animals, no people. Flat deep-navy ground with a slightly lighter worn patch in the exact centre. A ring of tall dark pine tree silhouettes stands around the edge of the clearing. One pale round moon with a soft flat glow sits at the TOP-LEFT of a deep-navy sky. Quiet, still, and empty — the centre must stay completely clear.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, animals, sheep, wolves, people, houses, fences, paths, moon in the wrong position, text, letters, numbers, watermark.
```

PL-2 · RING WIDE (the master wide plate) → save as B01_PL2_Ring

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Vertical image 9:16, wide high three-quarter view.
REFERENCE IMAGES TO USE: (1) Upload the clearing reference PL-1 — use that exact clearing, same pines, same moon at top-left, same ground. (2) Upload the cast sheet REF-00 — copy Pip and the wolf design EXACTLY from it; do not redesign anyone.
SCENE: In the moonlit clearing, ONE perfect ring of identical slate-blue cartoon wolves stands around the centre, one wolf deep, evenly spaced, every wolf facing INWARD toward the centre, calm and perfectly still — the ring reads as a large crowd of about a hundred wolves, an impression of many, all identical: slate-blue fur, lighter slate bellies, pointed ears, long snouts, amber eyes, no individual markings. In the EXACT CENTRE stands PIP — one small round white sheep, short legs, black dot eyes, calm small smile, ONE leaf-green tuft on her head — small against the ring, completely unafraid. The moon stays top-left. No gap anywhere in the ring.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, two rings of wolves, a gap in the ring, wolves facing outward, a wolf touching or lunging at the sheep, a frightened sheep, missing green tuft, a special-looking wolf, text, letters, numbers, watermark.
CHECK: one ring, no gaps, Pip centred with tuft visible, every wolf facing in, nobody moving toward her.
```

PL-3 · DAWN CLEARING, EMPTY (background only) → save as B01_PL3_Dawn

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon background, flat solid colours, thick bold black outlines, simple shapes. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Vertical image 9:16.
REFERENCE IMAGE TO USE: upload the clearing reference PL-1 — copy that exact clearing, same pine silhouettes in the same positions, same ground shape.
SCENE: the SAME forest clearing, now at DAWN, empty, no animals. The sky warms from deep navy at the top to soft pink-orange at the RIGHT edge where the sun is rising off-frame. The moon is gone. Warm light edges the pine silhouettes on their right sides. The centre patch of ground holds a faint warm light. Calm and quiet.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, moon visible, night sky, animals, people, sun disc in the frame, text, letters, numbers, watermark.
CHECK: same clearing as PL-1, clearly dawn, clearly empty — this plate is used once, under the final walk-out.
```

PL-4 · FACES ROW (expression plate) → save as B01_PL4_Faces

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines, simple shapes. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI. Vertical image 9:16.
REFERENCE IMAGE TO USE: upload the wolf reference REF-WOLF — copy that exact wolf head design; do not redesign it.
SCENE: a tight horizontal ROW of identical slate-blue cartoon wolf heads in STRICT SIDE PROFILE, all facing LEFT, evenly spaced across the middle band of a plain deep-navy frame, like a frieze: pointed upright ears, long closed snouts, calm intelligent expressions, and exactly ONE visible amber eye on each head. The heads are large in the frame. Above and below the row is plain empty deep navy. Every head is identical to the others.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, fur texture detail, heads facing the camera, two eyes visible on a head, uneven spacing, different-sized heads, bared teeth, growling, open mouths, collars, scars, text, letters, numbers, watermark.
CHECK: strict profile on every head, one amber eye each, spacing even — this row is panshot in F03 and F04 and any wobble becomes obvious.
```

SECTION 8

PART B — VIDEO PROMPTS, PART 1 (8 CLIPS × 10 SECONDS, NARRATION INSIDE EVERY PROMPT)

08

How to use: in Google Flow, for each clip upload the reference images named at the top of its prompt, paste the whole block, generate. The narration is inside the prompt — Flow creates the voice with the clip. Listen-check every clip against Section 6; regenerate only the failures. Editor overlays (Section 5, OV codes) are NEVER part of a prompt — the spaces named in each timeline are left empty on purpose.

VOICE LOCK (inside every prompt below): one warm, confident adult male narrator, American accent, age about 30–35, calm suspenseful storytelling tone, medium pace — the exact same voice in all 14 clips.

F-01 · THE RING (0:00–0:10) — Narration line 1

Upload first: B01_PL2_Ring + B01_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact set and the uploaded CAST image for the exact characters — do not redesign anything. CHARACTERS: PIP THE SHEEP — one small round-bodied white cartoon sheep in the exact centre, short legs, black dot eyes, calm small smile, ONE leaf-green tuft of wool on top of her head, about one third the height of a wolf. THE WOLVES — a perfect ring of identical slate-blue cartoon wolves around her, lighter slate bellies, pointed upright ears, long snouts, amber eyes, every wolf facing inward, no individual markings on any wolf.
ACTION TIMELINE: 0–4s: the wide high shot of the moonlit clearing holds almost still; the pale moon glows top-left; only slow blinking across the ring. 4–8s: the camera pushes in VERY slowly toward the ring; one wolf's ear twitches once; Pip breathes slowly, perfectly calm. 8–10s: the push-in stops; everything freezes; leave the lower third of the frame calm and uncluttered (captions are added in editing).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "One sheep stands alone in a moonlit clearing. Around it, in a perfect ring, stand one hundred wolves." Under the narration, very soft low suspense music plus night crickets and a faint wind only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: any wolf stepping, lunging or opening its mouth, a frightened sheep, the ring breaking or gaining a gap, realistic fur, 3D look, extra animals, text, letters, numbers, watermark, camera shake, fast motion.
```

F-02 · THE DEADLY RULE (0:10–0:20) — Narration line 2 · THE WHAT-IF VIGNETTE

Upload first: B01_PL2_Ring + B01_REF00_Cast + B01_REF_Turned

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact real-world set and the uploaded CAST and TURNED SHEEP images for the exact characters. CHARACTERS: PIP — small round white sheep, black dot eyes, calm smile, ONE leaf-green tuft, centre of the ring, never in danger in the real scene. THE WOLVES — identical slate-blue wolves, pointed ears, long snouts, amber eyes, facing inward, no individual markings. THE TURNED SHEEP (inside the vignette only) — Pip's exact body shape but NO tuft and ONE amber wolf eye (left) with one black dot eye (right).
ACTION TIMELINE: 0–3s: the wide ring holds still, moonlit, calm. 3–8s: a rounded-corner WHAT-IF vignette fades in above the ring, slightly lighter inside, like a thought panel: inside it, on a small clearing patch, one wolf takes ONE step, eats a plain sheep in a single gentle gulp (no violence, no mess — the sheep simply is gone), and then the THREE-BEAT TRANSFORMATION plays — a soft pale glow outlines the wolf, its shape settles into a plain white sheep shape in the same spot — the TURNED SHEEP, no tuft, one amber eye — and the glow fades. 8–10s: the vignette holds on the turned sheep for a beat, then begins to fade; the real ring below never changed, and Pip is still standing calmly in its centre.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Any wolf can pounce and eat the sheep. But here is the catch. The moment a wolf eats… it turns
```

into a sheep itself." Under the narration, very soft low suspense music plus night crickets and faint wind only; at the transformation, one soft shimmering tone. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: eating or transformation happening in the REAL ring outside the vignette, Pip being eaten or replaced, a turned sheep WITH a green tuft, a turned sheep with two amber eyes, violence, blood, teeth close-ups, realistic fur, 3D look, extra animals, text, letters, numbers, watermark, camera shake.
STILLNESS RULE CHECK: if any wolf in the real ring moves toward Pip, this clip has failed — regenerate it. The bite exists only inside the vignette.

F-03 · THE STAKES (0:20–0:30) — Narration line 3 · FACES ROW

Upload first: B01_PL4_Faces + B01_REF_Wolf

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded FACES ROW image as the exact set and the uploaded WOLF image for the exact wolf design. CHARACTERS: a row of identical slate-blue cartoon wolf heads in strict side profile, all facing LEFT — pointed upright ears, long closed snouts, calm intelligent expressions, exactly ONE visible amber eye per head, every head identical, no collars, no scars, no markings.
ACTION TIMELINE: 0–4s: the camera pans SLOWLY to the right along the row of profile heads; the heads themselves do not move; one amber eye blinks slowly. 4–7s: the pan continues; a second head's eyes NARROW slightly, calculating, then hold. 7–10s: the pan slows to a stop on the last head in the row; its gaze stays fixed and patient; complete stillness to the end. Leave the lower third free of detail (captions are added in editing).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "And that new sheep can be eaten by the wolves that remain. Every wolf wants the meal. But every wolf wants to live even more." Under the narration, very soft low suspense music plus one low, tense string note and faint night wind only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: heads turning toward camera, a second eye appearing on any head, growling, bared teeth, open mouths, any head differing from the others, realistic fur, 3D look, text, letters, numbers, watermark, camera shake, fast pan.
```

F-04 · PERFECT LOGICIANS (0:30–0:40) — Narration line 4 · FACES ROW, THE CALCULATION

Upload first: B01_PL4_Faces + B01_REF_Wolf

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded FACES ROW image as the exact set and the uploaded WOLF image for the exact wolf design. CHARACTERS: a row of identical slate-blue cartoon wolf heads in strict side profile, all facing LEFT — pointed upright ears, long closed snouts, exactly ONE visible amber eye per head, every head identical, no individual features of any kind.
ACTION TIMELINE: 0–5s: the camera pans SLOWLY to the left along the row (the reverse direction of the previous clip). As the pan passes each head, that head's amber eye narrows a fraction — one head at a time, in sequence, like a thought travelling down the row. 5–8s: the pan stops; the last head's eye narrows and holds; a tiny ear twitch on one head. 8–10s: total stillness; every eye in the row is now narrowed, watching, calculating. Nothing else moves.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "And every wolf is a perfect logician. Each one can predict exactly what the others will do — because they all reason in exactly the same way." Under the narration, very soft low suspense music plus a faint ticking, like a clock, and night wind only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: heads turning, eyes glowing or changing colour, thought bubbles, symbols or diagrams appearing, any head differing from the others, realistic fur, 3D look, text, letters, numbers, watermark, camera shake, fast pan.
```

F-05 · THE FREEZE (0:40–0:50) — Narration line 5 · WIDE RING HOLD

Upload first: B01_PL2_Ring + B01_REF_Sheep

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous locked shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact set and the uploaded SHEEP image for the exact sheep. CHARACTERS: PIP — one small round white sheep in the exact centre, black dot eyes, calm small smile, ONE leaf-green tuft on her head, perfectly unafraid. THE WOLVES — one perfect ring of identical slate-blue wolves around her, pointed ears, long snouts, amber eyes, facing inward, no individual markings, no gap in the ring.
ACTION TIMELINE: 0–10s: almost NOTHING happens for the full ten seconds, and that is the point of the clip. The camera is locked. The wolves do not step, sway, or lean. Pip breathes very slowly, blinks once at about 4 seconds, and blinks once more near 9 seconds. One single wolf ear twitches at about 6 seconds. The moon does not move. This stillness must feel heavy and deliberate — a hundred predators, frozen by their own thinking.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "So the ring stands frozen. A hundred hungry wolves. One calm sheep. And not one of them has moved." Under the narration, very soft low suspense music thinning almost to silence, plus the faintest night crickets only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is near-silence and ambient sound only.
AVOID: any wolf stepping, lunging, pacing or swaying, camera movement, zoom, a frightened or moving sheep, realistic fur, 3D look, extra animals, text, letters, numbers, watermark. If Flow insists on adding motion, reject the take — stillness is this clip's content.
STILLNESS RULE CHECK: any step toward Pip in this clip = regenerate.
```

F-06 · THINK LIKE A WOLF (0:50–1:00) — Narration line 6 · WOLF PRIME CLOSE-UP

Upload first: B01_REF_Wolf + B01_PL1_Clearing + B01_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded WOLF image for the exact wolf design and the uploaded CLEARING image for the exact moonlit ground and pines behind him. CHARACTER: WOLF PRIME — one slate-blue cartoon wolf, lighter slate belly, pointed upright ears, long snout, amber eyes — seen in CLOSE-UP, front three-quarter, large in the lower two thirds of the frame, sitting upright and alert. He is completely identical to every other wolf in this story: no scar, no collar, no marking, nothing individual. Out of focus at the frame's edges, the dark shapes of neighbouring wolves suggest the ring continuing. The moon glows top-left.
ACTION TIMELINE: 0–4s: the close-up holds; Prime stares steadily toward the centre of the ring (off-screen); he blinks once, slowly. 4–7s: his eyes narrow a fraction — the calculation beat — and his ears tilt very slightly forward; his head does not move. 7–10s: he holds the narrowed, thinking gaze without blinking; the frame is completely still to the end, leaving the viewer inside his decision.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Now think like a wolf in that ring. If you bite first… what happens to you next?" Under the narration, very soft low suspense music plus one low tense string note and faint night wind only. The wolf on screen never speaks and never moves his lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: growling, bared teeth, snarling, the wolf lunging or snapping, any marking that makes this wolf special, drool, glowing eyes, realistic fur, 3D look, other animals in focus, text, letters, numbers, watermark, camera shake.
```

F-07 · THE CALM SHEEP (1:00–1:10) — Narration line 7 · PIP CLOSE-UP

Upload first: B01_REF_Sheep + B01_PL2_Ring

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon face. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded SHEEP image for the exact sheep and the uploaded RING WIDE image for the exact ring around her. CHARACTERS: PIP — one small round-bodied white cartoon sheep, short legs, round white head, two black dot eyes, calm small smile, ONE leaf-green tuft of wool on top of her head. Around her, soft and slightly out of focus, the ring of identical slate-blue wolves faces inward — pointed ears, long snouts, amber eyes — still and distant enough that Pip stays the clear subject.
ACTION TIMELINE: 0–4s: a medium close-up on Pip in the centre of the clearing; she breathes slowly and blinks once, utterly calm; the wolf ring behind her does not move. 4–7s: Pip flicks one ear once, then settles; her expression never changes — no fear, no surprise. 7–10s: the camera pushes in VERY slowly a small amount and stops, holding on Pip's calm face inside the circle of watchers.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Look at the sheep. Perfectly calm. There is a chain of logic that decides its fate — and that chain starts very, very small." Under the narration, very soft low suspense music softening slightly, plus night crickets and faint wind only. Pip never speaks and never moves her lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: any fear, trembling or tears on the sheep, the sheep looking for an exit or backing away, a wolf stepping closer, amber eyes on Pip, a missing or doubled green tuft, realistic wool, 3D look, text, letters, numbers, watermark, camera shake.
ANSWER-HOLD CHECK: this clip hints at a method (a chain that starts small) and must never hint at the verdict. Pip is calm, but nothing in the frame may show escape, dawn, or safety graphics — regenerate any take that adds them.
```

F-08 · THE QUESTION + THE PAUSE (1:10–1:20) — Narration line 8 (after 2 s of silence) · END OF PART 1

Upload first: B01_PL2_Ring + B01_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous locked shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact set and the uploaded CAST image for the exact characters. CHARACTERS: PIP — small round white sheep in the exact centre, black dot eyes, calm smile, ONE leaf-green tuft. THE WOLVES — one perfect ring of identical slate-blue wolves, pointed ears, long snouts, amber eyes, facing inward, no individual markings, no gap in the ring. The pale moon is top-left.
ACTION TIMELINE: 0–5s: the wide ring shot is FROZEN — no camera move, no wolf movement, only the faintest blinking; leave clean space across the upper-middle of the frame (a question banner is added in editing) and keep the lower third calm (a comments banner is added in editing). 5–8s: absolutely nothing changes; the freeze deepens. 8–10s: one slow blink from Pip in the centre, and the shot ends still frozen.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series.
IMPORTANT: the first 2 seconds of this clip are COMPLETE SILENCE — no voice at all. Then the narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "So — does the sheep get eaten? Or does it walk away untouched? Lock your answer in the comments: eaten, or safe? The solution drops tomorrow, in Part Two — and its first step is just one wolf."
Under the narration, very soft low suspense music returning gently after the silence, plus faint night crickets only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: narration starting before 2 seconds, any banner, text, letters or numbers generated in the frame, any wolf moving, any gap opening in the ring, a frightened sheep, realistic fur, 3D look, extra animals, watermark, camera movement.
```

SECTION 9

09

PART C — VIDEO PROMPTS, PART 2 (6 CLIPS × 10 SECONDS, NARRATION INSIDE EVERY PROMPT)

How to use: same as Part 1 — upload the references named at the top of each prompt, paste the whole block, generate, listen-check against Section 6, regenerate only failures. The ladder clips (F10–F12) use panels cropped from B01_REF_Ladder as their first frames / ingredients: crop PANEL 1 for F10, PANEL 2 for F11, PANELS 3 and 4 for the two halves of F12. Count the wolves in every generated ladder take before accepting it (COUNT RULE).

VOICE LOCK (inside every prompt below): one warm, confident adult male narrator, American accent, age about 30–35, calm suspenseful storytelling tone, medium pace — the exact same voice in all 14 clips.

F-09 · RECAP (0:00–0:10) — Narration line 9 · PART 2 OPENS

Upload first: B01_PL2_Ring + B01_REF_Ladder

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact opening set and the uploaded LADDER image only as a style reference for the closing beat. CHARACTERS: PIP — small round white sheep in the exact centre, black dot eyes, calm smile, ONE leaf-green tuft. THE WOLVES — one perfect ring of identical slate-blue wolves, pointed ears, long snouts, amber eyes, facing inward, no individual markings.
ACTION TIMELINE: 0–5s: the wide moonlit ring, exactly as Part 1 left it — frozen, moon top-left; a very slow push-in begins. 5–8s: the push-in continues gently; the ring stays frozen; the mood shifts from question to answer — the light feels a fraction steadier, nothing else changes. 8–10s: the shot holds; leave the top corner of the frame clean and dark (a small ladder number may be added in editing later — generate nothing there).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Yesterday's riddle. One hundred perfect wolves. One sheep. And one deadly rule: eat, and you become the sheep. Here is the answer." Under the narration, very soft low suspense music plus night crickets and faint wind only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: any wolf moving or eating, any ladder panel appearing inside this clip, any text or numbers generated in the frame, a frightened sheep, realistic fur, 3D look, extra animals, watermark, camera shake.
```

F-10 · LADDER 1 — ONE WOLF EATS (0:10–0:20) — Narration line 10

Upload first: B01_REF_Ladder (PANEL 1 crop) + B01_REF_Turned + B01_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded LADDER PANEL 1 crop as the exact set and first frame, and the uploaded TURNED SHEEP and CAST images for the exact characters. SCENE: a small moonlit clearing panel holding EXACTLY ONE slate-blue cartoon wolf — pointed upright ears, long snout, amber eyes, completely plain, no markings — facing EXACTLY ONE small white cartoon sheep with a green tuft on her head (Pip's design). There are NO other animals anywhere in the frame. Leave the top corner of the frame empty and dark (a number and a stamp are added in editing).
ACTION TIMELINE: 0–3s: the lone wolf and the sheep face each other, still; the wolf blinks once. 3–6s: the wolf takes one step and eats the sheep in a single gentle gulp (no violence, no mess — the sheep simply is gone). 6–9s: the THREE-BEAT TRANSFORMATION — a soft pale glow outlines the wolf, its shape settles into a plain white sheep shape in the same spot — the TURNED SHEEP: no tuft, ONE amber eye (left), one black dot eye (right) — and the glow fades. 9–10s: the turned sheep stands alone in the empty clearing, calm; nothing hunts it; hold.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Start with just one wolf. It eats the sheep and turns into a sheep — and there is nobody left to eat it. With one wolf, the sheep is eaten." Under the narration, very soft low suspense music plus night crickets only; one soft shimmering tone at the transformation. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: a second wolf anywhere in the frame, a second sheep, the turned sheep WITH a green tuft, the turned sheep with two amber eyes, violence, blood, teeth close-ups, any number, letter, text or stamp generated in the frame, realistic fur, 3D look, watermark, camera shake.
COUNT CHECK: exactly ONE wolf at the start, exactly ONE sheep at the start, exactly ONE turned sheep at the end. Anything else = regenerate.
```

F-11 · LADDER 2 — TWO WOLVES HOLD (0:20–0:30) — Narration line 11

Upload first: B01_REF_Ladder (PANEL 2 crop) + B01_REF00_Cast

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded LADDER PANEL 2 crop as the exact set and first frame, and the uploaded CAST image for the exact characters. SCENE: a small moonlit clearing panel holding EXACTLY TWO identical slate-blue cartoon wolves — pointed upright ears, long snouts, amber eyes, completely plain, no markings — standing in an arc facing EXACTLY ONE small white cartoon sheep with a green tuft on her head (Pip's design). There are NO other animals anywhere in the frame. Leave the top corner of the frame empty and dark (a number and a stamp are added in editing).
ACTION TIMELINE: 0–4s: the two wolves and the sheep hold still, facing each other; both wolves blink slowly. 4–7s: the LEFT wolf leans forward a fraction — the beginning of a decision — then stops itself and settles back; its eyes narrow, calculating, and it does NOT step. The right wolf does not move at all. 7–10s: both wolves settle into stillness, gazes fixed on the sheep, nobody advancing; the sheep stands calm between them and holds to the end.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Now try two wolves. If one eats, it becomes a sheep facing one hungry wolf — and we just saw what one wolf does. So with two, neither dares. The sheep is safe." Under the narration, very soft low suspense music plus night crickets only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: either wolf actually stepping forward, pouncing or eating, any transformation, a third wolf entering, a second sheep, the sheep looking frightened, any number, letter, text or stamp generated in the frame, realistic fur, 3D look, watermark, camera shake.
COUNT CHECK: exactly TWO wolves and ONE sheep for the whole clip, and nobody eats. A bite in this clip reverses the lesson — regenerate.

F-12 · LADDER 3 + 4 — THE PATTERN (0:30–0:40) — Narration line 12 · TWO PANELS, ONE CLIP

Upload first: B01_REF_Ladder (PANEL 3 crop + PANEL 4 crop) + B01_REF_Turned + B01_REF00_Cast

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. Vertical 9:16, lasting 10 seconds, TWO matched shots with ONE clean hard cut at 5 seconds.
Use the uploaded LADDER PANEL crops as the exact sets and the uploaded TURNED SHEEP and CAST images for the exact characters. WOLVES in both shots: identical slate-blue cartoon wolves, pointed upright ears, long snouts, amber eyes, completely plain. THE SHEEP in both shots: one small white cartoon sheep with a green tuft (Pip's design). THE TURNED SHEEP (shot 1 only): plain white, NO tuft, ONE amber eye (left), one black dot eye (right). Leave the top corner of both shots empty and dark (numbers and stamps are added in editing).
SHOT 1 — THREE WOLVES (0–5s): a moonlit clearing panel with EXACTLY THREE wolves in an arc facing ONE sheep. 0–2s: stillness. 2–4s: the middle wolf steps forward, eats the sheep in one gentle gulp (no violence, no mess), and the THREE-BEAT TRANSFORMATION plays — soft pale glow, shape settles into the TURNED SHEEP in the same spot, glow fades. 4–5s: the turned sheep stands facing the TWO remaining wolves, who do not advance — they watch, and hold.
HARD CUT.
SHOT 2 — FOUR WOLVES (5–10s): the same clearing panel with EXACTLY FOUR wolves in an arc facing ONE sheep. 5–8s: complete stillness; the wolves blink, calculate, and do not step; one wolf's ear twitches. 8–10s: the stillness holds to the end — the refusal is the action. The sheep stands calm throughout.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Three wolves change everything. Eat, and you face two wolves — and two wolves never strike. So three eats. Four? Eat, and you face three. So four holds. See the pattern?" Under the narration, very soft low suspense music plus night crickets only; one soft shimmering tone at the transformation. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: wrong wolf counts in either shot (three means three, four means four), any eating in shot 2, the two remaining wolves in shot 1 advancing on the turned sheep, a turned sheep WITH a tuft, numbers, letters, text or stamps generated in the frame, violence, realistic fur, 3D look, watermark, camera shake, morphing between the shots instead of a clean cut.
COUNT CHECK: shot 1 = 3 wolves → 2 wolves + 1 turned sheep; shot 2 = 4 wolves + 1 sheep, nobody

eats. Any other count = regenerate.

F-13 · THE CLIMB TO 100 (0:40–0:50) — Narration line 13 · THE VERDICT BEAT

Upload first: B01_PL2_Ring + B01_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact set and the uploaded CAST image for the exact characters. CHARACTERS: PIP — small round white sheep in the exact centre, black dot eyes, calm smile, ONE leaf-green tuft. THE WOLVES — one perfect ring of identical slate-blue wolves, pointed ears, long snouts, amber eyes, facing inward, no individual markings, no gap in the ring. The moon is top-left.
ACTION TIMELINE: 0–4s: the wide ring holds frozen while the camera pushes in VERY slowly; leave a clean column of empty sky at the RIGHT side of the frame (climbing numbers are drawn there in editing — generate nothing in that space). 4–7s: the push-in slows; focus settles on the front-centre wolf, WOLF PRIME, large at the bottom of the frame, staring inward, eyes narrowing as if finishing a long calculation. 7–10s: Prime holds the narrowed gaze; the whole ring stays frozen; Pip blinks once in the centre, calm. End on the frozen ring.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "It flips at every step. Odd numbers eat. Even numbers hold. One hundred is even. So the first wolf knows: bite… and ninety-nine wolves are waiting. And ninety-nine is an eating number." Under the narration, very soft low suspense music building very slightly, plus night crickets and faint wind only. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: any number, digit, arrow or text generated anywhere in the frame (the right-side sky column must stay empty), any wolf stepping or lunging, a gap in the ring, dawn light (it is still night), a frightened sheep, realistic fur, 3D look, extra animals, watermark, camera shake.
```

F-14 · DAWN — THE WALK-OUT (0:50–1:00) — Narration line 14 · END OF PART 2

Upload first: B01_PL2_Ring + B01_PL3_Dawn + B01_REF_Sheep

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded RING WIDE image as the exact opening set, the uploaded DAWN CLEARING image as the exact light and background for the second half, and the uploaded SHEEP image for the exact sheep. CHARACTERS: PIP — small round white sheep, black dot eyes, calm small smile, ONE leaf-green tuft; she is the only character who walks in either video. THE WOLVES — one ring of identical slate-blue wolves, pointed ears, long snouts, amber eyes, no individual markings.
ACTION TIMELINE: 0–3s: the frozen moonlit ring, exactly as before; then the light begins, almost imperceptibly, to warm from the RIGHT edge of the frame — the first hint of dawn. 3–6s: dawn grows (soft pink-orange light, the moon fading); at the front of the ring, the wolves on either side of the bottom-centre step BACK and ASIDE by one pace each — the ring's only movement in either video — opening a clean gate in the circle. 6–10s: PIP walks slowly and calmly out through the gate in a straight line toward the bottom of the frame, unhurried, never looking back; she exits the bottom of the frame; the wolves watch her go and do not follow; the empty dawn clearing holds for the final beat. Leave the top-right corner calm (an end chip is added in editing).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "So nobody moves. The ring opens… and the sheep walks away untouched. One hundred wolves, out-thought by their own perfect logic. Follow for tomorrow's riddle." Under the narration, the suspense music resolves into a warm, quiet closing tone, plus soft morning birds only in the last seconds. Pip never speaks and never moves her lips. Finish the narration before the clip ends; any remaining time is music and ambient sound only.
AVOID: the sheep running, skipping or looking back, any wolf following, lunging or blocking the gate, the gate opening anywhere except the front-bottom of the ring, night light in the second half, any end text generated in the frame, realistic fur, 3D look, extra animals, watermark, camera shake.
```

SECTION 10

PART D — AGENT MASTER PROMPT (PASTE ONCE, THE AGENT BUILDS ALL 14 CLIPS)

10

Before you paste:

1. Use Flow on a **computer** (Agent mode is in the web version). Click **Agent** in the prompt box to turn Agent ON.
2. Set defaults: **9:16**, and keep **"Confirm before generating: Always"** ON — you approve each step before it spends.
3. For true 10-second clips pick the **Omni Flash** model if offered (Veo clips land near 8 seconds — if the Agent uses Veo, tell it: *"Extend any clip shorter than 10 seconds"*).
4. First generate the nine reference images from Section 7 yourself — in this order: REF-00 (check the tuft / amber-eye split before anything else), REF-LADDER (count every panel: 1, 2, 3, 4), REF-SHEEP, REF-WOLF, REF-TURNED, PL-1, PL-2, PL-3, PL-4 — and add them to the project. Crop the four ladder panels from B01_REF_Ladder into separate stills (PANEL 1–4). Then paste the whole box below in ONE message. Check the ring and the ladder counts in the Agent's plan, then reply: **"Generate all shots."**

```
Create a complete two-part vertical animated riddle series called "100 WOLVES, ONE SHEEP" in this project. PART 1 is the riddle: 8 clips, every clip exactly 10 seconds, vertical 9:16, and the answer is NEVER revealed in Part 1. PART 2 is the solution: 6 clips, every clip exactly 10 seconds, vertical 9:16, revealing the answer — the sheep SURVIVES because with an even number of perfectly logical wolves no wolf dares to eat (odd counts eat, even counts hold, 100 is even).

GLOBAL STYLE (every image and every clip, no exceptions): 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces, moonlit deep-navy palette. NEVER realistic, NEVER a photo, NEVER 3D, NEVER Pixar, NEVER CGI, NEVER stick-figure. No text, no letters, no numbers, no stamps, no captions, no watermark inside any generated frame — every numeral, stamp, banner and caption is
```

added later in an editor.

INGREDIENTS (already in this project — use them for every clip, never redesign):
- B01_REF00_Cast / B01_REF_Sheep: PIP THE SHEEP — a small round-bodied white sheep, short legs, black dot eyes, calm small smile, ONE leaf-green tuft of wool on top of her head, about one third of a wolf's height. She is calm in every frame and never looks afraid.
- B01_REF_Wolf: THE WOLF DESIGN — identical slate-blue wolves, lighter slate bellies, pointed upright ears, long snouts, amber eyes, NO individual markings ever. The ring is one perfect circle of them around Pip, one wolf deep, all facing inward. WOLF PRIME is only the front-centre wolf used for close-ups — he has no special feature.
- B01_REF_Turned: THE TURNED SHEEP — Pip's body shape but NO tuft and ONE amber wolf eye (left) with one black dot eye (right). Appears ONLY inside the what-if vignette in Clip 2 and inside the ladder panels in Part 2.
- B01_REF_Ladder + its four panel crops: the proof plate — the same clearing stage with 1, 2, 3 and 4 wolves around one sheep. Verify the wolf count in every panel before use; a wrong count means regenerate.
- B01_PL1_Clearing / B01_PL2_Ring / B01_PL3_Dawn / B01_PL4_Faces: the four sets, exactly as drawn. The moon sits top-left in every night shot and never moves. Dawn appears in Clip 14 only.

THE THREE RULES (check after EVERY generation):
1. STILLNESS RULE: in the real ring, no wolf ever steps, lunges or eats — in all of Part 1, and in Part 2 outside the ladder panels. Eating and transformation happen ONLY inside the rounded what-if vignette in Clip 2 and inside the ladder panels in Clips 10–12. Any lunge in the real ring = regenerate that shot.
2. COUNT RULE: never generate numbers. The ring crowd is an uncountable impression; every numeral is an editor overlay later. The ladder panels are the one exception — count their wolves by eye (1, 2, 3, 4) before accepting any ladder shot.
3. TRANSFORMATION RULE: a wolf becomes a sheep only in the three-beat transformation (soft glow outline → shape settles into sheep shape in the same spot → glow fades), and the result is always the TURNED SHEEP design (no tuft, one amber eye). Pip never transforms and is never eaten in the real ring.

MOVEMENT RULES (every clip): the ring is statue-still except slow blinks, a rare ear twitch, and eyes narrowing one wolf at a time; Pip breathes slowly and blinks; her only walk is the calm walk-out in Clip 14, where two front wolves step back one pace to open a gate; camera work is hard cuts between wide ring / faces row / close-up, a slow push-in on the ring, a slow pan on the faces row — no zoom punches, no shake, no spin.

VOICE + SOUND RULE (every clip): GENERATE THE AUDIO WITH EACH CLIP. One narrator voice for BOTH videos: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, tone and speed in all 14 clips. In EVERY clip the narrator says the clip's narration line EXACTLY, word for word, with nothing added and nothing removed, and there is NO other speech. The characters on screen never speak and never move their lips. Under the narration: very soft low suspense music plus the ambient sound noted per clip. Listen-back rule: after generating each clip, check the narration words are exactly right; if one word is wrong or the voice changes, regenerate that clip. Clip 8 begins with 2 full seconds of silence before its line.

THE 14 CLIPS (generate in this order, name them B01_F01 … B01_F14):

PART 1 — THE RIDDLE (answer withheld in every clip):

CLIP 1 — "The ring" (ingredients: PL2 + REF00). Wide high shot of the moonlit clearing: the perfect ring of identical slate-blue wolves around Pip, tiny and calm in the centre, moon top-left; almost still, slow blinking only; a very slow push-in in the second half, then a freeze. Lower third kept calm for captions.
NARRATION (exact words): "One sheep stands alone in a moonlit clearing. Around it, in a perfect ring, stand one hundred wolves."
Ambient: night crickets, faint wind.

CLIP 2 — "The deadly rule" (ingredients: PL2 + REF00 + REF_Turned). The wide ring holds still. A rounded what-if vignette fades in above the ring: inside it only, one wolf eats a plain sheep in one gentle gulp, then the three-beat transformation turns it into the TURNED SHEEP (no tuft, one amber eye). The vignette fades; the real ring and Pip are untouched.
NARRATION (exact words): "Any wolf can pounce and eat the sheep. But here is the catch. The moment a wolf eats… it turns into a sheep itself."
Ambient: night crickets, faint wind; one soft shimmer at the transformation.

CLIP 3 — "The stakes" (ingredients: PL4 + REF_Wolf). Slow pan right along the profile faces row — identical wolf heads, strict profile, one amber eye each; one blink, one head's eyes narrowing, then stillness.
NARRATION (exact words): "And that new sheep can be eaten by the wolves that remain. Every wolf wants the meal. But every wolf wants to live even more."
Ambient: one low tense string note, faint night wind.

CLIP 4 — "Perfect logicians" (ingredients: PL4 + REF_Wolf). Slow pan left along the same faces row; as the pan passes, each head's eye narrows a fraction in sequence, like a thought travelling; ends with every eye narrowed, frozen.
NARRATION (exact words): "And every wolf is a perfect logician. Each one can predict exactly what the others will do — because they all reason in exactly the same way."
Ambient: faint clock-like ticking, night wind.

CLIP 5 — "The freeze" (ingredients: PL2 + REF_Sheep). Locked wide ring shot; almost nothing moves for 10 full seconds — Pip blinks twice, one ear twitch in the ring, no camera movement. Stillness is the content.
NARRATION (exact words): "So the ring stands frozen. A hundred hungry wolves. One calm sheep. And not one of them has moved."
Ambient: music thinning almost to silence, faintest crickets.

CLIP 6 — "Think like a wolf" (ingredients: REF_Wolf + PL1 + REF00). Close-up of WOLF PRIME, front three-quarter, identical to all wolves; steady gaze inward, one slow blink, eyes narrowing a fraction, ears tilting slightly forward; holds the thinking gaze to the end.
NARRATION (exact words): "Now think like a wolf in that ring. If you bite first… what happens to you next?"
Ambient: one low tense string note, faint night wind.

CLIP 7 — "The calm sheep" (ingredients: REF_Sheep + PL2). Medium close-up on Pip, calm, breathing slowly, one ear flick; the wolf ring soft behind her, unmoving; a very slow small push-in at the end. Nothing shows escape, dawn or safety.
NARRATION (exact words): "Look at the sheep. Perfectly calm. There is a chain of logic that decides its fate — and that chain starts very, very small."
Ambient: night crickets, faint wind.

CLIP 8 — "The question + the pause" (ingredients: PL2 + REF00). The frozen wide ring holds for the whole clip; upper-middle frame and lower third kept clean for editor banners; Pip blinks once near the end. The first 2 seconds of audio are COMPLETE SILENCE, then the narration.
NARRATION (exact words): "So — does the sheep get eaten? Or does it walk away untouched? Lock your answer in the comments: eaten, or safe? The solution drops tomorrow, in Part Two — and its first step is just one wolf."
Ambient: gentle suspense music after the silence, faint crickets.

PART 2 — THE SOLUTION:

CLIP 9 — "Recap" (ingredients: PL2 + REF_Ladder). The wide ring as Part 1 left it, very slow push-in; nothing eats, nothing moves except blinking; top corner kept clean and dark.
NARRATION (exact words): "Yesterday's riddle. One hundred perfect wolves. One sheep. And one deadly rule: eat, and you become the sheep. Here is the answer."
Ambient: night crickets, faint wind.

CLIP 10 — "Ladder 1: one wolf eats" (ingredients: Ladder PANEL 1 crop + REF_Turned + REF00). Exactly one wolf faces exactly one sheep (green tuft). The wolf eats in one gentle gulp; the three-beat transformation makes the TURNED SHEEP (no tuft, one amber eye); it stands alone, unhunted. Top corner kept empty for the editor's number and stamp.
NARRATION (exact words): "Start with just one wolf. It eats the sheep and turns into a sheep — and there is nobody left to eat it. With one wolf, the sheep is eaten."
Ambient: night crickets; one soft shimmer at the transformation.

CLIP 11 — "Ladder 2: two wolves hold" (ingredients: Ladder PANEL 2 crop + REF00). Exactly two identical wolves face exactly one sheep (green tuft). The left wolf leans a fraction, stops itself, settles back; both hold; nobody eats, nobody transforms. Top corner kept empty.
NARRATION (exact words): "Now try two wolves. If one eats, it becomes a sheep facing one hungry wolf — and we just saw what one wolf does. So with two, neither dares. The sheep is safe."
Ambient: night crickets.

CLIP 12 — "Ladder 3 + 4: the pattern" (ingredients: Ladder PANEL 3 crop + PANEL 4 crop + REF_Turned + REF00). Two shots, one hard cut at 5 seconds. Shot 1 (three wolves): the middle wolf

```
eats (gentle gulp) and transforms into the TURNED SHEEP; the two remaining wolves do not advance.
Shot 2 (four wolves): total stillness for 5 seconds; nobody steps; the refusal is the action. Top
corners kept empty.
NARRATION (exact words): "Three wolves change everything. Eat, and you face two wolves — and two
wolves never strike. So three eats. Four? Eat, and you face three. So four holds. See the
pattern?"
Ambient: night crickets; one soft shimmer at the transformation.

CLIP 13 — "The climb to 100" (ingredients: PL2 + REF00). Wide ring, very slow push-in; a clean
empty column of sky at the right of the frame (editor numbers climb there later — generate nothing
 in it); focus settles on Wolf Prime's narrowing gaze at the front; the ring freezes to the end.
Still night — no dawn yet.
NARRATION (exact words): "It flips at every step. Odd numbers eat. Even numbers hold. One hundred
is even. So the first wolf knows: bite… and ninety-nine wolves are waiting. And ninety-nine is an
eating number."
Ambient: night crickets, faint wind; music building very slightly.

CLIP 14 — "Dawn: the walk-out" (ingredients: PL2 + PL3 + REF_Sheep). The frozen ring; dawn light
warms in from the right, the moon fades; two front wolves step back one pace to open a gate at the
 bottom-centre — the ring's only movement in either video; Pip walks slowly and calmly out in a
straight line and exits the bottom of the frame; the wolves watch and do not follow; the empty
dawn clearing holds. Top-right corner kept calm for the editor's end chip.
NARRATION (exact words): "So nobody moves. The ring opens… and the sheep walks away untouched. One
 hundred wolves, out-thought by their own perfect logic. Follow for tomorrow's riddle."
Ambient: suspense music resolving warm; soft morning birds in the last seconds.

When all 14 clips exist, list them in order B01_F01–B01_F14 and report any clip whose ring
stillness, ladder count, transformation design or narration failed its check.
```

SECTION 11

THUMBNAIL (PART 1 — THE RIDDLE'S QUESTION ONLY, NEVER THE ANSWER)

11

The idea: the whole riddle in one frame — scale and stillness. A tight ring of dark slate-blue wolf silhouettes closes around one tiny, softly lit white sheep in a moonlit clearing, seen from directly above-ish. The eye reads "100 vs 1" instantly. The sheep is calm, which is the second hook: why isn't it afraid?

Generate text-free, add all text in the editor:

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours,
thick bold black outlines, simple shapes, simple round cartoon faces. This is NOT a photo, NOT
realistic, NOT 3D, NOT Pixar, NOT CGI. Vertical image 9:16, high three-quarter view of a moonlit
forest clearing at night, deep-navy palette: ONE tight, perfect ring of identical slate-blue
cartoon wolf silhouettes — pointed ears, long snouts, amber eyes, all facing INWARD — closing
around ONE tiny white cartoon sheep standing in the exact centre, small round body, black dot
eyes, calm expression, ONE leaf-green tuft on her head, softly lit by pale moonlight from the top-
left, where a round moon glows. Dark pine silhouettes ring the clearing's edge. The TOP THIRD of
the frame is dark, calm night sky and pine tops, left empty for title text. No wolf touches the
sheep; the ring is complete, with no gap.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, a gap in the ring,
wolves facing outward, a wolf lunging or biting, a frightened or running sheep, dawn light, an
open gate, text, letters, numbers, watermark.
```

Editor text (added after generation, never generated): top third — "100 vs 1" in very large bold white block letters with a black outline, and under it, smaller, "DOES IT SURVIVE?" in lime. That is all. No other words.

Never on the thumbnail: the sheep walking out, an open gate in the ring, dawn light, the words "safe", "survives", "nobody moves" or "even number", a SAFE stamp, or a turned sheep. Each one answers the riddle before the video starts. The thumbnail asks; only Part 2 answers.

Part 2 thumbnail (optional, posted with the solution): the ladder plate's Panel 1 and Panel 2 side by side is forbidden for the same reason — the stamps give it away. Instead reuse the Part 1 thumbnail art with the

editor text swapped to "THE ANSWER" in lime over "100 vs 1". The art itself still shows only the frozen ring.

→ Save the generated art as B01_THUMB.

SECTION 12

POSTING COPY

12

Three title options (Part 1 — pick one; all ask, none answer)

1. 100 Wolves vs 1 Sheep — Does It Survive?
2. The Riddle Where Nobody Dares Move (100 Wolves Puzzle)
3. Can One Sheep Out-Think 100 Perfect Logicians?

Part 2 title: The Answer: 100 Wolves, One Sheep — The Chain That Decides It

Caption (Part 1)

100 wolves. 1 sheep. Every wolf reasons perfectly — and the one who eats, becomes a sheep. Does it get eaten? Comment your answer BEFORE the reveal. Part 2 drops tomorrow. New riddle every day.

Pinned comment (Part 1 — the two debate camps)

Comment BEFORE Part 2: EATEN or SAFE? Pick a side. Team EATEN: "A hundred hungry wolves against one sheep? It gets eaten in seconds. Logic doesn't stop hunger." Team SAFE: "Nobody moves. The first wolf to bite signs its own death warrant — and every wolf knows it." The argument starts now. Part 2 tomorrow decides it.

Posting notes

- Post Part 1 first; pin the EATEN-or-SAFE comment immediately, and reply to early comments with questions only ("What happens to the first wolf, though?") — never with the verdict, the parity pattern, or the words "even number".
- Post Part 2 the next day as the follow-up, and pin a linking comment under Part 1 pointing to it. Part 2's own pinned comment: "Run the same machine with 99 wolves and ask again — the flipped answer shocks everyone who memorised Part 2 instead of learning the ladder."
- Do not spoil the answer in Part 1's comment replies, community posts, or the Part 2 thumbnail (Section 11).

SECTION 13

EDIT, CHECK, EXPORT (THE CHECKLIST)

13

1. **Join** Part 1 in order F01 → F08 and Part 2 in order F09 → F14. Trim each clip to its real narration length — never stretch a clip to fill silence. Keep F08's opening 2 seconds of silence intact.
2. **Add the editor overlays (Section 5) — all drawn in the editor, never generated:** F01 — OV-NUM "100" small beside the ring as the narration names it (optional; the frame also works bare). F02 — OV-VIGNETTE border around the what-if panel if the generated frame is soft. F08 — OV-QUESTION banner across the upper-middle + OV-COMMENT banner low on frame, both appearing only after the narration's question lands. F10 — OV-NUM "1", then OV-STAMP "EATEN" stamped only after the transformation completes. F11 — OV-NUM "2", then OV-STAMP "SAFE" after "neither dares" lands. F12 — OV-NUM "3" + "EATEN" on shot 1 after its transformation; OV-NUM "4" + "SAFE" on shot 2 only in its final second. F13 — OV-NUM climbing column at the right of the frame (5 … 99 … 100, small-to-large) timed to the narration, plus OV-CHAIN "100 → 99" beside the ring as the last sentence lands. F14 — OV-END chip "STILL STANDING."

on the final frame only.

3. **Captions:** burn in your series captions, low on the frame, never covering Pip, a wolf face, a ladder panel's animals, or any overlay number or stamp.

4. **STILLNESS CHECK (before export, clip by clip):** in the real ring, no wolf steps, lunges or eats in F01–F09, F13 (F02's bite exists only inside the vignette). The only ring movement in either video is the two wolves stepping back to open the gate in F14. Anything else = regenerate that clip before export.

5. **COUNT CHECK:** pause on every ladder frame. F10 starts with exactly 1 wolf + 1 sheep and ends with 1 turned sheep. F11 holds exactly 2 wolves + 1 sheep, nobody eats. F12 shot 1 = 3 wolves → 2 wolves + 1 turned sheep; shot 2 = 4 wolves + 1 sheep, nobody eats. Then check every OV-NUM against the panel it labels — a "3" over a 4-wolf frame is a failed export, fix the overlay or the frame, never ship the mismatch.

6. **TUFT + EYE CHECK:** Pip carries exactly one green tuft and two black eyes in every frame she appears. The Turned Sheep (F02 vignette, F10, F12) carries NO tuft and exactly ONE amber eye. A tuft on the turned sheep, or an amber eye on Pip, = regenerate.

7. **IDENTITY CHECK:** every wolf is identical — no scar, collar, size or fur-tone difference anywhere, and WOLF PRIME (F06, F13) is indistinguishable from his neighbours. The moon is top-left and unmoving in every night frame; dawn appears in F14 only.

8. **ANSWER-HOLD CHECK (Part 1 only):** watch Part 1 end to end as a stranger. Nothing — frame, overlay, caption, thumbnail, caption text — may state or imply the sheep survives, that nobody will move as a conclusion, the odd/even pattern, or the number chain. The freeze may be SHOWN (it is the riddle's present moment); it may not be EXPLAINED.

9. **Voice check:** every line present, word-exact against Section 6, one voice throughout both videos, no dead air longer than the scripted pauses (F08's 2 seconds; the short hold after F12's question). **Levels:** narration clearly above the music; export around −14 LUFS.

10. **Loop + ends check:** Part 1's final frozen frame (F08) must match Part 2's opening frame (F09) in ring position, moon position and light, so the two videos feel like one clearing across two days. Part 2 ends on the empty dawn clearing — hold it a breath before the file ends.

11. **Post:** Part 1 with Section 12's copy; pin the debate comment. Part 2 the next day; pin the link under Part 1. Never post both parts on the same day — the overnight argument is the distribution engine.
