THE CASE

A cook looks into his egg box and makes a statement that sounds like a confession to a crime against counting:

“I had six eggs. I broke two of them, I fried two of them, and I ate two of them — yet there are still four eggs in the box.”

He is not lying. No eggs were bought, borrowed, hidden or replaced. The box really holds four eggs, and everything he said happened, exactly as he said it.

THE QUESTION

How can four eggs still be in the box?

THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

HINT 1
Read the cook's sentence the way a lawyer would — word by word, taking nothing for granted.

HINT 2
Must “two of them” be a fresh pair of eggs every time it appears?

HINT 3
Eggs go through stages. One egg can be broken, then fried, then eaten — in that order, in one breakfast.

YOUR MOVE

How can four eggs still be in the box?

Decide your answer now — say it out loud or write it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

The two eggs he broke are the same two he fried and ate. Four were never touched.

Breaking, frying and eating are three events in one egg's morning — not three separate pairs of eggs. The cook broke two eggs, fried those two, and ate those same two.

Six eggs, minus the two that went through all three stages, leaves four sitting untouched in the box.

WHY IT WORKS

The sentence uses 'two of them' three times, and the ear automatically deals out six eggs — two per verb. But pronouns point back; they do not restock.

It is the same family of trick as the fathers and sons: the words count events, and the listener counts objects. Keep the two ledgers apart and the mystery evaporates.

THE TRAP, NAMED

Fast reading. The sentence is built to be skimmed, and a skim deals six eggs onto the counter.

MAKE THE VIDEO

This book is a production pack. The route from page to posted video:

1 · OPEN THE BOOK
The story, the question and the reveal in this book are your script beats, in order.

2 · GIVE IT TO THE AGENT
Paste the case into your AI agent (run it on Google Antigravity) and let it plan the shots from the beats.

3 · CONNECT GOOGLE FLOW
The agent builds the scenes as short clips in Flow. Keep the question on screen until the final seconds — the reveal is the last beat, never the first.

4 · EDIT + POST
Post with the question as the caption's first line and pin a comment asking for answers BEFORE the reveal. The debate in the comments is the engine.

ABOUT THIS BOOK

RIDDLE VAULT is the OTT Titans series of one-riddle books: one case per book, a verified answer, and the production route to turn it into a video. Every answer in this series is solved and checked before the book is made — if the logic has a hole, the riddle does not ship.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

More cases are waiting in the Vault — and a new riddle video lands every day on the 1 Minute Detective channels.
