OTT TITANS · PRODUCTION PACK

THE FRIDAY QUESTION

WHAT WAS YESTERDAY?

14 CLIPS · 10 SECONDS EACH	11 REFERENCES	NARRATION INSIDE EVERY PROMPT

WHAT YOU ARE GETTING

The complete production pack for this riddle: full analysis with the four-link chain drawn completely and checked in both directions, the unique [FRIDAY-2D] character and style lock, every reference prompt in code order, Part 1 (riddle) and Part 2 (solution) scripts, standalone video prompts with the narration inside each one, the Agent master prompt, thumbnail, posting copy and the edit checklist with the weekday-name read-back — all in one file.

THE COMPLETE PRODUCTION PACK

What Was Yesterday? — Complete production pack: full riddle analysis with the four-link chain drawn completely, unique character + style lock, every reference prompt, Part 1 + Part 2 scripts, standalone 10-second video prompts with narration inside, Agent master prompt, thumbnail, posting copy, edit checklist

The riddle in one line: A whiteboard in a kitchen reads: "If the day after tomorrow is Friday, what day was yesterday?" No calendar allowed — just count it out.

The answer in one line (creator only — never in Part 1, never on the thumbnail): Tuesday. The day after tomorrow is Friday, so tomorrow is Thursday, today is Wednesday, and yesterday — one more step back — was Tuesday. The proof is a four-link chain, walked one forced step at a time: Friday → Thursday → Wednesday → Tuesday. Section 1 draws the whole chain and checks it in both directions.

How this pack is organised: Section 1 analyses the riddle — the beat map, the complete chain, the three traps, and the logic checked end to end, including the forward sanity check. Section 4 locks the two characters, the kitchen, the whiteboard and the three rules that protect the count. Section 7 gives every reference prompt in code order. Sections 8 and 9 give a standalone video prompt for every clip, with the narration inside each one. Section 10 is the Agent master prompt. Build in section order and nothing can drift.

The one warning that matters more in this book than in almost any other: weekday names ARE text, and AI generators garble text. So in this pack NO weekday name is ever generated inside an image or a clip. The whiteboard is blank in every generated frame, and every word the viewer ever sees — the question, the week strip, the answer — is drawn by the editor (Section 5, OV codes). The edit checklist requires reading every on-screen weekday name aloud against the chain before export: one wrong or out-of-order weekday name teaches a wrong answer, and the take fails whatever it looks like.

SECTION 1

THE RIDDLE, ANALYSED

01

The beat map

Beat	Time	What happens	What the viewer is thinking
1. Breakfast stops	0:00–0:10	Two flatmates at the island; the board on the wall stops breakfast cold	"It's one sentence. How hard can it be?"
2. The question	0:10–0:20	The question is read, slowly, over the held board frame	"Wait — day after tomorrow... yesterday..."
3. No help	0:20–0:30	The rules land: no calendar, no phone, just counting	"Fine. I'll just count it."
4. The warning	0:30–0:40	The trap is named without being shown: most people stop one step too soon	"I won't. ...Will I?"
5. Walk, don't run	0:40–0:50	The method is given as movement: point at today, walk, never skip	The viewer starts counting along
6. Lock it in	0:50–1:00	2 seconds of silence, then the comments lock-in	The viewer commits — out loud
7. The question again	1:00–1:10	The exact question, repeated word for word, end frame held	Half the comments are already one day off
8–14. The solution	Part 2	The chain is walked link by link on the editor's week strip, then checked forwards	"Every step was forced. There was never a second answer."

The answer — and why it works

The riddle is pure direction-keeping. It contains exactly two instructions, and both are about position relative to **today**: *the day after tomorrow* means **two days forward from today**, and *yesterday* means **one day back from today**. Nothing else in the sentence does any work. That is why the solution is not a trick but a walk: fix the one day you are given, then move along the week one single day at a time, naming each day out loud as you pass it. Spoken steps do not flip; held-in-the-head steps do.

THE FOUR-LINK CHAIN (the whole proof — every link is one forced move):

Link	The day	How you know	The move that got you there
1	**Friday**	Given — it IS the day after tomorrow	The anchor. No move yet
2	**Thursday**	Tomorrow — one day before the day after tomorrow	One step back from Friday
3	**Wednesday**	Today — one day before tomorrow	One step back from Thursday
4	**Tuesday**	Yesterday — one day before today	One step back from Wednesday

Read the chain as a sentence: the day after tomorrow is **Friday** → tomorrow is **Thursday** → today is **Wednesday** → yesterday was **Tuesday**. Every arrow is the same move — one day backward — applied to the previous link. There is no branch, no choice point and no second answer: at each step, exactly one day sits one day before the day you are standing on.

The forward sanity check (always do this before calling the answer final): start from the answer and walk forwards. Yesterday was **Tuesday** → today is **Wednesday** → tomorrow is **Thursday** → the day after tomorrow is **Friday** . The walk lands exactly on the given day, so the chain is consistent in both directions. If a candidate answer fails this check, it is wrong — and both trap answers below fail it, which is the fastest way to show a commenter why.

The three traps (name them, or the comments will fall into them anyway)

Trap 1 — answering Wednesday (stopping one step early). The most common wrong answer, and the one the whole video is built around. The counter walks Friday → Thursday → Wednesday, feels the click of landing on *today*, and stops — forgetting that the question never asked for today. Wednesday is a true fact inside the chain (it IS today) given as the answer to a different question. Part 1's warning beat (F-04) and Part 2's disagreement beat (F-11 into F-12) exist solely to catch this trap on screen.

Trap 2 — answering Thursday (the off-by-one at the first step). This counter treats "the day after tomorrow" as if it were simply *tomorrow* — compressing two forward steps into one. Their chain runs: day after tomorrow = Friday, so "today" = Thursday, so yesterday = Wednesday... or they answer Thursday itself as a day they feel is "near the question". Either way the error happens at the very first move: the anchor is placed one day too close. The cure, built into F-09 and F-10, is that the anchor fills FIRST and alone, and the first step back is given its own full clip — the two forward steps are undone one at a time, never together.

Trap 3 — counting forward from Friday. This counter hears Friday and starts marching Friday → Saturday → Sunday, looking for yesterday somewhere ahead. Yesterday is definitionally behind today, and today is behind the anchor, so every step of the solution moves BACKWARD. The video's movement language enforces this: Arlo's points and counts always travel from the anchor toward one step earlier (right to left on the strip as the editor draws it, Monday at the left), and the forward walk is saved for the very last clip, clearly labelled as a CHECK, not as the method.

The logic, checked end to end (no gaps, no second hidden answer)

1. **Each link is forced.** The week is a fixed cycle. Given any day, the day one step before it is unique. So once the anchor (Friday = day after tomorrow) is fixed, tomorrow, today and yesterday are each determined with no freedom anywhere in the chain.
2. **The distances are exact.** "Day after tomorrow" is today + 2 — not today + 1 (that is tomorrow) and not a vague "in a couple of days". "Yesterday" is today − 1. The chain is therefore: anchor = today + 2 = Friday; yesterday = today − 1 = anchor − 3 = Tuesday. Three single steps back from Friday, no step skippable.
3. **No hidden second reading.** "The day after tomorrow" cannot mean "the day after tomorrow's tomorrow" or any doubled reading in ordinary English, and the riddle's wording is kept word-exact in the editor overlay (OV-QUESTION) precisely so no paraphrase can open a second reading on screen.
4. **The traps fail the forward check.** Wednesday-as-yesterday implies today is Thursday, tomorrow Friday, day after tomorrow Saturday — contradicting the given Friday. Thursday-as-yesterday implies the day after tomorrow is Sunday. Only Tuesday closes the loop, as shown above.
5. **The answer is in the question's own terms.** The question asks for a weekday name, the chain produces exactly one, and Part 2 names it once, plainly, in F-13 — after all four links have clicked. No earlier frame, caption or title in Part 1 contains it (see the Part 1 ban in Section 4).

Camera — exactly how it moves

- **Hard cuts** between the four set-ups (kitchen wide / board close / island close / over-counter). This is a counting riddle; the camera behaves like a careful teacher, not a tourist.
- **Counting frames are LOCKED.** Every board frame, every point and every finger-count holds perfectly still. A moving camera during a count makes a viewer lose their place in the chain.
- **One drift only:** F-07's tiny slow push-in on the board — the single camera move in either video, saved for the repeated question so the repeat feels closer, not different.

- **The board fills the frame empty, then full.** In Part 1 the board close-ups are blank under the editor's question text alone. In Part 2 the same framing carries the week strip filling link by link. The sameness of the frame is what makes the filling feel like progress — protect it by never reframing the board between parts.

Sound — what the videos carry

- **One narrator only** — the locked voice of Section 6, inside every clip. Characters never speak and never move their lips; June's challenge is arms, eyebrows and head-shakes, Arlo's thinking is points, steps and finger-counts.
- **Kitchen sounds are the percussion:** a mug set down in F-01, two far-apart footsteps in F-05, four taps on stone in F-14 — one per chain link. Keep them sparse and exact: a tap with no step landing is a continuity error a viewer can hear.
- **Scripted silence:** the first 2 seconds of F-06 are completely silent — no music, no room tone, no narration. It is the only true silence in either video. Do not let music bleed under it.
- **Part 2 is brisker, not louder:** the same voice at the same pace, with confident low music. The chain clips (F-09 to F-13) carry almost no kitchen sound except the F-09 tap — the information is the strip filling, and the checklist verifies it frame by frame.

On-screen text — the complete list

ALL text — the question, every weekday name, the week strip, every label and chip — is drawn in the editor (Section 5, OV codes). Nothing is ever generated inside a frame, and in this book that rule is absolute: a generated weekday name will garble, and a garbled name on a counting video teaches a wrong answer.

SECTION 2

THE STORY IN 30 SECONDS + THE JOB IN 10 SIMPLE STEPS

02

The story in 30 seconds: A challenger leaves one sentence on a kitchen whiteboard — if the day after tomorrow is Friday, what day was yesterday? — and bans every calendar and phone in the house. Part 1 warns that most people stop one step too soon and locks the viewer's answer in the comments. Part 2 anchors on Friday and walks the week strip backwards one forced link at a time — Thursday for tomorrow, Wednesday for today — refuses to stop there, takes the one more step the question actually asked for, and lands on Tuesday. Then it checks the whole chain forwards and watches it click.

The job in 10 simple steps:

1. Read Section 1 once — the whole four-link chain and the three traps — so the order Friday → Thursday → Wednesday → Tuesday is in your head before anything is generated.
2. Generate the 11 reference images from Section 7, in code order, starting with REF-00. Check each one against its CHECK line before moving on. Every board in every reference must be blank.
3. Read the three rules in Section 4 out loud: BLANK BOARD, WEEK STRIP, CHAIN ORDER. They govern every later decision.
4. Build the editor overlays from Section 5 BEFORE generating clips: the question text (OV-QUESTION) and the week strip in all its states (OV-STRIP-EMPTY plus the four fill steps). You are drawing every weekday name yourself — check each one against the chain as you draw it.
5. Generate Part 1 (Section 8, F-01 to F-07) with the narration inside each prompt. Listen-check every clip against Section 6; regenerate only the failures. Then search the assembled Part 1 for weekday names: the anchor day is the only one allowed anywhere.
6. Generate Part 2 (Section 9, F-08 to F-14) the same way, building the board clips from the same verified plates Part 1 used — the framing must match.
7. Join each part in order. Trim to the narration; never stretch a clip to fill silence. Keep F-06's opening 2 seconds of silence intact.
8. Add the editor overlays exactly where the table in Section 1 and Section 13 say — question first, empty strip in Part 1, then the four fill steps in Part 2 in the narration's exact order, the answer chip last of all.
9. Run the full Section 13 checklist — above all the weekday-name read-back: read every on-screen weekday name aloud, in strip order, against the chain, before export.
10. Post Part 1 with Section 12's copy and pin the debate comment. Post Part 2 the next day. Never post both on the same day.

SECTION 3

EVERY SMALL NOTE (THE DETAILS VIEWERS CATCH ON A REWATCH)

03

- **The lemon magnet never moves.** It sits at the board's top-right corner in every plate, still and clip, in both parts. It is the frame's fixed point — the thing a rewatcher's eye uses to confirm the board shots really are the

same board. A magnet that jumps corners reads as a different board and a stitched-together trick.

- **The marker never writes.** Its cap stays on in every generated frame; Arlo points with it and rests it on the tray. The instant a generated stroke appears on the board, the viewer is reading AI handwriting instead of the editor's exact question — and the take fails under the BLANK BOARD rule.
- **The question is word-exact everywhere.** "If the day after tomorrow is Friday, what day was yesterday?" — in the F-02 overlay, the F-07 repeat, the caption and the title. A paraphrase ("in two days", "two days from now") changes the counting distance in some viewers' heads and opens comment arguments the riddle never invited.
- **Arlo counts on the same hand, in the same direction.** In F-04 he rushes two fingers and stalls; in F-11 he counts three and stops; in F-13 he counts all four; in F-14 he counts the same four forwards. Same right hand, same finger order every time — the count is a visual rhyme across both videos, and a swapped hand breaks it.
- **June never touches the board or the marker.** She sets the trap, states the rules, shakes her head at the false landing and supplies the "one more" — all with arms, eyebrows and one raised finger. One pointer (Arlo) = one count = nobody can claim the count was steered.
- **The mugs are a clock.** Full and steaming in F-01, set down through Part 1, picked up again only in F-14 when breakfast resumes. If a mug is in a hand during a chain clip, the scene reads as still-arguing, not counting.
- **The strip's boxes never pre-fill.** In Part 1 the strip is seven empty boxes (F-04) or absent. The first fill anywhere in the production is FRIDAY in F-09 — and it fills at the anchor position (the fifth box, Friday in a Monday-first week), not at the left edge. A strip that fills left-to-right teaches forward counting, the exact habit Trap 3 warns about.
- **Wednesday gets its moment of false triumph.** F-11 is staged so the third fill FEELS like an ending — Arlo's satisfied nod is deliberate. F-12's correction only lands because the viewer was allowed to feel done one link early, exactly as they did in their own head.
- **No clock, no calendar, no phone — anywhere, ever.** Not even as background dressing: a wall calendar behind the board would hand the viewer the very tool the riddle bans, and a sharp commenter will screenshot it. The plates' CHECK lines exist for this.
- **The forward check is a check, never a second method.** F-14's narration says "Check it forwards" — the order of the words matters. Presented as a second solution it would confuse; presented as verification it closes the riddle.

SECTION 4

STYLE + CHARACTER + MOVEMENT LOCK — [FRIDAY-2D]

04

Paste this lock at the start of any new prompt for this story. It overrides any other style instruction.

STYLE: 2D flat cartoon illustration / animation only — hand-drawn storybook cartoon, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. NEVER a photo, NEVER realistic, NEVER 3D, NEVER Pixar, NEVER CGI, NEVER a stick figure drawing. Vertical 9:16 throughout.

THE CHARACTERS (exact — never redesign, never swap a feature):

- **ARLO FINN, THE WONDERER:** ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded

sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand.

- **JUNE OKAFOR, THE CHALLENGER:** JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded.
- **THE HANDS:** ARLO'S HANDS: a man's hands with olive-green hoodie cuffs and a plain white t-shirt cuff at the wrist — the RIGHT hand holds the dark blue whiteboard marker by its barrel, cap on, and only ever points with it or rests it on the marker tray; the marker never writes a letter, a word or a number in any generated frame.
- **THE WHITEBOARD (a character in this story — treat it like one):** THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank.

MOVEMENT RULES (every clip): movements are small, slow and countable — a point, a step, a finger folded down one at a time, one head-shake, one nod. Nobody hurries a count; a hurried count reads as a skipped day. The camera is hard cuts and locked frames, with F-07's tiny push-in as the only move in either video. Characters never speak and never move their lips; all speech is the narrator. The marker is never uncapped and never touches the board.

THE THREE RULES THAT PROTECT THE RIDDLE

1. **THE BLANK BOARD RULE:** the whiteboard is COMPLETELY BLANK in every generated image and clip — no writing, no letters, no weekday names, no strip boxes, no smudges that read as writing. Every word the viewer sees is an editor overlay (Section 5, OV codes). A generated letter, word or box on the board = regenerate, no exceptions: a garbled weekday name teaches a wrong answer.
2. **THE WEEK-STRIP RULE:** there is ONE editor-drawn week strip — seven boxes in a row, MON · TUE · WED · THU · FRI · SAT · SUN in that order — and it is built once and reused, never redrawn per clip. In Part 1 it may appear only as seven EMPTY boxes (F-04). In Part 2 it fills in exactly four steps and no more, each step a single box, in the chain's order (see Rule 3). Any other text graphic that lists days must match the strip's order exactly.
3. **THE CHAIN-ORDER RULE:** the fills happen in the narration's exact order and in no other: **FRIDAY first** (the day after tomorrow, the anchor) → **THURSDAY** (tomorrow) → **WEDNESDAY** (today) → **TUESDAY last** (yesterday, the answer — Part 2, F-13 only). A fill that arrives early, late, out of order, or in the forward direction outside F-14's labelled check, fails the take — the ORDER is the proof, and a viewer who sees Tuesday before Wednesday has been handed the answer without the reasoning.

THE PART 1 BAN (applies to Sections 6 and 8, the thumbnail and all Part 1 posting copy): in Part 1 material the ONLY weekday name allowed anywhere — narration, prompt text, overlays, titles — is **Friday**, inside the question itself. The answer day is never named, hinted by initial, or shown as a filled box. If a Part 1 draft contains any other weekday name, it is not a draft of Part 1.

OV-ANSWER	Answer chip, Part 2 only: "YESTERDAY WAS TUESDAY"	F-13
OV-END	End chip: "FRIDAY → THURSDAY → WEDNESDAY → TUESDAY "	F-14

The strip map (the editor's single source of truth): the seven boxes run **MON · TUE · WED · THU · FRI · SAT · SUN**, left to right. So the anchor, FRIDAY, is the **fifth** box; THURSDAY the fourth; WEDNESDAY the third; TUESDAY the second. The fills march LEFTWARD from the fifth box to the second, one box per clip. The first box (MON) and the last two (SAT, SUN) never fill in this production — if a frame shows them filled, the graphic is wrong.

SECTION 6

THE SCRIPTS (ORIGINAL NARRATION — THESE EXACT WORDS GO INSIDE THE PROMPTS IN SECTIONS 8 AND 9)

06

Voice + sound rule (the whole book)

One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narration is generated INSIDE each video prompt (the NARRATION AUDIO block), never recorded separately and never generated by the characters — characters never speak and never move their lips. **Listen-back rule:** after generation, listen to every clip end to end and compare it word by word with the lines below; a clip whose narration adds, drops or changes a single word is a failure.
Regenerate-only-failures rule: regenerate only the failed clip, never the whole set — regenerating a passed clip risks the voice drifting between clips. Keep the first 2 seconds of F-06 completely silent in the edit even if the

generator adds room tone.

PART 1 — THE RIDDLE (about 70 seconds: 7 clips × 10 seconds; the answer is withheld)

F-01 · Line 1: "One sentence on a kitchen whiteboard stops breakfast cold. No calendar can save you here."

F-02 · Line 2: "If the day after tomorrow is Friday, what day was yesterday? Read it again — slowly."

F-03 · Line 3: "No calendar. No phone. No asking the house. Just count it out, one day at a time."

F-04 · Line 4: "Most people answer too fast, and stop one step too soon. That one step is the whole riddle."

F-05 · Line 5: "Point at today in your head. Now walk — do not run, and do not skip a single day."

F-06 · Line 6: "Say your answer out loud. Lock it in the comments before anyone talks you out of it."

F-07 · Line 7: "If the day after tomorrow is Friday, what day was yesterday? Your answer decides it. Solution tomorrow."

PART 2 — THE SOLUTION (about 70 seconds: 7 clips × 10 seconds; the chain walked link by link)

F-08 · Line 8: "Yesterday's whiteboard riddle: if the day after tomorrow is Friday, what day was yesterday? Here is the count."

F-09 · Line 9: "Start at the anchor and walk backwards. The day after tomorrow is Friday. That box fills first."

F-10 · Line 10: "One step back from Friday is tomorrow — and tomorrow is Thursday."

F-11 · Line 11: "One more step back is today — and today is Wednesday. This is where most people stop."

F-12 · Line 12: "But the question never asked for today. It asked for yesterday — one more step back."

F-13 · Line 13: "Yesterday was Tuesday. Say the chain out loud: Friday, Thursday, Wednesday, Tuesday."

F-14 · Line 14: "Check it forwards: yesterday Tuesday, today Wednesday, tomorrow Thursday, day after tomorrow Friday. It clicks."

SECTION 7

PART A — REFERENCE IMAGE PROMPTS (GENERATE THESE FIRST, IN CODE ORDER)

07

Generate every reference in the order below and check it against its CHECK line before moving on. Upload the saved references when the video prompts in Sections 8 and 9 name them. Every prompt below is standalone: it carries the full style order, the full character descriptions and its own negative block, so it can be pasted on its own.

This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. SCENE: a plain warm cream studio background with no kitchen and no furniture — a character line-up plate only. CHARACTERS AND PROPS IN THIS IMAGE: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded. THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank is NOT in this plate. COMPOSITION: Both characters stand side by side in full body view, facing the camera, in neutral standing poses with relaxed arms, with clear space between them. Arlo stands at the left holding nothing; June stands at the right with her arms relaxed. The full height of both characters fits inside the frame with headroom above and floor space below. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, words, numbers, writing on the whiteboard, a marked or smudged whiteboard, a calendar, a phone screen with readable content, extra people, extra magnets, watermark, logos.
```

CHECK before you accept it: Both faces match their descriptions exactly, the hair is right on both (short messy dark-brown on Arlo, black curly high puff on June), the clothes are the locked colours, and neither character holds any object.

COMPOSITION: Arlo stands alone in three-quarter body view, facing slightly toward the right of frame, the dark blue marker held loosely in his RIGHT hand down at his side, cap on the marker, his expression puzzled and thoughtful, looking slightly upward as if reading something above eye level. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, words, numbers, writing on the whiteboard, a marked or smudged whiteboard, a calendar, a phone screen with readable content, extra people, extra magnets, watermark, logos.

Soft warm morning light from a window at the left, no dramatic shadows. SCENE: an extreme close view against a plain warm cream background — hands and forearms only, no face, no body. CHARACTERS AND PROPS IN THIS IMAGE: ARLO'S HANDS: a man's hands with olive-green hoodie cuffs and a plain white t-shirt cuff at the wrist — the RIGHT hand holds the dark blue whiteboard marker by its barrel, cap on, and only ever points with it or rests it on the marker tray; the marker never writes a letter, a word or a number in any generated frame. COMPOSITION: The right hand holds the dark blue marker by its barrel between thumb and forefinger, cap on, pointing gently toward the upper right of frame as if indicating a blank space; the left hand is open beside it, palm up, fingers relaxed, in a counting pose with no finger folded down. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. The editor draws the question onto it later; inside every generated frame the board stays blank. The kitchen around it: light oak upper cabinets, sage-green lower cabinets, a pale stone worktop, a kitchen island in the middle distance with two plain mugs on it, a window at the left letting in soft morning light, and the whiteboard mounted on the back wall, centred above the worktop. COMPOSITION: An empty establishing plate: the whiteboard sits centre-back and reads as the hero of the room; the island, cabinets and window frame it without crowding it. Nothing in the room carries any letter, label or readable marking of any kind. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, words, numbers, writing on the whiteboard, a marked or smudged whiteboard, a calendar, a phone screen with readable content, extra people, extra magnets, watermark, logos.

Soft warm morning light from a window at the left, no dramatic shadows. SCENE: a close straight-on view of the whiteboard wall with NO people in it. CHARACTERS AND PROPS IN THIS IMAGE: THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. Below the board, the pale stone worktop edge and the tops of the sage-green cabinets are just visible; at the far left edge, a sliver of window light falls across the wall. COMPOSITION: The blank board fills most of the frame, dead straight and level, with generous clean white space across its whole surface — this is the plate the editor's question text and week strip are composed over, so the surface must be even, clean and unobstructed from corner to corner. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. Soft warm morning light from a window at the left, no dramatic shadows. SCENE: a close view of the kitchen island and breakfast counter with NO people in it. CHARACTERS AND PROPS IN THIS IMAGE: On the pale stone island top: two plain mugs (one olive green, one mustard yellow, both completely blank with no design), a small plain plate, and clear empty stone space across the middle of the island. Behind the island, the whiteboard wall is visible but softly out of focus, its surface blank. COMPOSITION: A reaction-shot plate: the island top is the foreground, the blurred blank board is the background, and the empty middle of the island is kept clear for the editor's empty week-strip boxes to sit above in the solution beats. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. The editor draws the question onto it later; inside every generated frame the board stays blank. The near edge of the island crosses the bottom of the frame; the worktop and sage-green cabinets sit below the board; the window light comes in from the left. COMPOSITION: The plate the two-shoulder shots are built from: island edge at the bottom, board centred in the upper half, and clean empty space at the lower left and lower right of the board where shoulders will be composited in the clips. The board's whole surface stays visible and unobstructed. The whiteboard, if it appears at all, is COMPLETELY BLANK. Vertical 9:16. Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. SET: the warm kitchen in a wide shot: the kitchen island in the middle distance, the whiteboard on the back wall above the worktop, morning light from the window at the left. CHARACTERS AND PROPS IN THIS CLIP: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded. THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. ACTION TIMELINE: 0–4s: both characters stand at the island with a mug each, mid-breakfast, relaxed; June nods toward the whiteboard on the back wall. 4–7s: Arlo turns and looks up at the board; his mug stops halfway to his mouth. 7–10s: both stand still, looking at the board; the board stays COMPLETELY BLANK (the editor draws the question onto it in the edit); hold wide and still. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only. AVOID: realistic faces, 3D look, text, letters, words appearing, writing forming on the whiteboard, a calendar, watermark, camera shake, fast motion, any writing appearing on the board, either character speaking or moving their lips, a phone or calendar anywhere in frame.

The editor draws the question onto it later; inside every generated frame the board stays blank. Only Arlo's right hand enters the frame at the lower edge (ARLO'S HANDS: a man's hands with olive-green hoodie cuffs and a plain white t-shirt cuff at the wrist — the RIGHT hand holds the dark blue whiteboard marker by its barrel, cap on, and only ever points with it or rests it on the marker tray; the marker never writes a letter, a word or a number in any generated frame). ACTION TIMELINE: 0–4s: the frame holds on the completely blank board; Arlo's right hand rises slowly into the lower edge of frame, marker in hand, cap on, and points gently at the centre of the blank board. 4–7s: the hand holds the point, perfectly steady; nothing is written and nothing appears. 7–10s: the hand lowers out of frame; the board stays blank and clean (the editor's question text sits on this held frame in the edit); hold to the end. Under the narration: very soft thoughtful music, a quiet kitchen room tone, and a faint clock tick — no marker squeak, because the marker never writes. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only. AVOID: realistic faces, 3D look, text, letters, words appearing, writing forming on the whiteboard, a calendar, watermark, camera shake, fast motion, the marker touching the board, any stroke, letter or word forming, the hand writing, the magnet moving.

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. SET: a view from behind the island toward the whiteboard: both characters seen from behind and the side at the lower edges of frame, the blank board centred above them. CHARACTERS AND PROPS IN THIS CLIP: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand (seen from behind and the side). JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded (seen from behind and the side). THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. ACTION TIMELINE: 0–4s: both look up at the blank board; Arlo raises his right hand and counts on his fingers — one finger, then a second — quickly, confidently. 4–7s: he stops, frowns, and his hand hovers, suddenly unsure; June watches him, one eyebrow raised. 7–10s: his hand lowers slowly without finishing the count; the board stays COMPLETELY BLANK; hold still (the editor's empty week-strip boxes may sit low on this frame in the edit — seven empty boxes, nothing inside them). NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed:
```

"Most people answer too fast, and stop one step too soon. That one step is the whole riddle." Under the narration: very soft thoughtful music plus a quiet kitchen room tone; the music thins a little as his confidence goes. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only. AVOID: realistic faces, 3D look, text, letters, words appearing, writing forming on the whiteboard, a calendar, watermark, camera shake, fast motion, the count finishing, a nod of certainty, any box filling in, any writing or letter shape appearing anywhere.

SET: a medium shot: both characters side by side facing the camera, the blank whiteboard filling the wall behind them, matching F-06's framing. CHARACTERS AND PROPS IN THIS CLIP: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded. THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. ACTION TIMELINE: 0–4s: both look toward the camera, calm; Arlo counts the four steps on his fingers one final time, slowly — one, two, three, four — landing on the fourth with a small open-hand gesture toward the board behind them. 4–7s: June smiles properly for the first time in either video and nods once. 7–10s: both hold, satisfied; the board stays blank in the generated frame (the editor's completed week strip and the answer chip sit on this held frame — the fullest board of the whole production, and every word on it is editor-drawn); hold to the end. NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Yesterday was Tuesday. Say the chain out loud: Friday, Thursday, Wednesday, Tuesday." Under the narration: confident, very soft thoughtful music plus a quiet kitchen room tone; the music warms slightly on the answer and settles. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only. AVOID: realistic faces, 3D look, text, letters, words appearing, writing forming on the whiteboard, a calendar, watermark, camera shake, fast motion, confetti, cheering, exaggerated celebration, any word or letter generated anywhere in frame.

F-14 · CHECK IT FORWARDS (Part 2 — 10 seconds)

Upload first: B04_PL1_KitchenWide + B04_REF00_Cast · **Narration line:** "Check it forwards: yesterday Tuesday, today Wednesday, tomorrow Thursday, day after tomorrow Friday. It clicks."

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must

stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. SET: the warm kitchen in a wide shot, matching F-01 and F-08: island in the middle distance, whiteboard on the back wall, morning light from the left. CHARACTERS AND PROPS IN THIS CLIP: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. ACTION TIMELINE: 0–4s: back at the island, both characters pick up their mugs again — breakfast resumes; Arlo counts the four steps once more on his free hand, this time in the forward direction, unhurried and certain. 4–7s: June taps the island top four times in time with his count — four soft taps, one per step — and nods at the last. 7–10s: both take a sip and look at the board one last time; the board stays blank in the generated frame (the editor's end chip sits low on this frame); the shot holds and ends clean. NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Check it forwards: yesterday Tuesday, today Wednesday, tomorrow Thursday, day after tomorrow Friday. It clicks." Under the narration: confident, very soft thoughtful music that resolves and stops cleanly, a quiet kitchen room tone, and four soft taps on stone timed to the count. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only. AVOID: realistic faces, 3D look, text, letters, words appearing, writing forming on the whiteboard, a calendar, watermark, camera shake, fast motion, a fifth tap, the count being mimed in the backward direction, any end card or graphic generated inside the clip.

SECTION 10

PART D — AGENT MASTER PROMPT (PASTE ONCE, THE AGENT BUILDS ALL 14 CLIPS)

10

Paste the whole block below to the production agent together with this pack. It restates the lock, the rules, the order of work and every narration line, so the agent can run the build from this section plus Sections 7–9 alone.

You are producing TWO vertical videos for the riddle "THE FRIDAY QUESTION": Part 1 (the riddle, answer withheld) and Part 2 (the solution), 7 clips each, 10 seconds per clip, 9:16.

STYLE LOCK [FRIDAY-2D]: Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows.

CHARACTERS (exact, never redesign): ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often

folded.

THE WHITEBOARD: THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank.

THE THREE RULES: (1) BLANK BOARD — the board is completely blank in every generated frame; ALL words are editor overlays. (2) WEEK STRIP — one editor-drawn strip of seven boxes, MON TUE WED THU FRI SAT SUN; in Part 1 it appears only as seven EMPTY boxes. (3) CHAIN ORDER — Part 2 fills the strip in this order only: FRIDAY first (day after tomorrow), then THURSDAY (tomorrow), then WEDNESDAY (today), then TUESDAY last (yesterday, the answer). PART 1 BAN: in all Part 1 work the only weekday name allowed anywhere is Friday, inside the question.

STEP 1: Generate the 11 reference images from Section 7 of the pack, in code order, and check each against its CHECK line. Reject any reference whose board is not blank.
STEP 2: Build the editor overlays from Section 5: OV-QUESTION (word-exact: "If the day after tomorrow is Friday, what day was yesterday?") and the week strip in its empty state plus its four fill states. Read every weekday name on the strip aloud against the chain before saving each state.
STEP 3: Generate Part 1 clips F-01 to F-07 from Section 8, one prompt at a time, narration generated inside each clip. Listen-check every clip word by word; regenerate only failures.
STEP 4: Generate Part 2 clips F-08 to F-14 from Section 9 the same way, reusing the same plates so the board framing matches Part 1 exactly.
STEP 5: Assemble each part in order. Keep the first 2 seconds of F-06 completely silent. Add the overlays exactly where Section 1's on-screen text table and Section 13 say. Trim to the narration; never stretch a clip to fill silence.
STEP 6: Run the full Section 13 checklist, including the weekday-name read-back, and fix every failure before export. Export 1080×1920 MP4 for each part.

VOICE RULE: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY the exact lines below, word for word, one line per clip, in this order:

F-01: "One sentence on a kitchen whiteboard stops breakfast cold. No calendar can save you here."
F-02: "If the day after tomorrow is Friday, what day was yesterday? Read it again — slowly."
F-03: "No calendar. No phone. No asking the house. Just count it out, one day at a time."
F-04: "Most people answer too fast, and stop one step too soon. That one step is the whole riddle."
F-05: "Point at today in your head. Now walk — do not run, and do not skip a single day."
F-06: "Say your answer out loud. Lock it in the comments before anyone talks you out of it."
F-07: "If the day after tomorrow is Friday, what day was yesterday? Your answer decides it. Solution tomorrow."
F-08: "Yesterday's whiteboard riddle: if the day after tomorrow is Friday, what day was yesterday? Here is the count."
F-09: "Start at the anchor and walk backwards. The day after tomorrow is Friday. That box fills first."
F-10: "One step back from Friday is tomorrow — and tomorrow is Thursday."
F-11: "One more step back is today — and today is Wednesday. This is where most people stop."
F-12: "But the question never asked for today. It asked for yesterday — one more step back."
F-13: "Yesterday was Tuesday. Say the chain out loud: Friday, Thursday, Wednesday, Tuesday."
F-14: "Check it forwards: yesterday Tuesday, today Wednesday, tomorrow Thursday, day after tomorrow Friday. It clicks."

Do not invent lines, do not paraphrase, do not add an introduction or a sign-off. If a clip's narration differs from its line by even one word, regenerate that clip only.

SECTION 11

THUMBNAIL (PART 1 — THE RIDDLE'S QUESTION ONLY, NEVER THE ANSWER)

11

The idea: the whiteboard fills the frame, shot from June's side of the island. Her hand points at the board from the right edge; Arlo's puzzled face is in the lower left, mid-count on two fingers, visibly stuck. The board itself is shot BLANK — the editor draws the question onto it in bold marker style, and nothing else. The hook is the question and the stuck face. Never show a filled week strip, the chain, or the answer day in any form — not filled, not initialled, not colour-coded.

Save as: `B04_THUMB_Part1`

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Warm kitchen palette: warm cream walls, light oak cabinets, a pale stone worktop, sage-green lower cabinets, a white whiteboard with a light grey frame, a bright yellow lemon-shaped magnet, a dark blue marker, olive green, mustard yellow and navy clothing colours. Soft warm morning light from a window at the left, no dramatic shadows. SCENE: a thumbnail composition in the kitchen: the whiteboard fills the upper two-thirds of the frame, straight-on; June's arm enters from the right edge pointing at the board's centre; Arlo is at the lower left in three-quarter view, counting on the fingers of his raised right hand — two fingers up, the rest hovering — with a stuck, puzzled expression. CHARACTERS AND PROPS: ARLO FINN, THE WONDERER (age about 32): medium height and slim build, short messy dark-brown hair, a round face, light stubble on the chin and jaw, an olive-green hooded sweatshirt worn open over a plain white t-shirt, dark blue jeans, white sneakers, a puzzled thoughtful expression, and a dark blue whiteboard marker held in his RIGHT hand whenever a marker is in his hand. JUNE OKAFOR, THE CHALLENGER (age about 29): medium height and medium build, deep brown skin, black curly hair worn in a high puff, a mustard-yellow cardigan over a plain navy top, black trousers, dark flat shoes, a confident teasing expression, arms often folded (arm and shoulder only at the right edge). THE WHITEBOARD: a wide white whiteboard with a light grey frame, mounted flat on the kitchen wall at eye level, its surface COMPLETELY BLANK and clean white in every generated image and clip — no writing, no letters, no words, no numbers, no drawings on it at all — with ONE bright yellow lemon-shaped magnet fixed at its top-right corner and a dark blue whiteboard marker resting on its tray. The editor draws the question onto it later; inside every generated frame the board stays blank. COMPOSITION: the blank board is the hero and stays COMPLETELY BLANK in the generated image — the editor draws the question text onto it afterwards; leave the board's whole surface clean and unobstructed, and keep faces clear of the board area. Vertical 9:16. NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, words, numbers, writing on the whiteboard, a marked or smudged whiteboard, a calendar, a phone screen with readable content, extra people, extra magnets, watermark, logos.
```

CHECK before you accept it: the board is blank, the count reads as stuck (not finished), June is an arm and a point (not a second full character competing for the frame), and — after the editor adds the question — the finished thumbnail, shrunk to profile-picture size, still reads as one question and one stuck face. The editor adds NO other text: no day names beyond the one inside the question, no strip, no arrows, no answer hint of any kind.

Title options (Part 1 — pick one; all three lead with the question, none carries the answer)

1. If the Day After Tomorrow Is Friday, What Was Yesterday?
2. The Friday Question Everyone Answers One Day Off
3. No Calendar Allowed: Count Backwards From Friday

Caption — Part 1 (first line is the question)

If the day after tomorrow is Friday, what day was yesterday? No calendar. No phone. Just count it out, one day at a time — and be careful: most people stop one step too soon. Lock your answer in the comments BEFORE the solution drops tomorrow. New riddle every day.

Caption — Part 2 (posted the next day)

The count, link by link: the day after tomorrow is Friday, tomorrow is Thursday, today is Wednesday — and yesterday was Tuesday. Did you take all four steps, or stop one early? The full pack for this riddle is linked on the profile. New riddle every day.

Pinned comment (post under Part 1, pin it immediately — the two debate camps)

Your day — WEDNESDAY or TUESDAY? Lock it in below. No edits after the reveal. (Team Wednesday: you landed on today. Team Tuesday: you took the one more step. The solution tomorrow settles it.)

SECTION 13

EDIT, CHECK, EXPORT (THE CHECKLIST) 13

Nothing posts until every line passes. Work down the list in order.

Frame checks

- Every frame matches the [FRIDAY-2D] lock: Arlo's messy dark-brown hair, stubble, olive hoodie over white t-shirt; June's black curly high puff, mustard cardigan over navy top. No drift, no swapped feature, no third person.
- The lemon magnet is at the board's top-right corner in every single board frame, in both parts, unmoved.
- The marker's cap is on in every frame; the marker never touches the board; no generated stroke, letter or smudge-that-reads-as-writing appears on any board.
- No calendar, clock face with numbers, phone, labelled packaging or paper appears in any frame — including backgrounds and blurred areas.
- The board framing in Part 2's close clips matches Part 1's exactly (same plates, same crop). If a retake reframed the board, the strip fills will appear to jump — reject it.

The weekday-name read-back (this book's decisive check — do it out loud, with a second person if one is available)

1. Play the finished Part 2 and pause on EVERY frame that carries a weekday name. Read each name aloud, in the order it appears.
2. Check the strip in its final state box by box, left to right: MON · TUE · WED · THU · FRI · SAT · SUN — then check the FILLED boxes in fill order against the chain: FRIDAY = day after tomorrow · THURSDAY = tomorrow · WEDNESDAY = today · TUESDAY = yesterday.
3. Check every tag (OV-TAGS) sits under its own box and no other: DAY AFTER TOMORROW under FRIDAY, TOMORROW under THURSDAY, TODAY under WEDNESDAY, YESTERDAY under TUESDAY.
4. Check the answer chip and the end chip word by word against Section 5. One wrong or out-of-order weekday name anywhere — strip, tag, chip, caption or title — fails the export. Fix the overlay, never explain it away.
5. Search the assembled Part 1 (video, overlays, caption, title, thumbnail) for weekday names: Friday, inside the question, is the only one allowed to exist. Anything else is a leak — remove it and re-check.

Clue and chain checks

- The strip fills in exactly four steps, one box per step, in the order FRIDAY → THURSDAY → WEDNESDAY → TUESDAY, marching leftward from the fifth box to the second. MON, SAT and SUN never fill.
- Each fill lands ON its narration line — not before the narrator names the day, not after he has moved on. A fill that arrives early is an answer leak inside Part 2's own pacing.

- F-11's false landing is allowed to feel final for no more than its own clip: F-12's "one more" correction must follow it in the very next clip, with no other clip between them.
- The forward check (F-14) is labelled as a check in the narration and never re-drawn as a second strip filling left-to-right.

Audio checks

- Listen to both parts end to end: one voice throughout, same pace, no clip where the narration is missing, doubled or paraphrased. Compare every line word by word with Section 6.
- F-06 opens with 2 full seconds of true silence — no music tail, no room tone, no breath. Measure it; do not estimate it.
- No dead air anywhere else: narration finishes inside its clip, and no clip is stretched to fill a gap.
- Kitchen sounds match their actions: the F-01 mug lands when the mug lands; F-14 has exactly four taps, one per step.

Final export check

- Thumbnail checked at profile-picture size: one question, one stuck face, nothing else readable.
- Part 1's title and caption lead with the question and contain no weekday name beyond the one inside the question.
- Export each part as 1080×1920 MP4. Post Part 1 with the pinned debate comment. Post Part 2 the next day — never the same day.
