OTT TITANS · PRODUCTION PACK

TWELVE COINS, ONE FAKE

FIND IT IN THREE WEIGHINGS

19 CLIPS · 10 SECONDS EACH	13 REFERENCES + 8 STILLS	NARRATION INSIDE EVERY PROMPT

WHAT YOU ARE GETTING

The complete production pack for this riddle: full analysis with the COMPLETE three-weighing decision tree checked branch by branch, the unique [COINS-2D] character and style lock, every reference prompt and weighing still in code order, Part 1 (riddle) and Part 2 (solution) scripts, standalone video prompts with the narration inside each one, the Agent master prompt, thumbnail, posting copy and the edit checklist — all in one file.

THE COMPLETE PRODUCTION PACK

Find It In Three Weighings — Complete production pack: full riddle analysis with the complete decision tree, unique character + style lock, every reference prompt, Part 1 + Part 2 scripts, standalone 10-second video prompts with narration inside, Agent master prompt, thumbnail, posting copy, edit checklist

The riddle in one line: Twelve coins look identical. One is fake and weighs slightly more or slightly less than the others — you do not know which coin, and you do not know which way. You have a balance scale and may use it exactly three times. Can you guarantee to find the fake coin, and say whether it is heavy or light?

The answer in one line (creator only — never in Part 1, never on the thumbnail): Yes. Weigh 4 against 4; then, on every branch, re-weigh a named mix of maybe-heavy, maybe-light and known genuine coins so that each outcome leaves at most three suspects with a known direction — and the third weighing names the coin and its direction. The complete tree is in Section 1 and it is watertight: all 24 possibilities (12 coins × heavy/light) were walked and simulated end to end before this pack was written.

How this pack is organised: Section 1 analyses the riddle and prints the COMPLETE decision tree — every branch of all three weighings, walked to a named coin and a heavy/light verdict. Section 4 locks the characters, the scale, the coins and the three rules that protect the proof. Section 7 gives every reference prompt in code order, including the verified stills every weighing shot is built from. Sections 8 and 9 give a standalone video prompt for every clip, with the narration inside each one. Section 10 is the Agent master prompt. Build in section order and nothing can drift.

The one warning that matters more in this book than in any other: an AI generator cannot be trusted to count twelve coins, to keep the same coin in the same role across clips, or to tip a scale the right way. So in this pack the coins are numbered ONLY by the editor, every weighing shot is built from a verified still with a named coin list, and the edit checklist requires pausing and counting coins pan by pan in every scale frame before export. A weighing with the wrong coins, or the wrong tip direction, does not merely look wrong — it teaches a wrong proof, and the take fails whatever it looks like.

INSIDE THIS PACK

CONTENTS

1. THE RIDDLE, ANALYSED 3
2. THE STORY IN 30 SECONDS + THE JOB IN 10 SIMPLE STEPS 7
3. EVERY SMALL NOTE (the details viewers catch on a rewatch) 7
4. STYLE + CHARACTER + MOVEMENT LOCK — [COINS-2D] 8
5. ALL CODES IN THIS PACK (the master code index — every code an agent needs) 9
6. THE SCRIPTS (original narration — these exact words go inside the prompts in Sections 8 and 9) 12
7. PART A — REFERENCE IMAGE PROMPTS (generate these first, in code order) 14
8. PART B — VIDEO PROMPTS, PART 1 (8 clips × 10 seconds, narration inside every prompt) 22
9. PART C — VIDEO PROMPTS, PART 2 (11 clips × 10 seconds, narration inside every prompt) 28
10. PART D — AGENT MASTER PROMPT (paste ONCE, the Agent builds all 19 clips) 35
11. THUMBNAIL (Part 1 — the riddle's question only, never the answer) 37
12. POSTING COPY 38
13. EDIT, CHECK, EXPORT (the checklist) 39
14. OWNERSHIP 40

SECTION 1

THE RIDDLE, ANALYSED

01

The beat map

Beat	Time	What happens	What the viewer is thinking
1. The twelve coins	0:00–0:10	Twelve identical blank coins slide from the pouch into the tray	"They really do all look the same."
2. Heavy or light?	0:10–0:20	One coin is held up: the fake could be heavier OR lighter — two unknowns, not one	"So I don't even know what I'm looking for."
3. Three weighings only	0:20–0:30	Three blank weighing cards are tapped out on the table. There is no fourth	"Three? For twelve coins?"
4. No guessing	0:30–0:40	The presenter refuses every shortcut in front of the blank board	The loopholes close before they open
5. Twenty-four possibilities	0:40–0:50	The count is stated: 12 coins × 2 directions = 24 possible answers to separate	"That sounds impossible in three."
6. One by one fails	0:50–1:00	Testing single coins against nothing visibly goes nowhere	"Right — the scale needs a plan, not patience."
7. The plan comes first	1:00–1:10	Both characters face the blank board; the nod	The method, not the scale, is the puzzle
8. The question	1:10–1:20	2 seconds of silence, then the question + comments hook	The viewer starts designing weighings in the comments
9–19. The solution	Part 2	The tree is walked branch by branch: balance path, left-tip path, mirror path	"Every branch ends. There is nowhere for the fake to hide."

The answer — and why it works

The whole solution rests on one habit: **never ask "which coin is fake?" — ask "what will each outcome teach me?"** A balance scale has three outcomes — left pan drops, right pan drops, balance — so three weighings can distinguish up to 3 × 3 × 3 = **27** different outcome-paths. The riddle hides **24** possibilities (12 coins, each either heavy or light). 24 fits inside 27, so a complete plan is possible — but only just, and only if every weighing is designed so that **each of its three outcomes leaves a small, labelled group of suspects whose heavy/light direction is already known**.

The labels. Before anything moves, the EDITOR labels the coins 1 to 12 by their tray positions (top row 1–4, middle row 5–8, bottom row 9–12 — see REF-TABLE). The labels live beside the coins as editor chips, never on the coins. A coin's *status* changes as the tree is walked: a coin is a **suspect** until a weighing proves it **genuine**; after a tip, a suspect becomes **maybe-heavy** (it could only be the fake if it is heavy) or **maybe-light**. Those status words are the whole game: a maybe-heavy coin can never be the light fake, and that is what makes the last weighing decisive.

THE COMPLETE DECISION TREE (the proof — every branch walked to a verdict)

Read a line as: weighing → outcome → what is now known → next step. **W** = weighing. **G** = a known genuine coin (any coin a previous outcome has cleared). The tree was simulated for all 24 fake possibilities before this pack was written; every simulation ended at the correct coin with the correct direction.

WEIGHING 1 (W1) — coins 1, 2, 3, 4 against coins 5, 6, 7, 8. Coins 9, 10, 11, 12 wait aside.

Branch A — W1 BALANCES

All 8 weighed coins are genuine. The fake is one of 9, 10, 11, 12 (direction still unknown).

W2-A — coins 9, 10, 11 against three genuine coins (use 1, 2, 3). Coin 12 waits aside.

W2-A outcome	What it means	W3 — the final weighing	Verdicts
Balances	9, 10, 11 are genuine too	12 against a genuine coin (use 1)	12 drops its pan → **12 HEAVY** · 12's pan rises → **12 LIGHT** · balance is impossible (it would mean no coin is fake)
Left pan (9, 10, 11) drops	One of 9, 10, 11 is HEAVY (they outweigh genuine coins)	9 against 10	9 drops → **9 HEAVY** · 10 drops → **10 HEAVY** · balance → **11 HEAVY**
Left pan rises	One of 9, 10, 11 is LIGHT	9 against 10	9 rises → **9 LIGHT** · 10 rises → **10 LIGHT** · balance → **11 LIGHT**

Branch A accounts for 4 coins × 2 directions = **8 possibilities, all resolved.**

Branch B — W1 TIPS, LEFT PAN DROPS

The fake is a **heavy coin from the left pan (1, 2, 3, 4)** or a **light coin from the right pan (5, 6, 7, 8)**. Coins 9, 10, 11, 12 are genuine.

W2-B — LEFT pan: 1 (maybe-heavy), 2 (maybe-heavy), 5 (maybe-light). RIGHT pan: 3 (maybe-heavy), 6 (maybe-light), 9 (genuine). ASIDE: 4 (maybe-heavy), 7 (maybe-light), 8 (maybe-light). This mix is the heart of the whole riddle: it is built so each outcome blames a different small group.

W2-B outcome	The only possible causes	Suspects left	W3 — the final weighing	Verdicts
Balances	The fake was not on the scale	4 (H), 7 (L), 8 (L)	7 against 8	7 rises → **7 LIGHT** · 8 rises → **8 LIGHT** · balance → **4 HEAVY**
Left pan drops	A left coin is heavy (1 or 2) or the right pan's maybe-light coin is light (6)	1 (H), 2 (H), 6 (L)	1 against 2	1 drops → **1 HEAVY** · 2 drops → **2 HEAVY** · balance → **6 LIGHT**
Left pan rises	The right pan's maybe-heavy coin is heavy (3) or the left pan's maybe-light coin is light (5)	3 (H), 5 (L)	3 against a genuine coin (use 9)	3 drops → **3 HEAVY** · balance → **5 LIGHT** · 3 rising is impossible

Branch B accounts for 4 heavy + 4 light = **8 possibilities, all resolved.** Note the left-rise outcome leaves only TWO suspects — that slack is exactly the 27-minus-24 slack in the counting argument, appearing where the design intends it.

Branch C — W1 TIPS, RIGHT PAN DROPS (the mirror of B)

The fake is a **heavy coin from the right pan (5, 6, 7, 8)** or a **light coin from the left pan (1, 2, 3, 4)**. Coins 9, 10, 11, 12 are genuine. Mirror Branch B exactly — every maybe-heavy and maybe-light swaps sides with its mirror coin:

W2-C — LEFT pan: 5 (maybe-heavy), 6 (maybe-heavy), 1 (maybe-light). RIGHT pan: 7 (maybe-heavy), 2 (maybe-light), 9 (genuine). ASIDE: 8 (maybe-heavy), 3 (maybe-light), 4 (maybe-light).

W2-C outcome	Suspects left	W3 — the final weighing	Verdicts
Balances	8 (H), 3 (L), 4 (L)	3 against 4	3 rises → **3 LIGHT** · 4 rises → **4 LIGHT** · balance → **8 HEAVY**

W2-C outcome	Suspects left	W3 — the final weighing	Verdicts
Left pan drops	5 (H), 6 (H), 2 (L)	5 against 6	5 drops → **5 HEAVY** · 6 drops → **6 HEAVY** · balance → **2 LIGHT**
Left pan rises	7 (H), 1 (L)	7 against a genuine coin (use 9)	7 drops → **7 HEAVY** · balance → **1 LIGHT** · 7 rising is impossible

Branch C accounts for another **8 possibilities, all resolved. Total: 8 + 8 + 8 = 24 of 24.** No branch is left open, no branch needs a fourth weighing, and no verdict ever depends on a guess.

The trap most people fall into

Three traps, in the order people fall into them. **Trap 1 — weigh the coins one by one, or in pairs.** A balance scale only compares groups; a coin alone against an empty pan teaches nothing, and pair-by-pair testing needs far more than three weighings (F-06 shows this failing on purpose). **Trap 2 — split 6 against 6.** With no coins aside, there is no known genuine coin in reserve and no small suspect group after a tip: a tip on 6v6 leaves 12 suspects with one weighing gone. The 4-4-4 split is not a preference, it is forced by the counting: the aside group is what makes Branch A so clean. **Trap 3 — forgetting the direction is part of the answer.** Finding *a* coin that behaves oddly is not enough; the riddle demands heavy-or-light as well. Plans that "find the odd coin" but arrive at the last weighing with its direction still unknown have solved 12 possibilities, not 24 — and fail.

The logic, checked end to end (no gaps, no second hidden answer)

1. **The counting bound.** Three weighings give at most 27 outcome-paths; the riddle has 24 possibilities. A solution must waste at most 3 paths. This plan wastes exactly 3: the impossible balance in W3 after Branch A's double balance, and the two impossible rises in the W3 genuine-coin tests of Branches B and C. Every other outcome-path is used exactly once.
2. **W1 is forced in shape.** Any first weighing of k vs k leaves the aside group, the heavy-left/light-right group and its mirror. Only k = 4 keeps all three groups at or below 8 possibilities each. k = 5 leaves 10 on a tip; k = 3 leaves 12 aside. 4-4-4 is the unique balanced opening.
3. **Branch A is fully decided by direction.** Against genuine coins, a tip's direction IS the fake's direction — there is no other way for suspects to outweigh (or underweigh) genuine coins. That is why W3 in Branch A only has to find *which* of three same-direction suspects it is, which one pair-weighing always does.
4. **W2-B's mix is verified outcome by outcome** in the table above: each outcome's causes were enumerated from the suspect statuses, and no outcome has a cause outside its listed group. The same check was run for the mirror W2-C.
5. **Every W3 is a forced test.** Two maybe-same-direction coins against each other (the dropper/rise is the fake; balance convicts the third), or one maybe-heavy coin against a genuine coin (drop = that coin, heavy; balance = the maybe-light coin waiting aside). No W3 has an outcome that leaves two possibilities alive.
6. **Simulation audit:** all 24 possibilities (coin 1–12 × heavy/light) were run through the tree mechanically before this pack was written, and all 24 ended at the correct coin with the correct direction. If any later draft of this pack changes a single coin in any weighing, the audit must be re-run — one swapped coin quietly breaks a branch.
7. **"Exactly three times" is honoured.** Every root-to-leaf path uses W1, W2 and exactly one W3 — never fewer (the verdict needs the third weighing even when the coin is known early, because the direction may still be open) and never more.

Camera — exactly how it moves

- **Hard cuts** between the set-ups (room wide / board / table top-down / scale close). This is a methodical riddle; the camera behaves like a careful examiner.
- **Counting and weighing frames are LOCKED.** Every scale frame, the tray top-down and every STILLS-FIRST clip holds perfectly still. A moving camera makes a viewer distrust a count, and this video is nothing but counts.

- **One tilt only:** F-05 tilts from the tray up to the scale — the single camera move in either video, saved for the moment the two objects are named as one problem.
- **The board fills the frame only twice** — empty in Part 1 (F-04, F-07), and carrying the editor-drawn tree in Part 2's final shot (F-19). The contrast is the payoff; protect it by keeping the board aggressively blank until then.

Sound — what the videos carry

- **One narrator only** — the locked voice of Section 6, inside every clip. Characters never speak and never move their lips; Sana's scepticism is arms and eyebrows, Elias's certainty is nods and taps.
- **Coins are the percussion:** a tray clink in F-01, single coin-on-brass ticks in F-02 and F-06, chain settles in the weighing clips. Keep them sparse and exact — a coin sound with no coin moving is a continuity error a viewer can hear.
- **Scripted silence:** the first 2 seconds of F-08 are completely silent — the only true silence in either video. Do not let music bleed under it.
- **Part 2 is brisker, not louder:** the same voice at the same pace, with confident low music. The tree clips (F-11 to F-18) carry almost no coin sounds except the chain settle — the information is visual there, and the checklist verifies it frame by frame.

On-screen text — the complete list

ALL text, numbers, labels, arrows and diagrams are drawn in the editor (Section 5, OV codes). Nothing is ever generated inside a frame — and in this book that rule is absolute, because a single generated number on a coin would assign it an identity the proof never gave it.

Where	Text / graphic	When
F-01	"12 COINS · 1 FAKE" (OV-TITLE)	As the coins settle in the tray
F-02	Chips "HEAVY?" and "LIGHT?" either side of the held coin (OV-HEAVYLIGHT)	On "a little more, or a little less"
F-03	Numbers "1 · 2 · 3" appearing over the three cards, then a struck-through "4" over the empty space (OV-CARDS)	Timed to the three taps and the stop
F-05	Counter building "12 COINS × 2 = 24 POSSIBILITIES" (OV-COUNT24)	Built piece by piece across the clip
F-08	Banner: "FIND IT IN 3 WEIGHINGS?" + low banner "COMMENT YOUR PLAN ↓" (OV-QUESTION)	After the silence
F-09	Coin chips 1–12 appear beside the tray coins (OV-LABELS)	Part 2 only — the labels are born here
F-10	Weighing card "WEIGHING 1" + chips on both pans + "ASIDE" chip on the tray (OV-W1)	Held for the whole clip
F-11 to F-18	The matching OV-W2 / OV-W3 cards, pan chips, aside chips, and outcome arrows (OV-TIP)	One weighing per clip, exactly as Section 9's per-clip notes specify
F-14	Status chips "MAYBE-HEAVY" over the left pan space, "MAYBE-LIGHT" over the right, "GENUINE" over the tray space (OV-STATUS)	Timed to the narration's three clauses

Where	Text / graphic	When
F-19	The COMPLETE decision tree drawn on the board (OV-TREE) + end chip "3 WEIGHINGS · 24 POSSIBILITIES · 0 LUCK" (OV-END)	Final frames only

SECTION 2

THE STORY IN 30 SECONDS + THE JOB IN 10 SIMPLE STEPS

02

The story in 30 seconds: A challenger empties twelve identical coins onto the table and asks the impossible question: one is fake, heavier or lighter, nobody knows — find it, and name its direction, in three weighings. Part 1 refuses every shortcut and ends on the count that makes it sound impossible: 24 possibilities, 3 weighings. Part 2 labels the coins and walks the tree — 4 against 4, then a mixed weighing whose every outcome leaves at most three suspects with a known direction, then one last test that names the coin and its weight. Every branch ends.

The job in 10 simple steps:

1. Read Section 1 once — including the whole tree — so the plan (W1: 4v4 · Branch A: 3v3 genuine · Branch B/C: the mixed weighing) is in your head before anything is generated.
2. Generate the 13 reference images from Section 7, in code order, starting with REF-00. Check each one against its CHECK line before moving on.
3. Count REF-TABLE out loud (4 + 4 + 4 = 12, all blank). Do not skip this. This plate fixes which coin is which for the entire production.
4. Build the 8 weighing stills (the STILL codes in Section 7) and count every pan and tray in each one against its coin list. A wrong still is never used.
5. Generate Part 1 (Section 8, F-01 to F-08) with the narration inside each prompt. Listen-check every clip against Section 6; regenerate only the failures.
6. Generate Part 2 (Section 9, F-09 to F-19) the same way, building every weighing clip from its verified still (Stills-First rule, Section 4).
7. Join each part in order. Trim to the narration; never stretch a clip to fill silence. Keep F-08's opening 2 seconds of silence intact.
8. Add the editor overlays from Section 5 exactly where Section 13 says — coin chips first, then weighing cards, status chips, arrows, and the full tree last. The tree is drawn by you in the editor, panel by panel, from Section 1's tables.
9. Run the full Section 13 checklist — above all the pan-by-pan coin count and the tip-direction check on every scale frame.
10. Post Part 1 with Section 12's copy and pin the debate comment. Post Part 2 the next day. Never post both on the same day.

SECTION 3

EVERY SMALL NOTE (THE DETAILS VIEWERS CATCH ON A REWATCH)

03

- **The coins never change.** Twelve coins, blank, identical, in every plate, still and clip. A coin that gains a scratch, a shine difference or a size difference has — in the viewer's eyes — been identified, and the riddle is

rigged from that frame on. Reject any take where one coin reads as special.

- **The numbering is born in Part 2.** In Part 1 no coin carries a number, a chip or a highlight — the labels literally do not exist yet. F-09 is the first frame of the whole production where a number appears, and it appears beside all twelve coins at once.
- **The genuine coins in W2-A are 1, 2, 3 on purpose.** Any three of the eight cleared coins would do; the pack fixes 1, 2, 3 so every producer, editor and thumbnail agrees. Do not improvise a different genuine set in a retake.
- **Coin 9 does double duty** — it is the genuine coin placed on the right pan in both W2-B and W2-C, and the genuine partner in the two W3 genuine-tests. That is legal (it was cleared by W1's tip) and it is in the tree; the overlay chips must show it, because sharp viewers will ask why that coin keeps appearing.
- **The aside coins never touch the scale in their branch's W2** — 12 in Branch A; 4, 7, 8 in Branch B; 8, 3, 4 in Branch C. An aside coin drifting onto a pan in a still is the single most likely production error in this book; the stills' CHECK lines exist for it.
- **The scale's pointer and beam start level in every still.** Tip versions of the W3 stills are made in the EDIT (rotate the beam/pan layer of the verified still by the editor's arrow amount), never by generating a second, differently-arranged still. Same coins, same pans — only the tilt changes.
- **Sana never places a coin.** Only Elias's hands (teal cuff, wristband on the RIGHT wrist) touch coins. One pair of hands = one experimenter = no sleight-of-hand readings in the comments.
- **The pouch is empty from F-19 on** — and visibly ordinary in F-01. It is a container, never a hiding place; no coin is ever in it after the opening pour.
- **Three cards, always three.** The weighing cards appear in F-03 and as overlay cards in Part 2. A fourth card, even decorative in the background, contradicts the riddle's one hard limit.
- **No clock, no timer, no countdown graphics** are used anywhere. The limit is weighings, not time — a timer would teach the wrong constraint.
- **The word "fake" is the only verdict word in Part 1.** "Heavy" and "light" appear only as the open question (OV-HEAVYLIGHT). The first time a specific coin is called heavy or light is deep inside Part 2's tree — protect that order.

SECTION 4

STYLE + CHARACTER + MOVEMENT LOCK — [COINS-2D]

04

Paste this lock at the start of any new prompt for this story. It overrides any other style instruction.

STYLE: 2D flat cartoon illustration / animation only — hand-drawn storybook cartoon, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. NEVER a photo, NEVER realistic, NEVER 3D, NEVER Pixar, NEVER CGI, NEVER a stick figure drawing. Vertical 9:16 throughout.

THE CHARACTERS (exact — never redesign, never swap a feature):

- **ELIAS COLE, THE PRESENTER:** ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist.
- **SANA MIR, THE CHALLENGER:** SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat

shoes, an alert sceptical expression.

- **THE HANDS:** THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun.
- **THE SCALE (a character in this story — treat it like one):** THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
- **THE COINS:** THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.

MOVEMENT RULES (every clip): movements are small, slow and precise — a pour, a tap, a point, a nod, one coin lifted and set down at a time. Nobody hurries; a hurried hand reads as a trick. The camera is hard cuts and locked frames, with the single tilt of F-05 as the only move. Characters never speak and never move their lips; all speech is the narrator. Coins are never flipped, spun, palmed, stacked or dropped.

THE THREE RULES THAT PROTECT THE RIDDLE

1. **THE COUNT RULE:** every coin group on screen must match its named list exactly — 12 in the tray (4 + 4 + 4), 4-4-4 at W1, 3-3-1 in Branch A's W2 (one suspect aside), 3-3-3 in the mixed W2 of Branches B and C, and exactly TWO coins on the whole scale in every W3. Coins sit in a single layer, separate, countable at a glance. Count every group in every take and every still, pan by pan, before accepting it. A wrong count fails the take, whatever it looks like.
2. **THE IDENTITY RULE:** coins are identical and blank; identity exists ONLY as editor chips beside the coins, added in the edit in the order Section 13 fixes. A generated number, letter, mark, colour difference or size difference on any coin = regenerate. The same numbered coin keeps the same role in every clip of its branch — the editor's chip map (Section 5) is the single source of truth, and a coin never changes pans or groups between the still, the clip and the overlay.
3. **THE DIRECTION RULE:** a scale may only tip the way the tree says, and generated beams are never trusted to choose. Every weighing clip is built STILLS-FIRST from its verified still with the beam level; the clip animates at most a small settle, and the actual outcome tilt — left drops, right drops, or balance — is shown by the editor's OV-TIP arrow and, where a tilt must appear on the scale itself, by rotating the verified still's beam layer in the edit. A take whose beam ends tilted the wrong way, or tilted in a neutral presentation shot (F-10, F-11, F-15, F-18), fails — it teaches a wrong proof.

SECTION 5

ALL CODES IN THIS PACK (THE MASTER CODE INDEX — EVERY CODE AN AGENT NEEDS)

05

Reference image codes (generate FIRST, in this order)

Code	What it is	Save as
REF-00	THE CAST SHEET (generate and check FIRST)	B03_REF00_Cast
REF-PRES	ELIAS ALONE (single-character reference)	B03_REF_Presenter

Code	What it is	Save as
REF-CHAL	SANA ALONE (single-character reference)	B03_REF_Challenger
REF-HANDS	THE PRESENTER'S HANDS (the hands lock)	B03_REF_Hands
REF-TABLE	THE TRAY FROM ABOVE (the count plate — the most checked reference in the pack)	B03_REF_TrayTop
PROP-SCALE	THE BALANCE SCALE (prop reference)	B03_PROP_Scale
PROP-COINS	THE COIN SET ON THE TABLE (prop reference)	B03_PROP_Coins
PROP-POUCH	THE COIN POUCH (prop reference)	B03_PROP_Pouch
PROP-CARDS	THE THREE WEIGHING CARDS (prop reference)	B03_PROP_Cards
PL-1	ASSAY ROOM, EMPTY (background only — the master set)	B03_PL1_AssayRoom
PL-2	SCALE TABLE CLOSE, EMPTY (background only)	B03_PL2_ScaleClose
PL-3	THE BOARD WALL, EMPTY (background only)	B03_PL3_BoardWall
PL-4	TABLE TOP-DOWN, EMPTY (background only)	B03_PL4_TableTop

Weighing still codes (build AFTER the references, BEFORE the Part 2 clips — every weighing clip is built from its still)

Code	What it is	Save as
STILL-W1	WEIGHING ONE still — 4 vs 4, 4 aside	B03_STILL_W1
STILL-W2A	BALANCE PATH, WEIGHING TWO still — 3 suspects vs 3 genuine	B03_STILL_W2A
STILL-W2B	LEFT-TIP PATH, WEIGHING TWO still — 1,2,5 vs 3,6,genuine	B03_STILL_W2B
STILL-W2C	MIRROR PATH, WEIGHING TWO still — 5,6,1 vs 7,2,genuine	B03_STILL_W2C
STILL-W3A	WEIGHING THREE still — 12 vs genuine	B03_STILL_W3A
STILL-W3B	WEIGHING THREE still — 9 vs 10	B03_STILL_W3B
STILL-W3C	WEIGHING THREE still — 7 vs 8	B03_STILL_W3C
STILL-W3D	WEIGHING THREE still — the branch test pair	B03_STILL_W3D

The chip map (the editor's single source of truth for coin identity): labels follow the tray — top row, left to right: **1, 2, 3, 4** · middle row: **5, 6, 7, 8** · bottom row: **9, 10, 11, 12**. Weighing groups: **W1** left 1·2·3·4 / right 5·6·7·8 / aside 9·10·11·12 · **W2-A** left 9·10·11 / right 1·2·3 (genuine) / aside 12 · **W2-B** left 1·2·5 / right 3·6·9 (genuine) / aside 4·7·8 · **W2-C** left 5·6·1 / right 7·2·9 (genuine) / aside 8·3·4 · **W3 tests** exactly as Section 1's tables name them.

Overlay codes (ALL made in the EDITOR — never generated inside a clip)

Code	Text / graphic	Used in
OV-TITLE	"12 COINS · 1 FAKE" — bold white block letters, black outline	F-01
OV-HEAVYLIGHT	Two chips: "HEAVY?" and "LIGHT?"	F-02
OV-CARDS	"1 · 2 · 3" over the cards + a struck-through "4" over the empty space	F-03
OV-COUNT24	Counter: "12 COINS × 2 = 24 POSSIBILITIES" built in pieces	F-05
OV-QUESTION	Banner: "FIND IT IN 3 WEIGHINGS?" + low banner "COMMENT YOUR PLAN ↓"	F-08
OV-LABELS	Number chips 1–12 beside the tray coins (per the chip map)	F-09, then every Part 2 clip
OV-W1 / OV-W2 / OV-W3	Weighing cards: "WEIGHING 1" / "WEIGHING 2" / "WEIGHING 3" + the pan and aside chips for that weighing	F-10 to F-18
OV-STATUS	Status chips: "MAYBE-HEAVY" · "MAYBE-LIGHT" · "GENUINE" · and (Branch A) "SUSPECT"	F-11, F-14, F-15, F-18
OV-TIP	Outcome arrows: a bold arrow on the dropping pan, a rising arrow on the rising pan, or "BALANCE" across the beam	Every Part 2 outcome moment
OV-TREE	The COMPLETE decision tree, drawn panel by panel from Section 1's tables (all three branches, every leaf a coin + HEAVY/LIGHT)	F-19 (built up during F-11 to F-18 as small branch excerpts in the corner — optional; the full tree appears only in F-19)
OV-VERDICT	Verdict chip on a named coin: "7 — LIGHT" style (Part 2 only, exactly as the tree's tables word them)	F-12, F-13, F-16, F-17, F-18
OV-END	End chip: "3 WEIGHINGS · 24 POSSIBILITIES · 0 LUCK"	F-19

Clip codes

Code	Title	Part
F-01	THE TWELVE COINS	Part 1 (80 seconds)
F-02	HEAVY OR LIGHT?	Part 1 (80 seconds)
F-03	THREE WEIGHINGS ONLY	Part 1 (80 seconds)
F-04	NO GUESSING COUNTS	Part 1 (80 seconds)
F-05	TWENTY-FOUR POSSIBILITIES	Part 1 (80 seconds)
F-06	ONE BY ONE FAILS	Part 1 (80 seconds)
F-07	THE PLAN COMES FIRST	Part 1 (80 seconds)
F-08	THE QUESTION + THE PAUSE	Part 1 (80 seconds)
F-09	RECAP — THE PLAN THAT ALWAYS WORKS	Part 2 (110 seconds)

Code	Title	Part
F-10	WEIGHING ONE — FOUR AGAINST FOUR	Part 2 (110 seconds)
F-11	IF IT BALANCES — THREE SUSPECTS AGAINST THREE GENUINE	Part 2 (110 seconds)
F-12	BALANCE AGAIN — COIN TWELVE, TESTED	Part 2 (110 seconds)
F-13	A TIP WITH A KNOWN DIRECTION	Part 2 (110 seconds)
F-14	IF IT TIPS LEFT — HEAVY LEFT, LIGHT RIGHT	Part 2 (110 seconds)
F-15	WEIGHING TWO — THE MIXED WEIGHING	Part 2 (110 seconds)
F-16	BALANCE IN WEIGHING TWO — THE ASIDE THREE	Part 2 (110 seconds)
F-17	TIPS IN WEIGHING TWO — THE LAST TESTS	Part 2 (110 seconds)
F-18	THE MIRROR — TIPS RIGHT	Part 2 (110 seconds)
F-19	EVERY BRANCH ENDS — OUTRO	Part 2 (110 seconds)

Weighing codes (used in the scripts, overlays and checklist)

Code	The weighing	Exact coin list
W1	Weighing 1	Left 1·2·3·4 — Right 5·6·7·8 — Aside 9·10·11·12
W2-A	Branch A (W1 balanced), Weighing 2	Left 9·10·11 — Right 1·2·3 genuine — Aside 12
W2-B	Branch B (W1 left dropped), Weighing 2	Left 1·2·5 — Right 3·6·9 genuine — Aside 4·7·8
W2-C	Branch C (W1 right dropped), Weighing 2	Left 5·6·1 — Right 7·2·9 genuine — Aside 8·3·4
W3	Weighing 3	The branch test named in Section 1's tables — always exactly TWO coins on the scale

SECTION 6

THE SCRIPTS (ORIGINAL NARRATION — THESE EXACT WORDS GO INSIDE THE PROMPTS IN SECTIONS 8 AND 9)

06

VOICE + SOUND RULE (the whole book): GENERATE THE AUDIO WITH EACH CLIP — the narration is inside every video prompt. One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series — the exact same voice, tone and speed in all 19 clips. The narrator says each line EXACTLY, word for word, with nothing added and nothing removed, and there is no other speech; characters never speak and never move their lips. Under the narration: the ambient sound noted per clip. **Listen-back rule:** after generating each clip, check the narration words are exactly right and the voice

has not changed; if one word is wrong, regenerate THAT clip only — never re-record or patch a single word with a different voice. **Pause rule:** F-08 begins with 2 full seconds of complete silence before its line; the held beats inside the other lines are paced by the timelines, not rushed.

Part 1 — the riddle video (answer withheld)

Line	Clip	Time	Narration (exact words)
1	F-01	0–10s	Twelve coins. They look exactly alike — same size, same shine, same face. But one of them is fake.
2	F-02	10–20s	The fake coin weighs a little more, or a little less, than the other eleven. Nobody knows which coin. Nobody knows which way.
3	F-03	20–30s	You get one balance scale, and you may use it exactly three times. Three weighings. That is all you get.
4	F-04	30–40s	No labels help you. No guessing counts. Your plan must work every single time, whichever coin is fake.
5	F-05	40–50s	One weighing can balance, tip left, or tip right. Three weighings must sort twenty-four possibilities: twelve coins, heavy or light.
6	F-06	50–60s	Check the coins one by one, and you will run out of weighings long before you run out of suspects.
7	F-07	60–70s	So the real puzzle is not the scale. It is the plan you must write before the first coin ever moves.
8	F-08	70–80s	Can you guarantee to find the fake in three weighings — and say whether it is heavy or light? Answer tomorrow.

Part 2 — the solution video

Line	Clip	Time	Narration (exact words)
9	F-09	0–10s	Yesterday's coin riddle. Twelve coins, one fake, heavy or light unknown, and three weighings only. Here is the plan that always works.
10	F-10	10–20s	Label the coins one to twelve. Weighing one: coins one, two, three, four against five, six, seven, eight. The rest wait aside.

Line	Clip	Time	Narration (exact words)
11	F-11	20–30s	If weighing one balances, the fake hides among nine to twelve. Weighing two: nine, ten, eleven against three known genuine coins.
12	F-12	30–40s	If weighing two balances, coin twelve is the fake. Weighing three: coin twelve against a genuine coin tells you heavy or light.
13	F-13	40–50s	If weighing two tips, the tip tells you heavy or light. Weigh nine against ten: the odd one is fake; balance names eleven.
14	F-14	50–60s	If weighing one tips left down, the fake is heavy on the left, or light on the right. The four aside are genuine.
15	F-15	60–70s	Weighing two: one, two and five against three, six and a genuine coin. Four, seven and eight wait aside.
16	F-16	70–80s	If weighing two balances, the fake is four, seven or eight. Weigh seven against eight: the rising side is light; balance names four.
17	F-17	80–90s	If weighing two tips left, test one against two. If it tips right, test three against a genuine coin. Each ending names the fake.
18	F-18	90–100s	If weighing one tips right, mirror the same plan: five, six and one against seven, two and a genuine coin. Every branch still ends.
19	F-19	100–110s	Every branch ends the same way: one coin named, and one word — heavy, or light. Three weighings. Twenty-four possibilities. Zero luck.

SECTION 7

PART A — REFERENCE IMAGE PROMPTS (GENERATE THESE FIRST, IN CODE ORDER)

07

How to use every prompt in this pack: paste the WHOLE block, exactly as written. Every block opens with the style order and closes with its own negative block and CHECK line — that repetition is deliberate; it is what stops the generator drifting into photos, 3D, or marked coins. Generate REF-00 first and check it; upload it as a reference together with every later prompt that names it.

REF-00 · THE CAST SHEET (generate and check FIRST) → save as B03_REF00_Cast

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. Character reference sheet on a plain warm-cream background, vertical 9:16, TWO figures standing side by side, full body, both facing the camera, with clear empty space between them: 1) ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. 2) SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression, holding a plain dark drawstring coin pouch with no markings in her left hand. Both faces are simple, friendly and clear.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: exactly two people; the wristband is on his RIGHT wrist; her hair is in a low ponytail; the pouch is plain and dark.
```

REF-PRES · ELIAS ALONE (single-character reference) → save as B03_REF_Presenter

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Single-character reference on a plain warm-cream background, vertical 9:16, one figure only, full body, facing the camera, standing relaxed with his hands at his sides: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: teal blazer, cream shirt, sleeves rolled to the forearm, dark wristband on the RIGHT wrist, clean-shaven.
```

REF-CHAL · SANA ALONE (single-character reference) → save as B03_REF_Challenger

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Single-character reference on a plain warm-cream background, vertical 9:16, one figure only, full body, facing the camera, arms folded in friendly scepticism: SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: low ponytail, rust-red cardigan, white top; no pouch in this sheet (the pouch is PROP-POUCH).
```

REF-HANDS · THE PRESENTER'S HANDS (the hands lock) → save as B03_REF_Hands

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Close reference image on the warm cream assay table, vertical 9:16, no faces: THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun. The right hand is setting ONE plain blank silver-grey coin down onto a round brass scale pan; two more blank coins rest on the table beside the pan. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: wristband on the RIGHT wrist; teal + cream cuffs on both arms; exactly three coins visible in total; all blank.
```

REF-TABLE · THE TRAY FROM ABOVE (the count plate — the most checked reference in the pack) → save as B03_REF_TrayTop

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Top-down reference image of a rectangular warm wooden tray on a cream table, vertical 9:16, no people, no hands: THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical, laid out inside the tray in THREE neat rows of FOUR coins, every coin separate, none touching, none stacked, the empty dark drawstring pouch resting above the tray.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: count the coins out loud — row by row 4 + 4 + 4 = 12. If the count is not exactly twelve, regenerate. This plate is the numbering source: the editor labels the top row 1–4, the middle row 5–8, the bottom row 9–12.
```

PROP-SCALE · THE BALANCE SCALE (prop reference) → save as B03_PROP_Scale

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Prop reference image on a plain slate-blue background, vertical 9:16, no people: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. The beam is dead level and both pans are empty.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: one pillar, one beam, two pans, no markings anywhere; pans empty and level.
```

PROP-COINS · THE COIN SET ON THE TABLE (prop reference) → save as B03_PROP_Coins

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Prop reference image, three-quarter view of the warm cream assay table, vertical 9:16, no people: THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical, arranged in a shallow arc on the table, every coin separate and fully visible, none stacked.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: count them — exactly twelve, all blank, all the same size.
```

PROP-POUCH · THE COIN POUCH (prop reference) → save as B03_PROP_Pouch

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Prop reference image on the warm cream assay table, vertical 9:16, no people: one plain dark charcoal drawstring pouch, cloth texture, the drawstring loosely closed, completely unmarked — no logo, no stitching pattern, no text — resting beside one single plain blank silver-grey coin for scale.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: the pouch is plain and dark; exactly one coin beside it; nothing written anywhere.
```

PROP-CARDS · THE THREE WEIGHING CARDS (prop reference) → save as B03_PROP_Cards

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Prop reference image on the warm cream assay table, vertical 9:16, no people: three large plain cream cards of identical size laid in a neat row with small gaps between them, every card COMPLETELY BLANK on its face — the editor adds the weighing numbers later; a plain wooden pencil lies below the row.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: exactly three cards, all blank, all the same size.
```

PL-1 · ASSAY ROOM, EMPTY (background only — the master set) → save as B03_PL1_AssayRoom

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Empty background plate, vertical 9:16, no people, no coins: a calm assay-room interior — deep slate-blue walls, a long warm cream wooden table across the middle of the frame, a large plain blank board panel on the wall behind the table, a small window with soft even light at the left, bare floor below. The table surface is completely empty.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: no scale, no coins, no people, nothing on the board, table empty.
```

PL-2 · SCALE TABLE CLOSE, EMPTY (background only) → save as B03_PL2_ScaleClose

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Empty background plate, vertical 9:16, no people: a closer view of the warm cream assay table against the deep slate-blue wall, the table surface completely empty and clean, soft even light, generous clean space in the upper third of the frame.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: table completely empty; no props of any kind.
```

PL-3 · THE BOARD WALL, EMPTY (background only) → save as B03_PL3_BoardWall

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Empty background plate, vertical 9:16, no people: the deep slate-blue assay-room wall with one very large plain blank board panel centred on it, its surface completely empty and evenly lit, the top edge of the cream table visible at the bottom of the frame.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: the board is completely blank — no grid, no writing, no marks.
```

PL-4 · TABLE TOP-DOWN, EMPTY (background only) → save as B03_PL4_TableTop

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Empty background plate, vertical 9:16, no people: a straight top-down view of the warm cream wooden assay table, its surface completely empty, wood grain running horizontally, soft even light with no harsh shadows.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: table completely empty; view is straight down, not angled.
```

THE WEIGHING STILLS (build these 8 after the references — every Part 2 weighing clip is built from its still)

How to use: paste the whole block; upload B03_PROP_Scale and B03_REF_TrayTop with it. Each still is generated with the beam LEVEL — outcome tilts are made later, in the edit, from these stills (Direction Rule). Count every still pan by pan against its arrangement line before saving it.

STILL-W1 · WEIGHING ONE still — 4 vs 4, 4 aside → save as B03_STILL_W1

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Production still, straight medium shot of the assay table, vertical 9:16, no people, no hands: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. On the scale: left pan exactly FOUR blank coins, right pan exactly FOUR blank coins, remaining FOUR blank coins in the tray beside the scale, beam level. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. Leave a small clean space beside every coin on the pans and in the tray (the editor adds numbered chips beside the coins later — the coins themselves stay blank).
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: count the coins pan by pan and in the tray out loud before accepting this still — the counts in the arrangement line are exact, and a still with a wrong count is never used, however good it looks.
```

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Production still, straight medium shot of the assay table, vertical 9:16, no people, no hands: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. On the scale: left pan exactly THREE blank coins, right pan exactly THREE blank coins, ONE suspect coin alone in the tray, beam level. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. Leave a small clean space beside every coin on the pans and in the tray (the editor adds numbered chips beside the coins later — the coins themselves stay blank).
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: count the coins pan by pan and in the tray out loud before accepting this still — the counts in the arrangement line are exact, and a still with a wrong count is never used, however good it looks.

SECTION 8

PART B — VIDEO PROMPTS, PART 1 (8 CLIPS × 10 SECONDS, NARRATION INSIDE EVERY PROMPT)

08

How to use: in Google Flow, for each clip upload the reference images named at the top of its prompt, paste the whole block, generate. The narration is inside the prompt — Flow creates the voice with the clip. Listen-check every clip against Section 6; regenerate only the failures. Editor overlays (Section 5, OV codes)

are NEVER part of a prompt — the spaces named in each timeline are left empty on purpose. Weighing clips are STILLS-FIRST: upload the named verified still and animate only what its prompt allows.

VOICE LOCK (inside every prompt below): One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series.

F-01 · THE TWELVE COINS (0:00–0:10) — Narration line 1

Upload first: B03_REF_TrayTop + B03_REF00_Cast

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.
SET: a top-down view of the warm cream assay table: the open dark drawstring pouch at the top edge and the wooden coin tray below it, the brass scale just out of focus at the top of the frame. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the challenger tips the pouch and exactly twelve blank identical coins slide into the wooden tray in three loose rows; the camera holds top-down and locked. 4–7s: the presenter's hand moves slowly over the rows without touching a coin, as if counting; every coin stays blank, the same size and the same shine. 7–10s: both characters lean in a little over the tray, studying the coins; leave the lower third clean and uncluttered (editor captions are added later).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Twelve coins. They look exactly alike — same size, same shine, same face. But one of them is fake." Under the narration: very soft thoughtful music plus a quiet room tone and the soft clink of coins settling in the wooden tray. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: a thirteenth coin anywhere, coins stacked in a pile, any coin marked or a different colour, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.
```

F-02 · HEAVY OR LIGHT? (0:10–0:20) — Narration line 2

Upload first: B03_REF00_Cast + B03_PROP_Scale

```
Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a
```

single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: the assay table in medium shot: the brass balance scale standing centre-frame with both pans empty and level, the coin tray at the left, a plain blank board on the slate-blue wall behind. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the presenter lifts one single blank coin from the tray, holds it up at eye level between thumb and forefinger, and studies it; the challenger watches, arms folded, sceptical. 4–7s: he sets the coin gently on the left pan; the beam does NOT move (one coin alone proves nothing and the scale must not pretend otherwise). 7–10s: he takes the coin back off the pan and returns it to the tray; both pans hang empty and level; leave the blank board behind them clean (the editor draws on it later).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "The fake coin weighs a little more, or a little less, than the other eleven. Nobody knows which coin. Nobody knows which way." Under the narration: very soft thoughtful music plus a quiet room tone and one faint metallic tick as the coin touches the brass pan. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: the beam tipping for a single coin against an empty pan, the presenter weighing a coin in his hand as if he could feel the difference, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-03 · THREE WEIGHINGS ONLY (0:20–0:30) — Narration line 3

Upload first: B03_PROP_Scale + B03_PROP_Cards

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: a close view of the assay table: the brass scale centre-frame, and in front of it three large completely BLANK weighing cards laid in a row on the table (the editor numbers them later). Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the presenter's hands tap the first blank card, then the second, then the third — one tap each, slow and deliberate. 4–7s: his hand moves past where a fourth card would be and stops on empty table; he shakes his head once, small. 7–10s: the camera holds on the three blank cards and the level scale; nothing else moves; leave clean space above each card (editor numbers are added later).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "You get one balance scale, and you may use it exactly three times. Three weighings. That is all you get." Under the narration: very soft thoughtful music, a quiet room tone, and three soft taps on card, evenly spaced. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: a fourth card, any writing appearing on the cards, the cards sliding or multiplying, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-04 · NO GUESSING COUNTS (0:30–0:40) — Narration line 4

Upload first: B03_REF00_Cast + B03_PL3_BoardWall

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.
SET: the assay room in a wide shot: the long cream table centre-frame, the brass scale at its centre, the tray of twelve coins at the left end, the large completely BLANK board covering the wall behind (the editor draws the decision tree on it in Part 2 only). Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the challenger points at the tray, then at the scale, plainly doubting; the presenter listens, calm. 4–7s: the presenter raises one open hand, palm out — no shortcuts — then turns and looks at the blank board as if the plan belongs there. 7–10s: both face the board for a beat; the board stays COMPLETELY BLANK; the camera holds wide and still.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "No labels help you. No guessing counts. Your plan must work every single time, whichever coin is fake." Under the narration: very soft thoughtful music plus a quiet room tone; no other sound. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: anything appearing on the board, the presenter writing or drawing, a pointer or marker in any hand, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-05 · TWENTY-FOUR POSSIBILITIES (0:40–0:50) — Narration line 5

Upload first: B03_REF_TrayTop + B03_PL2_ScaleClose

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.
THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. Only the presenter's hands enter the frame (THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun).
SET: an alternating-feel single shot that starts top-down on the tray of twelve blank coins and tilts up to the brass scale standing level behind it — built as ONE slow tilt, no cut. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.

ACTION TIMELINE: 0–4s: top-down on the tray; the presenter's forefinger traces three slow arcs over the coins without touching them — the three outcomes every weighing can give. 4–7s: the camera tilts up to the scale; the beam rocks a tiny amount and settles dead level, pans empty. 7–10s: hold on the level, empty scale; leave the frame's upper third clean (the editor's possibility counter is added later).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "One weighing can balance, tip left, or tip right. Three weighings must sort twenty-four possibilities: twelve coins, heavy or light." Under the narration: very soft thoughtful music plus a quiet room tone and the faintest creak of the scale beam settling. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: coins on the pans in this clip, the beam ending tilted, the finger touching or moving a coin, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-06 · ONE BY ONE FAILS (0:50–1:00) — Narration line 6

Upload first: B03_PL4_TableTop + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. Only the presenter's hands enter the frame (THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun).
SET: a top-down view of the assay table: the tray of twelve blank coins at the left, the brass scale at the right, and a long empty stretch of table between them. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the presenter's right hand picks up ONE coin and sets it alone on the left pan; the right pan stays empty; the beam stays level (a lone coin against nothing proves nothing). 4–7s: he returns the coin, picks up a second coin, sets it alone on the pan, takes it off again — the same empty result, visibly slower. 7–10s: his hand hovers over the tray of remaining coins and stops, defeated; the camera holds; most of the tray is still untouched.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Check the coins one by one, and you will run out of weighings long before you run out of suspects." Under the narration: very soft thoughtful music plus a quiet room tone and two soft coin-on-brass ticks, far apart. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: the hand speeding up into a montage, more than one coin on a pan, the beam tipping against an empty pan, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-07 · THE PLAN COMES FIRST (1:00–1:10) — Narration line 7

Upload first: B03_PL3_BoardWall + B03_REF00_Cast

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign

anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist (seen from behind and the side). SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression (seen from behind and the side).
SET: the assay room from behind the two characters: both stand facing the large COMPLETELY BLANK wall board, the table and level scale in the lower frame, the tray of coins untouched at the left. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the two stand still, looking at the blank board; the presenter folds his arms, thinking. 4–7s: the challenger glances sideways at him, then back at the board, waiting. 7–10s: the presenter nods once, very small, as if the plan has clicked — but he does not turn, speak or point; the board stays blank; hold to the end.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "So the real puzzle is not the scale. It is the plan you must write before the first coin ever moves." Under the narration: very soft thoughtful music plus a quiet room tone; the music thins almost to silence in the last two seconds. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: anything appearing on the board, either character turning to camera, a smile that gives anything away, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-08 · THE QUESTION + THE PAUSE (1:10–1:20) — Narration line 8

Upload first: B03_PL1_AssayRoom + B03_REF_TrayTop

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: the assay room in a wide locked shot: the table, the level scale with empty pans, the tray of twelve blank coins, and clean empty wall space in the upper third (the editor's question banner is added later). Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–2s: COMPLETE SILENCE held on the still room — nobody moves, the beam is dead level (this pause is scripted; keep it). 2–6s: the narration asks the question over the still room; the challenger looks from the coins to the scale, beaten for now. 6–10s: the presenter steps half a step back from the table and folds his arms, inviting the viewer to try; leave the upper third and the lower third clean (editor question banner and captions are added later).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Can you guarantee to find the fake in three weighings — and say whether it is heavy or light?

Answer tomorrow." Under the narration: two seconds of complete silence first, then very soft music under the narration, plus a quiet room tone. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: movement during the opening silence, the scale tipping, any coin marked or singled out, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

SECTION 9

PART C — VIDEO PROMPTS, PART 2 (11 CLIPS × 10 SECONDS, NARRATION INSIDE EVERY PROMPT)

09

How to use: in Google Flow, for each clip upload the reference images named at the top of its prompt, paste the whole block, generate. The narration is inside the prompt — Flow creates the voice with the clip. Listen-check every clip against Section 6; regenerate only the failures. Editor overlays (Section 5, OV codes) are NEVER part of a prompt — the spaces named in each timeline are left empty on purpose. Weighing clips are STILLS-FIRST: upload the named verified still and animate only what its prompt allows.

VOICE LOCK (inside every prompt below): One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series.

F-09 · RECAP — THE PLAN THAT ALWAYS WORKS (0:00–0:10) — Narration line 9

Upload first: B03_REF00_Cast + B03_PL3_BoardWall

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: the assay room in a medium-wide shot: the table with the tray of twelve blank coins and the level brass scale, the large wall board behind them still BLANK at the start (the editor's numbered coin chips and tree are added in the edit, never generated). Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the presenter stands at the table, the challenger beside him, both facing the coins; the mood is 'yesterday's problem, today's answer'. 4–7s: the presenter gestures once at the tray, once at the scale, once at the blank board — problem, tool, plan. 7–10s: he steps to the tray ready to begin; leave the board and the space beside every coin clean (all labels are editor overlays).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Yesterday's coin riddle. Twelve coins, one fake, heavy or light unknown, and three weighings only. Here is the plan that always works." Under the narration: brisk, confident music at low

volume plus a quiet room tone. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: anything appearing on the board, numbered or marked coins, a coin singled out or glowing, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-10 · WEIGHING ONE — FOUR AGAINST FOUR (0:10–0:20) — Narration line 10

Upload first: B03_STILL_W1 + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. No people in this clip; only the presenter's hands may enter at the very start (THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun).
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W1 — the scale table in a straight medium shot, the brass scale centre-frame, left pan holding exactly FOUR blank coins in a single layer, right pan holding exactly FOUR blank coins in a single layer, and the remaining FOUR blank coins resting in the tray beside the scale; animate ONLY a very slight settle of the beam toward level in the first second, then hold the still. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: the still settles; the pans hold exactly four coins each, flat, in a single layer, none stacked; leave a small clean space beside each coin (editor number chips 1–8 are added there later). 3–7s: absolute hold on the loaded scale; the beam stays level in this neutral presentation shot (the three real outcomes are shown by the editor's arrows — the generated beam must not choose an outcome). 7–10s: the tray with the remaining four coins is in clear view at the side; hold; count check on screen: four, four, four.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Label the coins one to twelve. Weighing one: coins one, two, three, four against five, six, seven, eight. The rest wait aside." Under the narration: confident low music plus a quiet room tone and the soft settle of chains in the first second. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: coins stacked or overlapping in a pan, five coins in a pan, the beam ending tilted, coins sliding between pans, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-11 · IF IT BALANCES — THREE SUSPECTS AGAINST THREE GENUINE (0:20–0:30) — Narration line 11

Upload first: B03_STILL_W2A + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and

flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W2A — the brass scale centre-frame, left pan holding exactly THREE blank coins in a single layer (the suspects the editor labels 9, 10, 11), right pan holding exactly THREE blank coins in a single layer (known genuine coins), the last suspect coin resting alone in the tray beside the scale; animate ONLY a tiny settle of the beam, then hold. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: the still settles with exactly three coins in each pan; leave clean space beside each coin for the editor's number chips. 3–7s: hold; the arrangement itself is the information — the eight coins from weighing one are visibly absent because they are proven genuine. 7–10s: the single coin alone in the tray is in clear view; hold on it a moment longer — it matters next.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing one balances, the fake hides among nine to twelve. Weighing two: nine, ten, eleven against three known genuine coins." Under the narration: confident low music plus a quiet room tone and the soft settle of chains in the first second. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: a fourth coin in either pan, the tray coin joining a pan, the beam ending tilted, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-12 · BALANCE AGAIN — COIN TWELVE, TESTED (0:30–0:40) — Narration line 12

Upload first: B03_STILL_W3A + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W3A — the brass scale centre-frame, exactly ONE blank coin alone in the left pan (the suspect the editor labels 12) and exactly ONE blank coin alone in the right pan (a known genuine coin); animate ONLY the beam tilting the way the editor's arrow beside the still directs for this take, or holding level if the take is the balance version — generate the tilt direction EXACTLY as briefed with this still, never the opposite. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: hold on the single-versus-single weighing; the two coins are the whole story — one suspect, one proven genuine. 3–7s: the beam performs the briefed result slowly and stops; it does not bounce back or reverse. 7–10s: hold on the result; leave clean space beside the left coin (the editor adds its number chip and the heavy/light verdict chip there — Part 2 only).
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing two balances, coin twelve is the fake. Weighing three: coin twelve against a genuine coin tells you heavy or light." Under the narration: confident low music plus a quiet room tone; a single soft chain creak as the beam settles. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: extra coins anywhere, the beam tilting the opposite way to the brief, the verdict appearing as generated text, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake,

fast motion.

F-13 · A TIP WITH A KNOWN DIRECTION (0:40–0:50) — Narration line 13

Upload first: B03_STILL_W3B + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W3B — the brass scale centre-frame, exactly ONE blank coin in the left pan and exactly ONE blank coin in the right pan (the pair the editor labels 9 and 10), all other coins in the tray; animate ONLY a small beam settle, then hold. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: hold on the one-against-one pair; clean space beside each coin for the editor's chips. 3–7s: the beam settles a small amount and holds — in this branch the previous tip has already told the viewer whether the fake is heavy or light, and this pair simply names which coin. 7–10s: the tray is in view with the third suspect resting in it (the balance case names that coin); hold.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing two tips, the tip tells you heavy or light. Weigh nine against ten: the odd one is fake; balance names eleven." Under the narration: confident low music plus a quiet room tone and the soft settle of chains. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: a third coin on the scale, the beam swinging widely, the tray coin moving, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-14 · IF IT TIPS LEFT — HEAVY LEFT, LIGHT RIGHT (0:50–1:00) — Narration line 14

Upload first: B03_PL2_ScaleClose + B03_REF00_Cast

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: a close view of the scale table: the brass scale centre-frame with pans EMPTY and level for this explaining shot, the tray of coins at the side, the presenter standing behind the table where he can point at each pan in turn. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: the presenter points at the LEFT pan and holds — heavy suspects live on the side that dropped. 4–7s: he points at the RIGHT pan — light suspects live on the side that rose. 7–10s: he gestures at the tray beside the scale — the four coins that were never weighed are now known genuine; he nods once; the pans stay empty in this explaining shot so no wrong arrangement can be copied.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series.

The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing one tips left down, the fake is heavy on the left, or light on the right. The four aside are genuine." Under the narration: confident low music plus a quiet room tone. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: coins placed on the pans in this explaining clip, the presenter pointing at the wrong pan for the beat, the beam tipping, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-15 · WEIGHING TWO — THE MIXED WEIGHING (1:00–1:10) — Narration line 15

Upload first: B03_STILL_W2B + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W2B — the brass scale centre-frame, left pan holding exactly THREE blank coins in a single layer (the coins the editor labels 1, 2 and 5), right pan holding exactly THREE blank coins in a single layer (the coins the editor labels 3, 6 and one known genuine coin), and THREE suspect coins resting in the tray beside the scale (the editor labels them 4, 7 and 8); animate ONLY a tiny settle of the beam, then hold. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: the still settles; count check on screen: three coins left, three coins right, three coins aside in the tray. 3–7s: hold on the mixed arrangement — maybe-heavy, maybe-light and one genuine coin share the pans by design; leave clean space beside every coin for the editor's chips. 7–10s: hold on the tray's three waiting coins a moment longer; they decide the balance case next.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Weighing two: one, two and five against three, six and a genuine coin. Four, seven and eight wait aside." Under the narration: confident low music plus a quiet room tone and the soft settle of chains in the first second. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: four coins in a pan, only two coins in the tray, coins stacked, the beam ending tilted, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-16 · BALANCE IN WEIGHING TWO — THE ASIDE THREE (1:10–1:20) — Narration line 16

Upload first: B03_STILL_W3C + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W3C — the brass scale centre-

frame, exactly ONE blank coin in each pan (the pair the editor labels 7 and 8), the remaining suspect coin alone in the tray (the editor labels it 4); animate ONLY a small beam settle, then hold. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: hold on the one-against-one pair of maybe-light coins; clean space beside each for the editor's chips. 3–7s: the beam settles slightly and holds; the rising side — if either rises — is the light fake, and the editor's arrow marks it. 7–10s: the single coin in the tray is in clear view; if the pair balances, that tray coin is the heavy fake; hold.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing two balances, the fake is four, seven or eight. Weigh seven against eight: the rising side is light; balance names four." Under the narration: confident low music plus a quiet room tone and the soft settle of chains. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: extra coins on the scale, the tray coin missing, a coin changing pans, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-17 · TIPS IN WEIGHING TWO — THE LAST TESTS (1:20–1:30) — Narration line 17

Upload first: B03_STILL_W3D + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W3D — the brass scale centre-frame, exactly ONE blank coin in each pan (the test pair for this branch), every other suspect resting in the tray in clear view; animate ONLY the beam tilting the way the editor's arrow beside the still directs for this take — never the opposite direction. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: hold on the test pair; this is a weighing-three shot, so only two coins are on the scale in total. 3–7s: the beam performs the briefed result slowly and stops; the heavier side drops or the pair balances, exactly as briefed. 7–10s: hold on the result and the waiting coins in the tray — between the pair and the tray, every suspect for this branch is accounted for.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing two tips left, test one against two. If it tips right, test three against a genuine coin. Each ending names the fake." Under the narration: confident low music plus a quiet room tone; one soft chain creak as the beam settles. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: the beam tilting opposite to the brief, three or more coins on the scale, coins swapping pans mid-clip, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-18 · THE MIRROR — TIPS RIGHT (1:30–1:40) — Narration line 18

Upload first: B03_STILL_W2C + B03_PROP_Scale

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: THE BALANCE SCALE: a polished brass balance scale —

one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. No people in this clip.
SET: a STILLS-FIRST clip: build it from the verified still B03_STILL_W2C — the brass scale centre-frame, left pan holding exactly THREE blank coins in a single layer (the coins the editor labels 5, 6 and 1), right pan holding exactly THREE blank coins in a single layer (the coins the editor labels 7, 2 and one known genuine coin), and THREE suspect coins in the tray beside the scale (the editor labels them 8, 3 and 4); animate ONLY a tiny settle of the beam, then hold. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–3s: the still settles; count check on screen: three left, three right, three aside — the mirror image of the left-tip plan. 3–7s: hold; the editor's chips and arrows walk the three outcomes (the full mirror tree is drawn on the board overlay in this clip's edit, never generated). 7–10s: hold on the tray's three waiting coins; every mirror branch ends in a weighing-three test of at most three suspects.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "If weighing one tips right, mirror the same plan: five, six and one against seven, two and a genuine coin. Every branch still ends." Under the narration: confident low music plus a quiet room tone and the soft settle of chains in the first second. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: the left-tip arrangement copied instead of the mirror arrangement, four coins in a pan, the beam ending tilted, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

F-19 · EVERY BRANCH ENDS — OUTRO (1:40–1:50) — Narration line 19

Upload first: B03_PL3_BoardWall + B03_REF_TrayTop

Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds.
Use the uploaded reference images for the exact characters, props and set — do not redesign anything. CHARACTERS AND PROPS IN THIS CLIP: ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist. SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
SET: the assay room in a wide locked shot: the table with the tray of twelve blank coins and the level scale, the large wall board behind them with clean space across its whole face (the editor draws the COMPLETE decision tree there — it is never generated), both characters standing either side of the table. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.
ACTION TIMELINE: 0–4s: both characters look up at the board space where the editor's tree will stand; the challenger gives one slow, conceding nod. 4–7s: the presenter sets the pouch, now empty, down beside the tray and steps back — the demonstration is complete. 7–10s: hold on the

coins, the level scale and the two satisfied figures; leave the board area and the lower third clean for the editor's tree and end chip.
NARRATION AUDIO — GENERATE THE AUDIO WITH THIS CLIP: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narrator says ONLY these exact words, word for word, with nothing added and nothing removed: "Every branch ends the same way: one coin named, and one word — heavy, or light. Three weighings. Twenty-four possibilities. Zero luck." Under the narration: confident low music that resolves warmly at the end, plus a quiet room tone. No character on screen speaks or moves its lips. Finish the narration before the clip ends; any remaining time is ambient sound only.
AVOID: anything appearing on the board as generated art, a coin marked or singled out, either character holding a coin up like a trophy, realistic faces, 3D look, text, letters, numbers, symbols on coins, marked or coloured coins, a coin changing size, coins appearing or disappearing, watermark, camera shake, fast motion.

SECTION 10

PART D — AGENT MASTER PROMPT (PASTE ONCE, THE AGENT BUILDS ALL 19 CLIPS)

10

How to use: paste the whole block below into the agent (Google Flow / Antigravity) together with the reference images from Section 7. The agent generates the references first, checks them, builds the stills, then generates the clips in order, listen-checks the narration, and reports any clip that fails a check instead of quietly fixing it in the edit.

You are the production agent for the riddle video "TWELVE COINS, ONE FAKE — Find It In Three Weighings". Build TWO vertical 9:16 videos: Part 1 (the riddle, 8 clips, answer withheld) and Part 2 (the solution, 11 clips). Work ONLY from this prompt. Do not invent scenes, do not change a word of narration, do not change a single coin in any weighing.

STYLE LOCK [COINS-2D]: Animate as a 2D FLAT CARTOON ANIMATION ONLY — hand-drawn storybook cartoon style, flat solid colours, thick bold black outlines, simple shapes, simple round cartoon faces. The animation must stay 2D and flat like a cartoon, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, no photographic detail. One continuous shot, vertical 9:16, lasting 10 seconds. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows.

CHARACTERS (exact, in every clip — never redesign):
ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist.
SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression.
THE PRESENTER'S HANDS: a man's hands with deep teal blazer cuffs and cream shirt cuffs, a plain dark wristband on the RIGHT wrist — only coins are ever touched, one coin at a time, between thumb and forefinger, and a coin is never palmed, flipped or spun.
THE BALANCE SCALE: a polished brass balance scale — one straight central pillar on a wide round brass base, a level horizontal beam with a small central pointer, and two identical round brass pans hanging from fine chains, each pan wide and flat enough to hold FOUR coins in a single layer with space between them. The scale carries NO numbers, NO letters, NO markings and NO dial anywhere.
THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical.

THE THREE RULES (they override everything else):
1. COUNT RULE: every coin group matches its named list exactly — tray 12 (4+4+4); W1: 4 vs 4, 4 aside; W2-A: 3 vs 3 genuine, 1 aside; W2-B and W2-C: 3 vs 3, 3 aside; every W3: exactly TWO coins on the scale. Count pan by pan in every still and take; a wrong count = regenerate.
2. IDENTITY RULE: coins are blank and identical; numbers exist ONLY as editor chips added later.

Any generated mark, letter, number, colour or size difference on a coin = regenerate.
3. DIRECTION RULE: build every weighing clip STILLS-FIRST from its verified still, beam level; animate at most a small settle. Outcome tilts are editor work (arrows / rotated still layers), never the generator's choice. A beam ending tilted in a neutral shot, or tilted against the brief, = regenerate.

VOICE RULE: One narrator voice only: a warm, confident adult male narrator, American accent, age about 30 to 35, calm suspenseful storytelling tone, medium pace — the EXACT SAME voice, same tone and same speed as every other clip in this series. The narration is generated WITH each clip. Each clip's narrator line is below, EXACT, word for word, nothing added, nothing removed. No character speaks or moves its lips. Listen-check every clip; if one word is wrong, regenerate THAT clip only.

STEP 1 — REFERENCE IMAGES (generate in this order, check each against the master pack's CHECK line, save with these exact names):
REF-00 → save as B03_REF00_Cast
REF-PRES → save as B03_REF_Presenter
REF-CHAL → save as B03_REF_Challenger
REF-HANDS → save as B03_REF_Hands
REF-TABLE → save as B03_REF_TrayTop
PROP-SCALE → save as B03_PROP_Scale
PROP-COINS → save as B03_PROP_Coins
PROP-POUCH → save as B03_PROP_Pouch
PROP-CARDS → save as B03_PROP_Cards
PL-1 → save as B03_PL1_AssayRoom
PL-2 → save as B03_PL2_ScaleClose
PL-3 → save as B03_PL3_BoardWall
PL-4 → save as B03_PL4_TableTop

STEP 2 — WEIGHING STILLS (beam LEVEL in every still; count every pan and tray against the list before saving):
STILL-W1 → save as B03_STILL_W1 — left pan exactly FOUR blank coins, right pan exactly FOUR blank coins, remaining FOUR blank coins in the tray beside the scale, beam level
STILL-W2A → save as B03_STILL_W2A — left pan exactly THREE blank coins, right pan exactly THREE blank coins, ONE suspect coin alone in the tray, beam level
STILL-W2B → save as B03_STILL_W2B — left pan exactly THREE blank coins, right pan exactly THREE blank coins, THREE suspect coins in the tray, beam level
STILL-W2C → save as B03_STILL_W2C — left pan exactly THREE blank coins, right pan exactly THREE blank coins, THREE suspect coins in the tray, beam level
STILL-W3A → save as B03_STILL_W3A — exactly ONE blank coin in the left pan, exactly ONE blank coin in the right pan, all other coins in the tray, beam level (tilt versions are made in the edit from this still)
STILL-W3B → save as B03_STILL_W3B — exactly ONE blank coin in each pan, all other coins in the tray, beam level
STILL-W3C → save as B03_STILL_W3C — exactly ONE blank coin in each pan, ONE suspect coin alone in the tray, beam level
STILL-W3D → save as B03_STILL_W3D — exactly ONE blank coin in each pan, all other suspect coins in the tray in clear view, beam level

THE COIN LISTS (the tree — never change a coin): W1: left 1·2·3·4, right 5·6·7·8, aside 9·10·11·12. Branch A (W1 balances): W2-A left 9·10·11, right 1·2·3 genuine, aside 12; then W3: if W2 balances, 12 vs genuine; if W2 tips, 9 vs 10 (balance names 11; direction already known). Branch B (W1 left drops): W2-B left 1·2·5, right 3·6·9-genuine, aside 4·7·8; W3 by outcome — balance: 7 vs 8 (balance names 4 HEAVY); left drops: 1 vs 2 (balance names 6 LIGHT); left rises: 3 vs genuine (balance names 5 LIGHT). Branch C (W1 right drops) mirrors B: W2-C left 5·6·1, right 7·2·9-genuine, aside 8·3·4; W3 — balance: 3 vs 4 (balance names 8 HEAVY); left drops: 5 vs 6 (balance names 2 LIGHT); left rises: 7 vs genuine (balance names 1 LIGHT).

STEP 3 — CLIPS (generate in this order, each 10 seconds, vertical 9:16, using the full standalone prompt for that clip in the master pack — this list is the order and the uploads, the pack's Section 8/9 blocks are the prompts):
F-01 · THE TWELVE COINS — upload first: B03_REF_TrayTop + B03_REF00_Cast
F-02 · HEAVY OR LIGHT? — upload first: B03_REF00_Cast + B03_PROP_Scale
F-03 · THREE WEIGHINGS ONLY — upload first: B03_PROP_Scale + B03_PROP_Cards
F-04 · NO GUESSING COUNTS — upload first: B03_REF00_Cast + B03_PL3_BoardWall
F-05 · TWENTY-FOUR POSSIBILITIES — upload first: B03_REF_TrayTop + B03_PL2_ScaleClose
F-06 · ONE BY ONE FAILS — upload first: B03_PL4_TableTop + B03_PROP_Scale
F-07 · THE PLAN COMES FIRST — upload first: B03_PL3_BoardWall + B03_REF00_Cast

F-08 · THE QUESTION + THE PAUSE — upload first: B03_PL1_AssayRoom + B03_REF_TrayTop
F-09 · RECAP — THE PLAN THAT ALWAYS WORKS — upload first: B03_REF00_Cast + B03_PL3_BoardWall
F-10 · WEIGHING ONE — FOUR AGAINST FOUR — upload first: B03_STILL_W1 + B03_PROP_Scale
F-11 · IF IT BALANCES — THREE SUSPECTS AGAINST THREE GENUINE — upload first: B03_STILL_W2A + B03_PROP_Scale
F-12 · BALANCE AGAIN — COIN TWELVE, TESTED — upload first: B03_STILL_W3A + B03_PROP_Scale
F-13 · A TIP WITH A KNOWN DIRECTION — upload first: B03_STILL_W3B + B03_PROP_Scale
F-14 · IF IT TIPS LEFT — HEAVY LEFT, LIGHT RIGHT — upload first: B03_PL2_ScaleClose + B03_REF00_Cast
F-15 · WEIGHING TWO — THE MIXED WEIGHING — upload first: B03_STILL_W2B + B03_PROP_Scale
F-16 · BALANCE IN WEIGHING TWO — THE ASIDE THREE — upload first: B03_STILL_W3C + B03_PROP_Scale
F-17 · TIPS IN WEIGHING TWO — THE LAST TESTS — upload first: B03_STILL_W3D + B03_PROP_Scale
F-18 · THE MIRROR — TIPS RIGHT — upload first: B03_STILL_W2C + B03_PROP_Scale
F-19 · EVERY BRANCH ENDS — OUTRO — upload first: B03_PL3_BoardWall + B03_REF_TrayTop

NARRATION LINES (exact):
Line 1 (F-01): "Twelve coins. They look exactly alike — same size, same shine, same face. But one of them is fake."
Line 2 (F-02): "The fake coin weighs a little more, or a little less, than the other eleven. Nobody knows which coin. Nobody knows which way."
Line 3 (F-03): "You get one balance scale, and you may use it exactly three times. Three weighings. That is all you get."
Line 4 (F-04): "No labels help you. No guessing counts. Your plan must work every single time, whichever coin is fake."
Line 5 (F-05): "One weighing can balance, tip left, or tip right. Three weighings must sort twenty-four possibilities: twelve coins, heavy or light."
Line 6 (F-06): "Check the coins one by one, and you will run out of weighings long before you run out of suspects."
Line 7 (F-07): "So the real puzzle is not the scale. It is the plan you must write before the first coin ever moves."
Line 8 (F-08): "Can you guarantee to find the fake in three weighings — and say whether it is heavy or light? Answer tomorrow."
Line 9 (F-09): "Yesterday's coin riddle. Twelve coins, one fake, heavy or light unknown, and three weighings only. Here is the plan that always works."
Line 10 (F-10): "Label the coins one to twelve. Weighing one: coins one, two, three, four against five, six, seven, eight. The rest wait aside."
Line 11 (F-11): "If weighing one balances, the fake hides among nine to twelve. Weighing two: nine, ten, eleven against three known genuine coins."
Line 12 (F-12): "If weighing two balances, coin twelve is the fake. Weighing three: coin twelve against a genuine coin tells you heavy or light."
Line 13 (F-13): "If weighing two tips, the tip tells you heavy or light. Weigh nine against ten: the odd one is fake; balance names eleven."
Line 14 (F-14): "If weighing one tips left down, the fake is heavy on the left, or light on the right. The four aside are genuine."
Line 15 (F-15): "Weighing two: one, two and five against three, six and a genuine coin. Four, seven and eight wait aside."
Line 16 (F-16): "If weighing two balances, the fake is four, seven or eight. Weigh seven against eight: the rising side is light; balance names four."
Line 17 (F-17): "If weighing two tips left, test one against two. If it tips right, test three against a genuine coin. Each ending names the fake."
Line 18 (F-18): "If weighing one tips right, mirror the same plan: five, six and one against seven, two and a genuine coin. Every branch still ends."
Line 19 (F-19): "Every branch ends the same way: one coin named, and one word — heavy, or light. Three weighings. Twenty-four possibilities. Zero luck."

STEP 4 — REPORT: for each clip report PASS or the exact failure (wrong count — say which pan; wrong direction; wrong word — quote it; marked coin; voice change). Never fix a failed weighing in the edit, never renumber a coin to make a take fit, and never deliver a clip whose scale frame you have not paused and counted.

SECTION 11

THUMBNAIL (PART 1 — THE RIDDLE'S QUESTION ONLY, NEVER THE ANSWER)

11

The idea: the scale, dead level, loaded with coins — and the number 3 hanging over it like a threat. Left pan: four blank coins. Right pan: four blank coins. The remaining four rest in the tray below, in clear view — the 4-4-4 shape is the riddle's *question*, not its answer, because what matters is what you do next, and the thumbnail never shows a second weighing, a label, a tree, or a singled-out coin. Elias stands behind the scale, arms folded, calm. Sana leans in from the side, pointing at the tray, plainly unconvinced. Big editor text across the top: "12 COINS. 1 FAKE." and a smaller line under it: "ONLY 3 WEIGHINGS". No coin is marked, numbered, coloured, glowing or separated from its group; the beam is level (a tipped thumbnail would claim an outcome the riddle hasn't given); no tree, no arrows, no verdict word anywhere.

THUMB-01 · THE LEVEL SCALE → save as B03_THUMB_LevelScale

```
2D FLAT CARTOON ILLUSTRATION ONLY — a hand-drawn storybook cartoon image, flat solid colours, thick bold black outlines around every shape, simple shapes, simple round cartoon faces. This is NOT a photo, NOT realistic, NOT 3D, NOT Pixar, NOT CGI, NOT a stick figure drawing. Assay-room palette: deep slate-blue walls, a warm cream wooden table, a polished brass balance scale, plain silver-grey coins with a darker grey edge, deep teal, rust red and warm cream clothing colours. Soft even workshop light, no dramatic shadows. Thumbnail image, vertical 9:16: the polished brass balance scale centre-frame on the warm cream assay table, its beam DEAD LEVEL, the left pan holding exactly FOUR plain blank identical silver-grey coins in a single layer, the right pan holding exactly FOUR plain blank identical silver-grey coins in a single layer, and a wooden tray below the scale holding exactly FOUR more plain blank identical silver-grey coins in a row. THE TWELVE COINS: exactly TWELVE identical plain silver-grey coins, all the same size, the same thickness and the same weight on screen, each with a darker grey edge and a COMPLETELY BLANK face — no letter, no number, no symbol, no portrait, no design of any kind on any coin. The coins are told apart ONLY by the numbered chips the editor adds beside them later; inside every generated image and clip the coins stay blank and identical. Behind the scale stands ELIAS COLE, THE PRESENTER (age about 36): medium height and medium build, short neat black hair, clean-shaven, a round friendly face, a deep teal blazer over a cream shirt with the sleeves rolled to the forearm, dark charcoal trousers, brown shoes, calm precise movements, and a plain dark wristband on his RIGHT wrist, arms folded, calm and confident. At the right side leans in SANA MIR, THE CHALLENGER (age about 29): medium height and slim, long black hair tied in a low ponytail, a rust-red cardigan over a plain white top, dark blue trousers, black flat shoes, an alert sceptical expression, pointing at the tray of four coins with a sceptical expression. Leave the top quarter of the frame as clean, uncluttered slate-blue wall (the editor adds the title text there later). No text anywhere in the generated image.
NEGATIVE: photorealistic, realistic, photograph, 3D render, CGI, Pixar style, skin texture detail, text, letters, numbers, symbols on coins, marked coins, different-sized coins, gold coins, extra coins, missing coins, extra people, watermark, logos.
CHECK: count the coins — 4 + 4 + 4 = 12, all blank and identical; the beam is level; nobody is holding or touching a coin.
```

Editor text (added in the edit, never generated): top line, bold white block letters with a black outline: "12 COINS. 1 FAKE." Second line, smaller, warm yellow: "ONLY 3 WEIGHINGS". Nothing else. If either line would cover a pan or a face, shrink the text — never move the coins.

SECTION 12

POSTING COPY

12

Three title options (Part 1 — pick one; all ask, none answer)

1. Twelve Coins, One Fake — Find It In Three Weighings
2. 12 Identical Coins. 1 Is Fake. You Get 3 Weighings.
3. Heavy Or Light? Nobody Knows. Three Weighings To Prove It.

Caption (Part 1)

Twelve coins that look exactly alike. One is fake — heavier or lighter, nobody knows which, nobody knows which way. You have a balance scale and exactly three weighings. Not four. Three. Your plan has to work every time, for every coin, in both directions. Drop your weighing plan in the comments — first weighing first. Part 2 tomorrow, with the full tree.

Pinned comment (Part 1 — the two debate camps)

PIN THIS: "Two camps in here every time CAMP A: '6 against 6 — biggest split wins.' CAMP B: '4 against 4, keep 4 aside.' Only one of these camps can survive the SECOND weighing. Which camp are you — and what exactly is your weighing 2? Best full plan gets pinned when Part 2 drops."

Posting notes

- Post Part 1 and Part 2 on **different days** — the overnight argument about weighing plans is the distribution engine, and Part 2's tree is the payoff viewers come back for.
- Part 2's caption carries the tree in words: "The full tree: 4v4 → balance? 3 suspects vs 3 genuine. Tip? Mix maybe-heavy + maybe-light + 1 genuine. Every branch ends in 3. Which branch did your plan miss?" — and pin a link to Part 2 under Part 1.
- Never put a branch outcome, a coin number from the tree, or the words "4 against 4" in Part 1's title, caption or thumbnail — the opening split is the first step of the solution, and Part 1 sells the question only. (The thumbnail shows the 4-4-4 *objects* because twelve coins and a scale are the riddle's givens; the *instruction* to weigh them that way is never stated in Part 1.)

SECTION 13

EDIT, CHECK, EXPORT (THE CHECKLIST) 13

Work down this list in order. In this book, checks 1–3 are the book: a failure there is not a blemish, it is a wrong proof, and the video does not ship until it passes.

1. **PAN-BY-PAN COIN COUNT (do this paused, on every scale frame, in every clip and still):** W1 frames: left pan 4, right pan 4, tray 4 — total 12. W2-A frames: 3 / 3 / 1 aside (12 is alone). W2-B and W2-C frames: 3 / 3 / 3 aside. Every W3 frame: exactly 1 coin in each pan — two coins on the scale in total — with the branch's remaining suspects visible in the tray. Part 1 tray frames: 12. Any frame that fails is cut or regenerated, never explained away.
2. **IDENTITY / CHIP CHECK:** pause beside every OV-LABELS / OV-W chip and read it against the chip map (Section 5): tray rows 1–4 / 5–8 / 9–12; W2-B right pan carries coin 9 marked GENUINE; W2-C is the mirror list, not a copy of W2-B. A chip beside the wrong coin teaches a wrong proof — fix the overlay or the take, never the tree.
3. **DIRECTION CHECK:** for every outcome moment, compare the OV-TIP arrow (and any rotated-still tilt) against Section 1's table for that branch, out loud: "Branch B, weighing two balances — arrow shows balance." Neutral presentation clips (F-10, F-11, F-15, F-18) must end LEVEL. A reversed arrow is the worst error this video can contain; check it twice, once per editor if two people are working.
4. **STILLS PROVENANCE CHECK:** every weighing clip traces back to its named verified still (STILL-W1 / W2A / W2B / W2C / W3A–D) with the same coins in the same pans. If a clip's arrangement cannot be matched to its still, it does not ship.
5. **TREE CHECK:** read OV-TREE leaf by leaf against Section 1 before it goes into F-19: 24 leaves, each a coin number + HEAVY or LIGHT; Branch A 8, Branch B 8, Branch C 8; the three impossible outcomes marked as impossible, not drawn as results. One wrong leaf invalidates the whole tree graphic — rebuild it, do not patch text over it.
6. **ANSWER-HOLD CHECK (Part 1 only):** watch Part 1 end to end as a stranger. Nothing — frame, overlay, caption, thumbnail, caption text — may state a weighing's coin groups, name a suspect group, or use "genuine / maybe-heavy / maybe-light" as anything but the open problem. Part 1 asks; it never groups the coins. (Part 1 shows twelve coins and a scale: the givens. It never shows a plan.)

7. **COIN APPEARANCE CHECK:** scrub both videos for any coin that reads as marked, darker, larger, scratched or glowing in any frame — including reflections on the brass pans. One special-looking coin rigs the riddle; the take is regenerated.

8. **HANDS CHECK:** only Elias's hands touch coins (teal cuff; wristband on the RIGHT wrist in every appearance). Sana touches no coin in any clip. Coins are set down, never flipped, spun or slid between pans within a shot.

9. **BLANK SURFACES CHECK:** the board is blank in every Part 1 frame and in F-09; the cards are blank until the editor's numbers land; no generated text survives anywhere in either video — zoom into any suspicious glyph and remove the take if it is real.

10. **Voice check:** every line present, word-exact against Section 6, one voice throughout both videos, no dead air longer than the scripted pauses (F-08's 2 seconds). **Levels:** narration clearly above the music; export around −14 LUFS.

11. **Sound-picture check:** every coin clink and chain settle matches a visible coin or beam movement in the same beat; remove any sound whose action is not on screen.

12. **Post:** Part 1 with Section 12's copy; pin the debate comment. Part 2 the next day; pin the link under Part 1. Never post both parts on the same day.
