THE TWO ROPES

MEASURE 45 MINUTES WITH FIRE

THE CASE IN ONE LINE
Two crooked clocks made of rope — and a lighter that tells the exact time.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

THUMBNAIL
the cover frame that earns the tap

POSTING COPY
titles, caption, pinned comment

EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

On the table: two ropes and a lighter. Each rope, lit at one end, takes exactly one hour to burn completely.

But the ropes are traitors to your intuition: they do not burn evenly. One half of a rope might vanish in five minutes while the other half smoulders for fifty-five. Length tells you nothing about time.

No watch, no clock, no phone. With only the two ropes and the lighter, measure exactly forty-five minutes.

THE QUESTION

How can two uneven ropes measure exactly 45 minutes?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

How can two uneven ropes measure exactly 45 minutes?

HINT 1

Forget the rope's length — think about its two ends. What changes when a rope burns from both ends at once?

HINT 2

A rope lit at both ends is gone in exactly half an hour, however unevenly it burns. That is your first clock.

HINT 3

When the first clock runs out, start a second fire on the surviving rope — at the end that is still unlit.

YOUR MOVE

How can two uneven ropes measure exactly 45 minutes?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

Light rope one at both ends and rope two at one end. When rope one dies (30 minutes), light rope two's other end — it dies 15 minutes later: 45.

Burning from both ends, rope one is consumed in exactly 30 minutes — the two flames meet wherever the rope's fast and slow parts balance out, and the total is always half the full burn. At that moment, rope two has exactly 30 minutes of burning left in it.

Light rope two's free end. Now it burns from both ends, so its remaining 30 minutes of rope takes 15 minutes of clock. When it dies: 30 + 15 = 45 minutes, exactly.

WHY IT WORKS

The uneven burn defeats every length-based idea, so the solution uses the one quantity that IS fixed: total burn time. Doubling the flames halves the time, no matter how the rope's speed is distributed inside.

Two halvings give you 30 and 15 — and 45 is just their sum. The riddle is a reminder that a broken measuring tool can still measure, if you change what you ask of it.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Cutting or folding the rope to find 'three quarters of its length'. Uneven burning makes three quarters of the length worth anything from seconds to most of the hour.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team CUT IT: 'Find three quarters of the rope and burn that. An hour's rope, three quarters — forty-five minutes.'

CAMP B SAYS
Team BOTH ENDS: 'Length lies, total burn time doesn't. Double the flames, halve the time — 30 plus 15.'

PIN THIS COMMENT
Your method — CUT THE ROPE or BURN BOTH ENDS? Commit BEFORE the reveal.

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
The ropes keep their identities: rope one is always the loose S on the left, rope two always the circle on the right until it is laid out for burning. Never swap their shapes.

LOCK
No clock, watch, phone or hourglass appears in any frame. All time figures are drawn in editing.

LOCK
Flames appear only at the ends named by the narration: first rope both ends, second rope one end, then its other end only after the first rope is ash.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-ROPES: flat 2D storybook illustration, vertical 9:16, top-down dark wooden table with two distinct unlit ropes — one in a loose S shape, one in a circle — and a metal lighter beside them, no text.

REF 2
REF-ENDS: flat 2D storybook illustration, vertical 9:16, close view of one rope burning from both ends, two flames moving toward each other at visibly different speeds, dark background, no text.

REF 3
REF-LIGHTER: a plain metal lighter alone on a deep-navy background, flat 2D storybook style, small flame, centred, no text.

REF 4
REF-ASH: flat 2D storybook illustration, vertical 9:16, top-down view of one rope reduced to a grey ash line while a second rope still burns from one end, dark wooden table, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
Top-down view of two coiled ropes and a metal lighter on a dark wooden table. One rope lies in a loose S, the other in a circle. Slow push-in.

NARRATION — generated inside this clip
"Two ropes. Each one takes exactly one hour to burn from end to end."

Sound: A lighter clicking in a quiet room.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
A close section of rope burns in uneven jumps: one stretch flares quickly, the next barely creeps. The flame's speed visibly refuses to behave.

NARRATION — generated inside this clip
"But neither burns evenly. One stretch can race away while the rest smoulders. Length tells you nothing."

Sound: Uneven crackling, fast then slow.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
Scissors and a ruler approach the rope, then stop and withdraw. The frame rejects every length-based idea without a word.

NARRATION — generated inside this clip
"No watch. No clock. Measure exactly forty-five minutes using only the ropes and a lighter."

Sound: Metal tools set down and removed.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the two unlit ropes and lighter, perfectly still. Leave the lower third open for the pause.

NARRATION — generated inside this clip
"Do you cut the rope? Fold it? Burn it and guess? Lock your method in the comments."

Sound: Silence, one ember ticking.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
Three flames appear at once: both ends of the first rope and one end of the second. The first rope's two flames crawl toward each other at uneven speeds.

NARRATION — generated inside this clip
"Light the first rope at both ends, and the second rope at one end. However uneven they are, the first dies in thirty."

Sound: Three small flames catching.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
The first rope is ash. A new flame touches the second rope's free end; its two flames meet and vanish together. The table is quiet and empty.

NARRATION — generated inside this clip
"Now light the second rope's other end. Its remaining half-hour burns in fifteen. Forty-five exactly. Follow for daily riddles."

Sound: A final soft puff of ash.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'THE TWO ROPES'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"Two ropes. Each one takes exactly one hour to burn from end to end."

LINE 2 · 0:10
"But neither burns evenly. One stretch can race away while the rest smoulders. Length tells you nothing."

LINE 3 · 0:20
"No watch. No clock. Measure exactly forty-five minutes using only the ropes and a lighter."

LINE 4 · 0:30
"Do you cut the rope? Fold it? Burn it and guess? Lock your method in the comments."

LINE 5 · 0:40
"Light the first rope at both ends, and the second rope at one end. However uneven they are, the first dies in thirty."

LINE 6 · 0:50
"Now light the second rope's other end. Its remaining half-hour burns in fifteen. Forty-five exactly. Follow for daily riddles."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

One rope burning from both ends, flames crawling toward the middle. Edit-drawn text: 'MEASURE 45 MINUTES'.

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a thick rope stretched across a dark wooden table burning from both ends, flames moving toward the centre, a lighter resting nearby, dramatic warm light against deep navy shadow, the top third left empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
Measure 45 Minutes With Two Uneven Ropes

TITLE
The Burning Rope Puzzle (No Watch Allowed)

TITLE
Each Rope Burns for 1 Hour — Time Exactly 45 Minutes

CAPTION — first line is the question
Each rope burns for one hour, but unevenly. No watch. How do you measure exactly 45 minutes? Comment your method BEFORE the reveal. New riddle every day.

PINNED COMMENT
Your method — CUT THE ROPE or BURN BOTH ENDS? Commit BEFORE the reveal.

Hashtags: #riddle #logicpuzzle #brainteaser #ropepuzzle #mathspuzzle #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: The training round: with one rope and one lighter, measure exactly 30 minutes. The comments that learned 'both ends' will race to answer — then ask why the trick works on an uneven rope.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

Light rope one at both ends and rope two at one end. When rope one dies (30 minutes), light rope two's other end – it dies 15 minutes later: 45.

A new riddle lands every day. Solve the next one before the reveal.

– END OF BOOK –
