THE DARK DRAWER

HOW MANY SOCKS GUARANTEE A PAIR?

THE CASE IN ONE LINE
Forty socks, two colours, total darkness — and certainty costs less than you think.

THE COMPLETE PRODUCTION PACK — STORY · SCRIPT · NARRATION · EVERY PROMPT

WHAT'S INSIDE

One riddle, taken all the way from story to posted video. Every page does one job.

THE CASE
the story, exactly as the viewer hears it

THE QUESTION + THREE HINTS
the hook and the ladder

YOUR MOVE
the pause page — where comments are born

THE REVEAL + WHY IT WORKS
the verified answer, watertight

THE TRAP + COMMENT ENGINEERING
why brains fail it, and how the debate is seeded

CHARACTER & STYLE LOCK
the designs that never change

REFERENCE IMAGE PROMPTS
the stills to generate first

VIDEO PROMPTS 1-6
one clip per page, narration inside each

AGENT MASTER PROMPT
the one prompt that runs the build

NARRATION SCRIPT
every line, in order, with timing

THUMBNAIL
the cover frame that earns the tap

POSTING COPY
titles, caption, pinned comment

EDIT CHECKLIST
the checks before anything posts

AI — WHO DOES WHAT
every step, and whose job it is

THE CASE

A drawer holds 20 black socks and 20 white socks, all loose, all mixed together. Socks of the same colour count as a pair, whichever foot they were made for.

The room is pitch black. You cannot see a thing — every sock you pull out is a pure guess at its colour.

You want certainty, not luck: the smallest number of socks after which you can guarantee — no matter how unlucky your pulls — that you are holding a matching pair.

THE QUESTION

What is the smallest number of socks that guarantees a matching pair?

THE QUESTION + THREE HINTS

Open them one at a time. Stop the moment you have it — the last hint nearly gives it away.

THE QUESTION

What is the smallest number of socks that guarantees a matching pair?

HINT 1

Don't compute luck. Ask the worst case: how unlucky can you possibly be, and for how long?

HINT 2

The worst luck still runs out. With only two colours in the drawer, how many single socks can you hold before one colour must repeat?

HINT 3

Think of each colour as a box that can hold your pulls. Two boxes, and a third sock has nowhere new to go.

YOUR MOVE

What is the smallest number of socks that guarantees a matching pair?

Decide your answer now — say it out loud or drop it in the comments — before you turn this page. No going back.

THE REVEAL

THE ANSWER

Three socks. With only two colours, the third sock must match one of the first two.

Pull one sock: it is black or white. Pull a second: worst case, it is the other colour — you hold one of each, still no pair. Pull a third: it is black or white, and either way it matches a sock already in your hand.

Two socks can fail (one of each colour), so three is not just enough — it is the minimum. The guarantee needs no luck at all, which is exactly what makes it a guarantee.

WHY IT WORKS

This is the pigeonhole principle wearing socks: more items than categories forces a repeat. Three socks, two colours — a repeat is unavoidable.

The principle scales beautifully: add a third colour and the guarantee rises to four; demand two full pairs and the counting grows teeth. But the engine is always the same worst-case arithmetic.

THE TRAP + COMMENT ENGINEERING

THE TRAP, NAMED
Answering with probability — 'a few handfuls should do it'. The question asks for a guarantee, and guarantees are built from the worst case, not the average one.

This riddle is built to split the comments into two camps. Seed both, then let them argue:

CAMP A SAYS
Team HANDFUL: 'Grab a good handful — seven, eight socks. Probability is on your side; a pair is basically certain.'

CAMP B SAYS
Team THREE: 'Basically certain is not certain. Two colours means the third sock must match. Three is the guarantee.'

PIN THIS COMMENT
Your number — lock it in BEFORE the reveal. Guarantees only: how many socks make a pair unavoidable?

CHARACTER & STYLE LOCK

[VAULT-2D] STYLE LOCK — flat 2D storybook animation, deep-navy night palette with one lime accent, clean shapes, soft moonlight, no text inside the picture except where a prompt says so, vertical 9:16. Characters never change design between clips: generate the reference stills first, then build every clip from them.

LOCK
Only two colours ever appear: plain black and plain white. No stripes, patterns or grey socks — a third shade breaks the guarantee on screen.

LOCK
The drawer always holds the same jumble and the room stays pitch dark until the final morning shot. Pulled socks are counted in editing whenever the count is stated.

LOCK
Sock shapes are plain and identical apart from colour; left and right feet are never distinguished, matching the riddle's rule.

Never redesign a locked character mid-video. If a generation drifts, regenerate the still — never accept a near-match.

REFERENCE IMAGE PROMPTS

Generate these stills first, in this order, and check each one before any video clip is made.

REF 1
REF-DRAWER: flat 2D storybook illustration, vertical 9:16, an open dresser drawer full of loose black and white socks in near darkness, faint window light, no patterns on the socks, no text.

REF 2
REF-PAIR: flat 2D storybook illustration, vertical 9:16, two matching plain black socks folded neatly side by side on a dark dresser top, soft light, no other objects, no text.

REF 3
REF-HAND: flat 2D storybook illustration, vertical 9:16, a hand reaching into a dark drawer of jumbled black and white socks, seen from above, moody low light, no text.

REF 4
REF-TRIO: flat 2D storybook illustration, vertical 9:16, three plain socks laid in a row on a dresser — one black, one white, one black — dawn light, no text.

VIDEO PROMPT 1 OF 6

PICTURE — what Flow builds
A bedroom in near darkness. A drawer slides open, revealing a jumble of black and white sock shapes in the gloom. Slow push-in.

NARRATION — generated inside this clip
"A drawer: twenty black socks, twenty white socks, all loose, all mixed. The room is pitch black."

Sound: A drawer sliding on wood.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 2 OF 6

PICTURE — what Flow builds
A hand reaches in blindly and draws out one sock, holding it up as a silhouette against a faint window light.

NARRATION — generated inside this clip
"Same colour makes a pair — it does not matter which foot a sock was made for."

Sound: Cloth rustling in the dark.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 3 OF 6

PICTURE — what Flow builds
The hand draws a second sock of the opposite colour. The two unmatched socks hang side by side in the dim light.

NARRATION — generated inside this clip
"Forget luck. Forget averages. The question asks for a guarantee that survives your worst possible pulls."

Sound: A second rustle, a quiet sigh.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 4 OF 6

PICTURE — what Flow builds
Freeze on the drawer and the two unmatched socks, perfectly still. Leave the lower third open for the pause.

NARRATION — generated inside this clip
"How many socks must you take? Say the number out loud and lock it in the comments."

Sound: Silence, a clock ticking.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 5 OF 6

PICTURE — what Flow builds
The hand returns to the drawer one final time and pulls a third sock, which swings into the light matching one of the waiting pair.

NARRATION — generated inside this clip
"Worst case: your first two pulls are one black and one white. Annoying — and completely out of bad luck."

Sound: One last rustle — then a soft chime.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

VIDEO PROMPT 6 OF 6

PICTURE — what Flow builds
Morning light floods in: the matched pair folded neatly on the dresser, the drawer closed. Calm, almost smug.

NARRATION — generated inside this clip
"The third sock is black or white, so it matches one already in your hand. Three. Follow for a new riddle every day."

Sound: Morning birds, a drawer closing.

One tiny action only. If the clip drifts, cut to the verified still and use a slow zoom instead.

AGENT MASTER PROMPT

Paste this whole prompt to the agent (Google Antigravity) with this book. It runs the video build end to end.

MASTER PROMPT

You are producing a 60-second vertical riddle video, 'THE DARK DRAWER'. Use the story, hints and reveal in this book as the script — do not invent a different answer. Step 1: generate the reference stills from the Reference Image Prompts page, in order, and check each against the Character & Style Lock. Step 2: build the six clips in Google Flow, one per Video Prompt page, using Frames-to-Video from the checked stills, one tiny action per clip, narration generated inside each clip using the locked voice. Step 3: assemble the clips in order 1-6, keep the question on screen until the reveal clip, captions in the series style, no dead air. Step 4: run the Edit Checklist page and fix every failure before export. Deliver a 1080x1920 MP4.

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

NARRATION SCRIPT

Six lines, about ten seconds each — sixty seconds in total. Record or generate them exactly as written.

LINE 1 · 0:00
"A drawer: twenty black socks, twenty white socks, all loose, all mixed. The room is pitch black."

LINE 2 · 0:10
"Same colour makes a pair — it does not matter which foot a sock was made for."

LINE 3 · 0:20
"Forget luck. Forget averages. The question asks for a guarantee that survives your worst possible pulls."

LINE 4 · 0:30
"How many socks must you take? Say the number out loud and lock it in the comments."

LINE 5 · 0:40
"Worst case: your first two pulls are one black and one white. Annoying — and completely out of bad luck."

LINE 6 · 0:50
"The third sock is black or white, so it matches one already in your hand. Three. Follow for a new riddle every day."

VOICE LOCK — one warm American male narrator, 30-35, calm and confident, slightly amused at the question beats, dead serious at the reveal. Same voice, same pace, every clip. The narration is generated INSIDE each Flow clip; listen-check every clip and regenerate only failures.

THE THUMBNAIL

THE IDEA

A hand pulling one sock from a pitch-dark drawer, two unmatched socks waiting beside it. Edit-drawn text: 'HOW MANY GUARANTEE A PAIR?'

IMAGE PROMPT

Flat 2D storybook illustration, vertical 9:16: a hand reaching into an open drawer full of black and white socks in near darkness, two unmatched socks draped over the drawer's edge, faint window light, the top third left dark and empty for title text, no text in the image.

Rules: the question, never the answer. Three words or fewer of big text, drawn in editing — generated lettering garbles. Check it at profile-picture size before posting.

POSTING COPY

TITLE OPTIONS — pick one:

TITLE
How Many Socks Guarantee a Pair? (Dark Drawer Puzzle)

TITLE
20 Black, 20 White, Zero Light

TITLE
The Answer Is Smaller Than Everyone Guesses

CAPTION — first line is the question
A drawer of black and white socks in total darkness. How many must you pull to GUARANTEE a matching pair? Comment your number BEFORE the reveal. New riddle every day.

PINNED COMMENT
Your number — lock it in BEFORE the reveal. Guarantees only: how many socks make a pair unavoidable?

Hashtags: #riddle #logicpuzzle #brainteaser #probability #puzzle #dailypuzzle

EDIT CHECKLIST

Nothing posts until every line passes.

CHECK
Frame-check every beat: characters match the lock, no drift, no warped hands or faces.

CHECK
Every number and word on screen is drawn in editing and read back — generated text is never trusted.

CHECK
The question stays on screen until the reveal beat; the answer never appears early — not in a caption, not in a frame.

CHECK
Listen to the full cut: one voice throughout, no dead air, no clip where the narration went missing.

CHECK
The reveal lands in the final seconds; the last frame carries the follow prompt.

CHECK
Thumbnail checked small; title and caption lead with the question, never the answer.

AI — WHO DOES WHAT

Every step of this book's video, and whose job it is.

THE AGENT (Antigravity)
Reads this book, plans the shots, writes the generation queue, assembles the edit, runs the checklist.

GOOGLE FLOW
Generates the reference stills, then the six clips with the narration inside each clip.

THE EDITOR (you, or the agent)
Draws all on-screen text and numbers, sets captions, checks every frame and every second of audio.

THE CHANNEL
Posts with the title, caption and pinned comment from the Posting Copy page — question first, answer never.

Part 2 idea: Add a third colour: red socks join the drawer. The guarantee climbs from three to four — make the comments derive it before Part 2 confirms the pigeonhole step.

ABOUT THIS BOOK

One riddle, taken seriously: a verified answer, a locked visual style, and the complete route from page to posted video — script, narration, image prompts, video prompts, thumbnail and posting copy, all in one pack.

OWNERSHIP
This book — its text, structure and design — is owned by OTT TITANS. Reading or downloading it grants you the right to enjoy it and to produce your own version of the riddle video on your own channels. It never transfers ownership of the book.

The riddle itself is a classic that has travelled for years. This pack — its words, structure and production system — is the original work.

CASE CLOSED

Three socks. With only two colours, the third sock must match one of the first two.

A new riddle lands every day. Solve the next one before the reveal.
